

ORDER TO END OZARD TO END BEARS CASE NORRIS

Minister of Justice to Investigate Police Methods at Kiev, Convict at Lodz Asserts That He Killed the Boy for Pay.

Flight of Jews From South Russia Increases Threefold—The "Woman of Mystery" Again on Stand—Troops Guard Belis.

Special Cable to The American.

ST. PETERSBURG, Oct. 25.—(Governmental action in regard to the trial, which has been delayed and expected by all right-minded Russians, is in sight. It is authorized by the Minister of Justice to order a suspension of the case after a report has been made into all the circumstances.

This means that the police methods of working up the case against Belis, including the use of "third degree" methods, will be officially investigated.

A story comes from Lodz that a convict there has confessed to the Yushinsky murder. This man, Belegov, was sentenced to a term of years in prison for the murder of a boy named Yushinsky, who was the son of a Russian nobleman.

A great exodus of Jews from Southern and Southwestern Russia since the week before the trial began is revealed in the official statistics. The Jewish emigration has increased threefold and is still going on, though against the emigration closes in October.

The "woman of mystery," Vera Yushinsky, was again on the stand in today's proceedings. She was asked to identify the boy named Yushinsky, who was the son of a Russian nobleman.

She testified that she had seen the boy named Yushinsky, who was the son of a Russian nobleman, and that she had seen him in the company of a man named Yushinsky.

She also testified that she had seen the boy named Yushinsky, who was the son of a Russian nobleman, and that she had seen him in the company of a man named Yushinsky.

She also testified that she had seen the boy named Yushinsky, who was the son of a Russian nobleman, and that she had seen him in the company of a man named Yushinsky.

Slingsby Baby Substitution Case To Be Reopened Estate Yielding \$50,000 Yearly Is Involved

I ENCLOSE a kodak group of Mrs. Slingsby, myself and the baby, taken at our home; you may be able to discern the similarity of expression to me in this child, which we and others, our friends, see—Lieutenant Charles H. R. Slingsby, in letter to California State Board of Health.

Lieutenant Slingsby and American Wife Fighting to Prove Little One Is Theirs.

SAN FRANCISCO, Oct. 25.—The famous Slingsby baby substitution case is to be reopened. A Carnegie Trust, which has been set up by the High Court of Chancery in London to take the testimony of witnesses and upon the result will decide the disposition of the baby Slingsby estate in Yorkshire, yielding an income of \$50,000 a year. The case was first brought to the attention of the public by the fact that the baby Slingsby, who was the son of a Russian nobleman, was found in the company of a man named Yushinsky.

To Be Absolutely Certain of the Genuine Duffy's Pure Malt Whiskey

observe the following three points of distinction:

- 1.—That the neck strap over the cork is unbroken. It's the mark of security.
- 2.—That our name and monogram are blown in the bottle. It's a certificate of merit.
- 3.—That the label bears our trade-mark of the "Old Chemist" and signature of the Company. It's a sign of the genuine.

Insist On Duffy's

Unscrupulous manufacturers and dealers sometimes take advantage of the national popularity of Duffy's Pure Malt Whiskey as a remedy for all ailments, by offering imitations and substitutes of the genuine. To guard your best interests, become familiar with the exact appearance of the bottle. The contents of which have done so much to relieve suffering and bring health and happiness into thousands of homes.

JUROR HENSLEE PLOTTED TO HANG LEO M. FRANK, ASSESSOR'S LAWYER ARNOLD

Counsel for Pencil Factory Superintendent Declares Man Went on the Venire With Purpose of Poisoning Minds of Fellows Against Defendant.

The most sensational charges ever made against a member of a Georgia jury were brought against A. H. Henslee, one of the twelve men who found Leo M. Frank guilty of the murder of Mary Phagan, by Attorney Reuben Arnold late Saturday afternoon, at the close of a day and a half of testimony in the hearing of the motion for a new trial for the convicted factory superintendent.

Emphasizing his accusations with a menacing forefinger, Attorney Arnold charged that Juror Henslee deliberately carried his prejudice against Leo Frank so far as to plot to get on the jury, that he might spread the virus of prejudice among the other jurors. He declared that he urged this point solely on the affidavit that had been filed against Henslee by leading and reputable citizens, who swore that Henslee had so expressed himself to them as to make possible no other conclusion than the one which the attorney advanced.

Arnold accused Solicitor Dorsey of warring and distorting of evidence that was before the court and also of introducing statements for which there was no warrant in the testimony of any witness who had appeared on the stand.

To aggravate this offense he charged that Dorsey employed liars and inequitable methods to write a sort of affidavits he wanted from prominent people, like the negro women, Mamie McKnight, Arnold discussed every phase of evidence, branding Jim Conley's story as a monstrous and grotesque fabrication inspired by the detectives and pointing to the negro as the real culprit.

Calls Verdict Vitiated.
On the fact that a wild demonstration took place outside the courtroom before the polling of the jury was completed, he argued that the verdict was vitiated under the law of the State of Georgia and that a new trial would have to be granted even were no other grounds to be considered. He cited Georgia Supreme Court decisions to uphold his contention.

It is unlikely that Attorney Arnold will secure much more than the hour Monday. Solicitor Dorsey is expected to make up the motion for the State in an effort to rid the case of the venom of the day before. Attorney Arnold's address will not be disclosed by the State. The motion will be taken to Judge Ross for decision that night.

Mr. Rosen late Saturday afternoon filed the report that a new trial was granted by Judge Ross, could not be sold in Fulton County. Judge Ross could not act as prosecutor because charges of prejudice formed the basis of the application for a new trial.

Exact Charge of Venue Plea.
He stated that the sense of an Atlanta jury would depend entirely upon the ruling made by the judge when the motion was made for a change of venue should one be made. Should the judge refuse the application, the trial would have to be held in the county, and of course there could be no change of venue without an application.

It is generally believed that if a new trial is granted a change of venue will be asked for. This option is used largely on a statement made by Attorney Arnold during his argument when he declared that if the State's case is strong it is expected to go on, no harm could result from the fact that the jury would be changed and where the chance to get justice is better.

Attorney Rosen, whose argument will bring the legal battle to a close, is expected to devote the greater portion of his speech to the charges of bias and prejudice brought against Henslee and Johnson.

Attorney Arnold declared that the

JUDGE EMORY SPEER, Georgia Federal Jurist under Congressional fire, whose death is expected at Mt. Airy.

Judge Emory Speer, Georgia Federal Jurist under Congressional fire, whose death is expected at Mt. Airy.

JUDGE SPEER ON DEATH BED; END BELIEVED NEAR

Congressional Investigation of Official Acts Thought to Have Hastened Fatal Illness.

MT. AIRY, Ga., Oct. 25.—With hope for the life of Judge Emory Speer abandoned by the attending physicians, relatives of the stricken Federal judge are hastening to Mt. Airy with all possible speed for a last moment at his bedside before the end comes. His daughter, Mrs. A. E. Heyward, arrived here tonight from Macon, joining her husband, who has been at Judge Speer's bedside for the last week.

Following a week of delirium, in which his nervous system was completely exhausted, Judge Speer suffered a stroke Friday, and late in the night his condition was said to have been critical. At any time during his illness, he has been unable to take any nourishment for more than a few hours, and paralysis has set in, hastening the end.

Specialists Summoned.
Specialists are hastening to Mt. Airy from Baltimore and other Eastern cities, but it is feared they will arrive too late. As a last resort an operation may be performed, though it is considered very doubtful whether the judge will ever recover his strength sufficiently to bear the shock of the surgery.

Judge Speer's illness dates almost from the beginning of the investigation into the official conduct, which was recently initiated at Washington and which has created a sensation throughout the South.

Over charges that had been brought against him and the impending inquiry, he was so weakened that his constitution and strength were seriously affected.

Has Gastric Attack.
Several weeks ago, during an acute attack of gastritis, which progressed to a gastric ulcer, he was compelled to quit his duties. He was then taken to the hospital, and at that time has appeared to rally through the sheer force of will power. However, his weakened condition has not improved, and his condition has grown steadily worse.

Judge Speer had hoped to attend the investigation into his official conduct, which begins in Macon next week, but he was so weakened that he would attend if he had to be taken there on a stretcher. In the event of his death, the investigation will be abandoned, it is known, but it is rumored that members of his family will insist that it be carried out as though he were alive, with the view of clearing his name of all suspicion.

Fisher Off to Dalton; Still Sticks to Story

'Mysterious Witness' Must Answer to Murder Charge Before His Atlanta Trial.

Still accusing J. C. Shirley of the murder of Mary Phagan and declaring that Leo M. Frank is innocent, Irwin W. Fisher, the man of mystery, will leave for Dalton today to face a charge of murder.

An officer from Dalton is expected in Atlanta Sunday morning to take Fisher there to answer the indictment returned a few days ago by the Whitfield County Grand Jury charging Fisher with the murder of the brother-in-law, Dag Steele, five years ago.

By agreement of Chief of Detectives Sanford and J. C. Shirley, merchant accused by Fisher and who swore out the warrant for criminal trial, the murder charge will take right of way over the Atlanta warrant, which will be held open against Fisher in the court of Justice of the Peace O. H. Puckett.

SYND OF GEORGIA MEETS AT ROME NOVEMBER 4-7

ROME, Oct. 25.—The Presbyterian Synod of Georgia will meet in Rome November 4 to 7. Ministers from all over Georgia will be present and several noted divines of other States will attend. The Rev. J. L. Hill of Atlanta is moderator and J. C. Horn, of LaGrange, secretary.

He doesn't smoke, drink, chew or swear.

This remarkable lozenge doesn't know the meaning of "short weight"; nor does he overcharge, and he never tracked up a kitchen floor.

Who? Why, his name is William Murray, and some day, in recognition of his seemingly perfect good qualities, the women of the nation will nominate him for President.

Murray was awarded a gold medal the champion Chicago lozenge. He had 15 competitors.

During twelve years Murray has never missed a day on the Lozenge, and with all that exercise he weighs 150 pounds.

GLAD TO GET BACK, EVEN IF STRIPES AVOID HIM

ROME, Oct. 25.—Shirley, who was sent from the Flood chain gang nine years ago, came back from Chattanooga with the sheriff without a conviction because he had been killed. Ross and was sent to get back, even if he had to go back to the gang.

Cook Was Patient, But Star Boarder Finally Riled Him

When E. A. Martin Became Curious About Landlord's Pay Envelope, Victim Bailed

Peace and good will reign to-day in the household of John Cook, No. 224 West Hunter street, but it is shy a "star boarder." E. A. Martin, who Cook told Recorder Hoyles Saturday, came into his house as a boarder and ended by wrecking his domestic happiness, even at length demanding to know what Cook did with his weekly pay envelope, had instructions never to show his face in the Cook domestic again.

Cook told Judge Hoyles that he had been forced to eat scraps while Mrs. Cook fed Martin upon stale and cheap, to watch her cut the buttons from his children's clothing and to see him steal from the pockets of the star boarder. All these things he bore because he could not help himself, he said, but when Martin so far surpassed the functions of the hand of the house as to demand a more intimate acquaintance with the Cook pay envelope—then he thought he had enough.

So he had Mrs. Cook and Martin arrested, and Judge Hoyles advised him to run Martin out of his home. So the "star boarder" made his exit in a storm of fiery denunciation and a flurry.

Clemson Grads Sing Alma Mater's Glory

Two Score Alumni Attend Banquet at University Club—Henry Tillman Spokes.

The glory of Clemson College, past and present, and the promise of Clemson's future was talked and sung by the Clemson alumni of Atlanta at their annual banquet at the University Club last night.

Henry Tillman, president of the Clemson Alumni Association of Atlanta, presided, and the evening was the most successful of the alumni's annual banquets.

The alumni were disappointed because of the enforced absence of prominent South Carolinians who were invited to speak. There were Senator Ben Tillman, W. M. Rags, president of Clemson College, and Dr. C. C. Clegg, who presided over the evening.

Senator Tillman's son, Henry Tillman, was present and spoke for the alumni. He was followed by Dr. C. C. Clegg, who presided over the evening.

The evening was the most successful of the alumni's annual banquets.

PUBLIC SCHOOL IMPROVEMENTS AWAIT BUDGET

Agitation Against Conditions Unless at This Time. Declares Education Board Head.

That agitation against the conditions of Atlanta's schools is needless at present except to inform the general public, and that the Board of Education does not intend to take any important action until time for making up the new budget ever set forth in a statement by Walter H. Dole, president of the board, Saturday afternoon.

President Dole said that appropriations would be asked for a number of new grammar schools and that the Board would be especially anxious to adopt some plan for the building of modern high schools for both boys and girls.

He said he did not think any movement to call an election on a special school tax would amount for anything until the new budget was made up and the school officials saw just where they stood.

Rah! Rah!! Rah!!!

Three cheers for a keen appetite, perfect digestion, liver activity and bowel regularity. If you do not possess these, you should take

HOSTETTER'S STOMACH BITTERS

before meals. It helps Nature overcome all Stomach, Liver and Bowel Ills.

Though these bitters were carried over from former seasons, they are in perfect condition. Just 26 pieces in all in scarfs and muffs. Included are white fox, Persian lamb, caracul, monkey, wolf and angora. Former prices \$45, \$10 to \$20. Choice, \$2.98.

Misses' & Children's Raincoats

We have sold hundreds of these coats at \$2.98; we'll sell these in a jiffy at \$1.98. Tan or gray, mackintosh or fabric, with plaid backs. Mannish tailored styles, with side pockets, storm collars and belt sleeves. Full length. All sizes, from a child of 6 up to measure 44.

All Silk Messaline Petticoats at

All silk messaline with accordion pleated flounce. Kelly green, Nell rose, black and navy. All sizes at start of sale.

COLUMBUS FOES OF COMMISSION PLAN OPEN WAR

Full Administration City Ticket
Announced—Mayor Chappell
Aids Reform Move.

COLUMBUS, Oct. 25.—(With a fight) ticket for Mayor and Aldermen in the field, the opponents of commission government have received notice that there is to be a fight.

For Mayor, John C. Cook, Alderman from First ward, has made no formal announcement. It is now understood that he will represent the present administration in the mayoralty contest against the opposition who succeeded Mr. Cook, William I. Worley, an attorney, has announced.

The mayor and his council members' terms expire January 1 and who has announced to succeed themselves, are H. Spencer, Jr., Second Ward; John H. Smith, Third Ward; James J. Fourth; Frank Joyce, Fifth; Robert Reid, Sixth; T. S. Roberts, Seventh and Mayor Pro Tem C. W. Miles, Eighth.

Just whether there will be an opposition ticket or not remains to be seen. Many who favor the new government advocates will concentrate their strength in carrying commissions.

men.

Mayor Chappell, who will not be candidate to succeed himself, is a strong advocate of commission government. It is expected that the greater part of his strength will follow his lead in the fight.

FORMER JUDGE IS MAYOR OF CHATTANOOGA SUBURB

CHATTANOOGA, Oct. 25.—Former Circuit Judge M. M. Allison was elected Mayor of Riverview, a Chattanooga suburb, being the first man to hold that position, the municipality was only established by the Legislature.

Frank Spurlock, another prominent lawyer, was elected Recorder.

COLUMBUS, Oct. 25.—C. R. Medley and John S. Jenkins, of the Columbus Poultry Association, spent several days this week in Macon, attending the Georgia State Fair, booking attractions for the poultry show and fair which will begin in Columbus November 17.

25-CENT DANDERINE

and luster, and try as you will you can not find a trace of dandruff or falling hair. But your real surprise will be after about two weeks when you will see new hair—fine as downy at first—yes—but really no hair—sprouting out all over your scalp—Dandierine, we believe—surely sure hair grower; destroyer of dandruff and cure for itchy scalp, a hair restorer. It will stop falling hair once.

If you want to prove how powerful and soft your hair really is, moisten a cloth with a little Dandierine and carefully draw it through your hair.

MRS. KING MUST BATTLE FOR LIFE TODAY; WIDOW BREAKS DOWN

Widow of Slain Farmer Breaks Down When She Hears the Verdict Against the Man With Whom She Is Charged With Plotting.

ATLANTA, Oct. 25.—With Nick Wilburn condemned to die December 12 for the murder of his employer, James King, a wealthy Iowa County farmer, interest in Middle Georgia's famous murder case shifted today to the wife, Mrs. Katherine King, who will be placed on trial before Judge I. B. Park Monday morning, charged with complicity in the crime.

It is thought that the trial of Mrs. King will attract more attention than that of Wilburn, owing to the fact that she is a woman and the trial will be the first ever held in Georgia in which a white woman is accused of murder.

Mrs. King steadfastly maintains innocence of any part in the death of her husband, and is confident that she will be acquitted, despite the confession of Wilburn that she told him to kill King.

Mrs. King's trial is not expected to begin until Monday. Her leading counsel, D. McNell, announced last Saturday afternoon that few witnesses will testify in her behalf, but that there will be many important testimonies.

Widow to Tell Story.

I propose now to put Mrs. King on the stand and let her tell the jury the truth and the whole truth about the case," said Mr. McNell. "I do believe there is a man in Georgia who would convict her if he believes her story, and we are prepared to support her statements by the testimony of other witnesses."

Mrs. King, though she has retained courage and good spirits during a week of Wilburn's trial, broke down and cried when she heard this statement.

"I just can't think what it means," she said.

She refused to see anyone, and sobbed herself to sleep in her cell. Several hours later and held a long conference with her attorney, the nature of which was not divulged.

Mrs. King has been a prisoner in the Jones County jail since her arrest last December. She has issued several statements regarding Wilburn and branding his statements as false. She declares that Wilburn alone is responsible for the crime, and insists that she became intimate with him only because he exerted a strange power over her and forced her to do his bidding against her will.

Fight to Save Wilburn.

Declaring that Wilburn would never go to the gallows unless he was accompanied by Mrs. King, Attorney J. M. Cooper has already started his battle to save his client from the hangman's noose.

A motion for a new trial has been set for a hearing before Judge Park on December 5, and if the motion is refused, Mr. Cooper will carry his fight to the Supreme Court, and perhaps ultimately to the U. S. Commission and the Governor. Mr. Cooper stated that in arguing the motion for a new trial he will contend that Wilburn was convicted on circumstantial evidence, and that the reason should not suffer the death penalty.

Wilburn has been taken to the county jail at Macon, where he has been kept since last December for fear of mob violence. He probably will be brought back here next week to testify against Mrs. King.

Rich Widow's Suit Delayed Second Time

Illness of Mrs. Hannah S. Whitlin, Attorney Prevents Trial of Francis Greene.

SAVANNAH, Oct. 25.—When a jury in the Superior Court in session here this week found Captain Thompson, a negro, guilty of the murder of Bill Daniels, another negro, Judge Thomas declared that if there was a pistol-hunting warrant for the county three-fourths of the trouble would be presented, as pistols were responsible for most of the crimes committed. The Thompson jury recommended mercy. The prisoner will get a life sentence.

Readers recall a white man on trial for killing a negro in the Boston neighborhood some months ago. He was found not guilty. The killing was done some time ago, but he was being a fugitive several months, gave himself up a few days ago, and was put on trial. The jury found it a case of justifiable homicide.

Pistol-Hunter Urged As Crime Preventer

Judge Thomas Suggests County Warden to Search for Gun-Toters.

THOMASVILLE, Oct. 25.—When a jury in the Superior Court in session here this week found Captain Thompson, a negro, guilty of the murder of Bill Daniels, another negro, Judge Thomas declared that if there was a pistol-hunting warrant for the county three-fourths of the trouble would be presented, as pistols were responsible for most of the crimes committed. The Thompson jury recommended mercy. The prisoner will get a life sentence.

\$10,000 AVAILABLE FOR WORK ON SATILLA RIVER

WAYCROSS, Oct. 25.—Advices were received here today that a \$10,000 appropriation for improving the Satilla River from Waycross to Brunswick has been made available. The appropriation is available, and Government engineers will come here soon to start the work. It is proposed to dredge the river and remove all obstructions. Waycross people will operate a large line from Waycross to Brunswick as soon as the improvement work is completed. This securing reduced freight rates.

CLUB SHIPMENTS LIMITED TO ONE GALLON

CHATTANOOGA, Oct. 25.—J. J. Lynch, as counsel for the Cincinnati Southern Railway, has advised the officials not to accept any more liquor shipments for social clubs here except under the same restrictions as applying to private individuals. Under the law not more than one gallon may be delivered to any one person.

2 Under Arrest as Pickpocket Suspects

Dan Walraven, Former Alderman, Makes Capture at Virginia-Georgia Football Game.

Two alleged pickpockets, Dan Walraven and W. S. Beasley, who gave their homes as Chicago, are in the custody of the police, and a golf watch has been returned to the owner as a result of arrests made at the ball game during the Georgia-Virginia game Saturday afternoon.

The police are looking for a third party, who robbed P. L. Wooten, of No. 215 Moreland avenue, of a golf watch valued at \$100.

Baumgardner and Seale, were nabbed through the efforts of Dan Walraven, former member of the City Council. Mr. Walraven, it is said, saw Baumgardner take the watch. He nabbed him and held him until the officers arrived. The watch was found on Seale.

Cleveland Folk Hear Message of Militant

Mrs. Pankhurst, Introduced by Lieutenant Governor, Urges Interest in Cause.

CLEVELAND, Oct. 25.—Mrs. Emmeline Pankhurst, the British militant, to-night spoke at an audience which taxed the capacity of Gray's Auditorium. Although Cleveland suffragists refused to take part in her arrangements for the meeting, she crowded into the hall to listen to her address on "The Humanitarian Aspect of Suffrage."

December 1st, who was here to-day, was asked to introduce the famous speaker, but he was forced to return to Columbus early to-night and was unable to attend. Lieutenant Governor W. A. Greenlund introduced her to the Governor's request.

Mrs. Pankhurst in her speech did not touch upon the militant features of the suffrage movement, but urged American women to take interest in the cause, declaring that suffrage means better homes and better treatment of the employed women.

ATLANTA INSTITUTE OF MUSIC AND ORATORY

Music, Art and Oratory in all branches. Special courses in Piano, Violin, Viola, Organ, Ensemble, Harmony, Orchestration, Composition, Art, Oratory, Physical Culture, Dramatic Art, Literature, etc. Unsurpassed faculty of successful teachers, of proven ability only. Cloud-Stanford's Reorganization Sale

BEGINS MONDAY MORNING AT NINE O'CLOCK
ENTIRE STOCK OF NEW FALL AND WINTER CLOTHING, HATS AND FURNISHINGS
TO BE SOLD IMMEDIATELY AT GREATLY REDUCED PRICES

For more than five years the Cloud-Stanford Co. have conducted the most exclusive establishment for men's high grade wearing apparel in Atlanta.

The business has grown wonderfully--in fact, it has outgrown itself--and now the time has come when expansion is necessary--compulsory, if you please.

To cope with the new conditions and prepare for these changes it is necessary for us to convert the entire stock into cash immediately.

To do this quickly requires drastic price-cutting, and notwithstanding the inevitable loss of profits, we have named prices so very low on Clothing, Hats and Furnishings as to make this sale irresistible to you.

Wearables of the character and quality such as we offer seldom find an outlet in this manner, and those who avail themselves of this opportunity secure the cream of men's finery at prices much lower than you'll pay ordinarily for commonplace wearables.

HAIR TURNING GRAY OR FALLING?

JUST MIX SAGE TEA AND SULPHUR

It's Grandmother's Recipe for Dandruff and Restoring Color to Hair.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and luster to the hair when faded, streaked or gray; also cures dandruff, itching scalp and stops falling hair. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome.

Nowadays skilled chemists do this better than ourselves. By asking at any drug store for the famous-to-day product--called "Weyth's Sage and Sulphur Hair Remedy"--you will get a large bottle for about 50 cents.

AMERICAN GIRL BRAVES JUNGLE OF SALVADOR

MERCHANTS and MANUFACTURERS' DIRECTORY

TEN-CENT STORE IS EXCEEDINGLY RARE IN EUROPE

C. W. McClure Tells of Inspection of Toy Districts in Germany.

TEN-CENT STORES are almost unknown in Europe outside the British Isles, reports C. W. McClure, the well-known ten-cent store man who is back from a trip which included business with pleasure. Mr. McClure was a passenger on the steamer and witnessed the burning of the United States in England. The ten-cent store is represented in the three-pence and shilling stores, whose prices are 10 to 15 cents in American money. These stores are operated in a chain which extends to Ireland and Scotland. There is also a "penny bazaar" system which places the very lowest priced articles at the disposal of the public. In Germany the five and ten cent store has not been developed as yet.

McClure's store has been buying its wares for years at Trenton, N. J., but since the passage of the bill the concern's trade will be done with houses in Liverpool. Mr. McClure placed an order for the same goods, but will not reduce the price.

He is very much interested in the country in southern districts. Mr. McClure is a native of the United States and has been in the business for many years.

Broad Street as a Retail District Plaza Plan Helps Local Business

The illustration shows type of improvement that has already started on South Broad street. It is the costly addition to the Whitehall street store of the Davison-Paxon-Stokes Company. S. H. Kress & Co. are erecting a \$40,000 addition to their store in the same block. The Calhoun will build an office building at Broad and Alabama, and there are other costly improvements under way.

Buildings Erected and Planned Will Work Great Change—Whitehall Congestion Puts Problem Up to Managers in Shopping Zone.

WHITEHALL street has grown to the bursting point, and an extension of the city's retail shopping district is absolutely necessary. This is the opinion of store officials who have been putting up many more with badly cramped quarters. In fact, extensions have already started, and if present plans are carried out, Broad street will be better five years from now than the most daring southerner dares predict.

Among improvements which show the trend westward from Whitehall are the handsome new addition of the Davison-Paxon-Stokes Company, shown in the illustration, and the addition of the S. H. Kress Company in the rear of No. 34 Whitehall. The future holds the office building which the Calhoun will erect at the northeast corner of Broad and West Alabama streets, and there are other extensions which will be made to transform Broad street into a lively retail shopping center.

When the Blackley plan is realized and the south and north sides of the city are connected, the store men think will be almost as good as Whitehall itself. Fourth street, now a thoroughly respectable thoroughfare, is further westward and is thriving.

"We never would have put a big store on South Broad if we had not thought of the future of this street," declared H. W. Smith, manager of the Davison-Paxon-Stokes Company. The Whitehall business was so busy that an extension was necessary. When the congested area of the local shopping district is considered, it is no wonder that the plan is being realized, and Broad street will come into its own.

H. W. Smith, manager of the Kress store at No. 34 Whitehall, declared that a block off Whitehall was better than half a mile to the north, according to the calculation of the shopper, and that his firm expected eventually almost as good business on Broad street as on Whitehall.

GOOD BILL MAY MILLIONS; GROCERIES LEAD

New York's Expenditures \$645,000,000—Retail Beef a Considerable Item With Buyers.

NEW YORK, Oct. 25.—An analysis of the annual expenditures, receipts of retailers and distributors of foodstuffs to the 5,000,000 people within the limits of Greater New York and an adjacent population of 2,000,000 within 200 miles of New York City, prepared by the Industrial Bureau of the Merchants' Association, declares that the city's yearly food bill, estimated on the basis of retail values, is approximately \$645,000,000.

Of this total, the bureau says, the grocery wholesalers do a combined business of not less than \$300,000,000 within a radius of 200 miles of this city. The list of values of the individual foodstuffs, however, is headed by beef and other meat food products, with an estimated annual quantity of 100,000,000 pounds, valued at 25 cents per pound, or a total valuation for the year 1912 of \$25,000,000.

In the order of importance in annual retail values is milk, estimated at \$20,000,000; eggs, \$15,000,000; butter, \$14,000,000; and other dairy products, valued at \$13,000,000. Poultry is valued at \$12,000,000; potatoes, \$11,000,000; and other vegetables, \$10,000,000. Canned goods are valued at \$9,000,000; and other foodstuffs, \$8,000,000.

An accompanying resume on the distribution methods which are in operation for a city of 5,000,000 people, the industrial bureau says, follows: (1) wholesale grocers, brokers, commission merchants, manufacturers' agents who deal in various kinds of grocery supplies; (2) dealers in meats and provisions, some of whom are local firms, although a large proportion of this branch is handled by the local representatives of the large packing houses; (3) dealers in fresh vegetables and other produce; (4) country produce such as butter, cheese, and eggs; (5) dealers who form a very large trade in fresh fruit, such as apples, pears, and grapes; (6) confectioners, and a considerable number of dealers in miscellaneous grocery specialties.

LARGE INCREASE IN CLOVER SALES

Concern Sells 2,700 Pounds in 1913, and 100 in 1912—Back to Farm Trend.

People are evidently getting back to the farm faster than heretofore, according to officials of the McClure Bros. Seed Store. Twenty times as much clover, alfalfa, vetches and grain—wheat, rye, oats, barley and corn—has been sold in the last year as in the year 1912.

The increase is attributed to the work which newspapers and trade journals have done in the past year to get back to the farm and farm products.

Water gardens are now being cultivated extensively.

Everything in the seed store line is selling well, and the seed store is not in a bad way by the time the McClure Bros. seed store is over.

Gloomy Outlook for Consumer in Season's Foodstuff Prices; Holiday Dinner More Costly

Apples and Grapefruit Higher, While Poultry Marks Time—Things to Cost More Generally. Produce Man Defends His Clan.

LITTLE comfort for the consumer in the quest of lower prices for the necessities of life is seen by M. D. Thompson, of the Williams-Thompson Company, Broad street commission merchants. Prices for things that go on the poor man's table will be a little higher than they were last year, except crops in certain lines and an unusually heavy demand for them caused as the cause.

The crop of eating apples is 25 to 30 per cent short and the grapefruit crop is reduced to 50 per cent, causing generally higher prices. Apples are \$5 a barrel to the retailer and \$5 to \$10 a pack to the consumer. The outlook for the season is not bright. A bumper crop is reported, and Mr. Thompson says it will enable the commission men to save. If oranges are eaten plentifully rather than apples and grapefruit, the laboring man can get the benefit, unless he can switch to apples and grapefruit, which have gone down in the meantime, and reap the benefit at both ends.

Prices Up, Then Down. At least, that is the economics of it, whether the science work out or not. Mr. Thompson asserts that price scales shift like bags of sand in the hall of a rocking ship, now they are on this side and now on the other, first up and then down, depending on the movement of the market.

Produce men don't regulate these things, according to Mr. Thompson. You can't run a "trust" in a market of perishable goods. Listen.

"The public has a very erroneous idea of the commission merchant's position in handling produce. We are cold storage, but only to save our goods until the market and the consumer have priced. It is to the advantage of the dealer to get his goods out of the hands as quickly as possible, and to put prices on them that will move them. Otherwise, we have cartloads of spoiled grapes, cranberries, lettuce, celery, poultry and the like."

Demand Can't Be Estimated. "Produce men can estimate the size of crops, but they can never estimate what the demand is going to be. The market is a very variable thing. The rich man's table is very different from the poor man's table. To reduce the margin between what a man makes and what he requires to give him a fair living is largely the work of the dealer. The more people who live on the farm and who produce something out of the ground, the more people living foodstuffs is what we need. In fact, prices lower are made it possible to get a good living and have a fair profit on the work."

There will probably be no change in the price of poultry. Turkeys are plentiful and cheap. Turkeys are 12 to 15 per cent. People holding poultry will probably be able to get ten times what Christ says, when the price is at lower prices. This will be true if the price is not forced down earlier than the fall. The price of many apples, and indications are that the market this year will not be broken."

LATEST PICTURE FRAME STYLES HARKING BACK TO OLDEN TIMES

The latest thing in picture frames harks back to the time of King Henry VIII and represents an increase in the demand for picture frames.

The increase in the demand for picture frames is due to the fact that the picture frame business is now being cultivated extensively.

Nearly \$2,000,000 Coming Through Convention Guests.

Twelve dollars per capita, or a minimum of \$1,170,764, is the estimate of Fred Houser of the amount of outside money that will be poured into Atlanta through convention guests who will attend various meetings here from the date until next spring.

Mr. Houser is secretary of the Atlanta Convention Bureau, and he made this estimate Saturday at his desk in the Empire Building. The average convention time is three days.

"This excludes railroad fare," declared Mr. Houser, "and is a conservative estimate. Since there will be 166,647 people at these conventions, the total of what they will spend is over a million. This estimate is our day. People staying longer than a day, as most will, will spend a great deal more. The size of the figures is enough to convince the Atlanta business man that it pays to encourage convention. There will be 25 more conventions this year, and it has been secured so far for 1914 up to April 3. The Convention Bureau is busy, and will report additional successes from time to time."

WILSON TALK IN MOBILE MAY BE CANAL DOCTRINE

President Expected to Outline America's Policy Regarding Foreign Nations Monday.

OTHER NOTABLES TO SPEAK

Secretaries Bryan and Daniels Will Deliver Addresses—Atlantic Fleet to Enter Bay.

MOBILE, Oct. 25.—Hundreds of delegates are here today for the opening Monday of the Southern Commercial Congress, the largest annual gathering of the business men of the South.

Important addresses upon the canal are scheduled for the convention, including one by President Wilson upon "The Panama Canal and the World Relations," which is expected to be a declaration of the administration's foreign policy with respect to the canal and the relations of American countries in the vicinity of the canal.

Recently the Southern Commercial Congress, in conjunction with the United States government, sent a commission abroad to investigate the canal project and to report on the merits of the canal project.

Ten Thousand Expected

More than ten thousand delegates are expected to attend the convention, which will be held at the Hotel Hamilton, a new hotel recently opened in Mobile.

The convention will be held from Monday to Wednesday, and will be the largest gathering of the business men of the South since the opening of the Panama Canal.

Among the speakers will be President Wilson, Secretary Bryan, Secretary Daniels, and other notable figures. The Atlantic fleet will also enter the bay during the convention.

The convention will open Monday morning with an address of welcome by William H. Ambrecht, president of the Mobile Chamber of Commerce, followed by addresses by Mayor Harrison and other officials.

Wilson Speaks Monday. President Wilson will speak at the opening of the convention on Monday morning.

At the evening session on Monday President Wilson will speak, followed by Secretary Bryan and Secretary Daniels.

Alabama Patronage Tangle Up to Wilson. President Wilson is expected to settle the Alabama patronage tangle up to him.

MONTEREY, Oct. 25.—The opening of the Panama Canal is expected to be a declaration of the administration's foreign policy with respect to the canal and the relations of American countries in the vicinity of the canal.

SAVANNAH BAR PLANS TO DOOM PEACE JUSTICES

Face Necessity of Repealing the "Joker" in Law—One Official Indicted on Eleven Counts.

SAVANNAH, Oct. 25.—The indictment on eleven charges of malfeasance in office of Justice of the Peace H. R. Vane, on the day of the hearing of the case of the Association for the Advancement of the Negro, and a municipal court judge, was a blow to the movement for the repeal of the "joker" in the constitution which would give the counties this right. When the bill was passed the words "with the exception of Chatham County" were inserted. A few years ago in this the Legislature gave the magistrates in this county the right to charge 10 per cent more in fees than in any other county, another "joker" that the bar has been endeavoring to get the new Representative to repeal.

Loss of \$250 Makes Chicken Theft Joke

Claimant of Roll Returns Biddies, Bill Owner Kells Money.

PITTSVILLE, PA., Oct. 25.—The chicken owner of George (chicken) in the town of Pittsville, Pa., who lost six ducks recently, while the unfortunate (chicken) found a pocket full of money in the chicken's nest, and a tax receipt which was destroyed by the man who took the chicken. The owner of the tax receipt was notified of the find and he at once claimed the money and returned the chickens, declaring he took them only as a joke. The owner of the tax receipt was notified of the find and he at once claimed the money and returned the chickens, declaring he took them only as a joke.

New Deep Sea Fish Carries 53 Lights

Specimen Looks Like Lighted Boat. Others Have Black Skins Like Velvet.

SYDNEY, Oct. 25.—A new species of fish having the appearance of an electrically lighted ferryboat has been caught in the Australian waters off the Tasmanian coast. This fish, with 53 brilliant lights on either side, has been named the "light fish" and will be placed in the collection of the Sydney Museum. It is said that both men will bring home, the fish carrying like a boat with light, and the night fishing for its money.

Judge Holds Boy Has Right to Steal Melon

Court Rebukes Man From Patch Fruit Was Missing—Remembered Own Youth.

WATKINS, WIS., Oct. 25.—(State of Wisconsin vs. Edward Michael) Judge John H. Bradley, on County Court, heard today a case which brought back memories of his own youth. The case was a charge of larceny against a boy named Michael. The court, after hearing the evidence, held that the boy had a right to steal the melon, and rebuked the man who had brought the charge.

2 Mountain Sheep Are Captured Alive

Rangers Catch Worst of Animals. Two Weeks Old, but Can Outrun Horse.

Two mountain sheep, the worst of animals, were captured alive by rangers. The sheep were two weeks old, but could outrun a horse. The rangers were hunting for them for several weeks.

Blow 'Twixt Lamp And Radiator Fatal

This is a Sample of Causes of Death Registered by Wisconsin Doctors.

MILWAUKEE, WIS., Oct. 25.—Many deaths are caused annually by the State Board of Health in making the distribution of diseases can be traced to causes. These are: 1. Blows from lamps. 2. Blows from radiators. 3. Blows from stoves. 4. Blows from furnaces. 5. Blows from boilers. 6. Blows from engines. 7. Blows from machinery. 8. Blows from tools. 9. Blows from weapons. 10. Blows from other causes.

Inventor Strolls 100 Feet Under Water

Talks by Telephone With Man on Shore—Promises to Dive 600 Feet.

SAN FRANCISCO, Oct. 25.—At least one man in San Francisco knows what it is like to be under water. He is the inventor of a new diving suit, and he has just strolled 100 feet under water. He is now promising to dive 600 feet.

Girls to Study for 7 Years in Open Air

Fifteen Rosy-Cheeked Children at Bryn Mawr Expected to Develop Into Superwomen.

PHILADELPHIA, Oct. 25.—Fifteen rosy-cheeked girls, ranging in age from 8 to 10 years, have begun at Bryn Mawr College a course of open-air physical and mental training. The girls are expected to develop into superwomen.

City Planning to Run Own Phone System

Water and Electric Light Plants Already Operated Successfully by Ottawa, Kan.

OTTAWA, KAN., Oct. 25.—Ottawa may be the first city in Kansas to run its own telephone system. The city is planning to run its own phone system, and it is already operating successfully.

Widow Gets \$10,000 For Slain Husband

Four-Year Suit Against Banker for Man Shot as Burglar. Costs \$20,000.

DETROIT, MICH., Oct. 25.—The widow of a slain husband has just received \$10,000 for her husband's death. She had been suing the banker who shot her husband for four years.

Marriage Broker Sues Pastor for Fee

Defendant Says Wife Was Old Sweet-Heart, and He Could Have Won Her Unmarried.

BENTON HARBOR, MICH., Oct. 25.—A marriage broker has sued a pastor for a fee. The broker claims that the pastor married him to an old sweet-heart, and that he could have won her if he had not married her.

Dew Gown Worn by Girl in Washington

General Ordway's Granddaughter Has Faded Gown of Cotton and Satin Studied Skill.

WASHINGTON, Oct. 25.—A girl in Washington has worn a dew gown. The gown was made of cotton and satin, and it was studied skillfully.

COME TO THE BIG STORE MONDAY

It is the largest retail furniture store in the entire South. In it is assembled the greatest home-furnishing values that have ever been shown in any Atlanta store. Here you can find the pieces you want to fill out any vacant space in your home—or to furnish a home complete. Come to our store to-morrow—come for the purpose of familiarizing yourself with this magnificent stock; our reasonable prices and the easy terms on which we sell dependable home-furnishings.

Sellers Cabinet Special

This Sellers special has a separate, sanitary, spacious and convenient place for everything needed in a modern kitchen. The four bin and sugar compartment are absolutely ant and bug proof. It is attractive, strongly made and nicely finished. Sold on our special terms of \$2.50 cash, the balance \$1.00 per week, and the price is only \$28.50.

RUGS For Any Size Room For Any Home

Rich Oriental reproductions and florals in any size, color or weave in rugs and art squares. Our rugs are displayed on the most modern rug rack. No trouble to show you. Come and see for yourself. See our handsome 9x12 Oriental art square, which we are featuring to-morrow for the very special price of \$12.50. Also our 12x18 rug, which we are featuring to-morrow for the very special price of \$18.00.

Men, Buy This Chiffonrobe

In it you will have a space for everything from a collar button to an overcoat. Why have your clothing scattered all over your room longer, when you can buy this great value at such a remarkably low price and on such easy terms? We can furnish it in oak, mahogany or mahogany finish. Take your choice for \$1.00 per week, and the price is only \$21.50.

This Buck's Range

Is made throughout of best materials, has duplex grate, push tray doors, burners and wood stands on seventeenth personal guarantee. It is artistically trimmed with unsurpassable nickel. You want and need a good range. You can't buy any better than a Buck's, \$22.50 cash, \$1.00 per week, and our special price on this six-hole range, put up in your kitchen, is only \$40.00.

You Should Buy This Suite Now

You should buy it because it is the greatest bedroom suite value in Atlanta. It is now displayed in our Whitehall street window. The dresser and washstand are heavy, colonial patterns and you may take a brass, gold or heavy steel bed to complete the suite. COAST TO HAVE BIG ATHLETIC FAIR IN 1915

SAN FRANCISCO, Oct. 25.—James P. Sullivan, athletic director of the Panama-Pacific International Exposition, who recently attended the international Federation of the athletic governing bodies of the world at Bern, has extended an invitation to those bodies assembled to participate in the contests to be held in San Francisco in 1915.

The toughest tennis from many foreign countries have already given assurances that they will take part. The Panama-Pacific International Exposition sports tournament will be the largest of the kind ever held in this city. It will include almost every variety of athletics known to the civilized world, athletes from every one of the twenty-seven nations that have already agreed to officially participate in the Exposition will take part in the sports.

The program for the International Sports have been prepared tentatively after a conference with the different federations in the month of January. Among the events already scheduled are the international championships which will take place in the months of February, March and April of 1935 in the motor boat races. In November and December of that year. Among the aquatic events planned are the college rowing championships and the championships of the National Association of Amateur Athletes. The motor boat races will be held in San Francisco harbor and thousands of spectators will gather in the Embarcadero before the exposition.

World's Greatest Gymnasts.

The German turners will have a week for their mass work and exhibition at the St. Louis Exposition. The strongest gymnastic team that Germany can produce will come here to perform a series of the most dramatic gymnastics.

Another week will be given to football, hurling, dancing, and athletics.

Special attention is to be given to the development of an invitation having been extended to the National Amateur Association of America to send a team of the best players and it is expected that every city in United States that maintains a football team will send a team of boys to demonstrate the type of work **done for the boys** in their own country.

Dr. Bremer William J. Lee, of the New York playgrounds, promises to ask the presence of Albert Smith, the president of the National Amateur Association, for the expenses of 200 members to the exposition. The latter would be the national playground association's trophy, which they earned at the St. Louis Exposition. A week will be set aside during 1915

Olympic Medal Offered.

The chief international event of the year is the 1956 Olympiad for which the Olympic committee has offered an Olympic medal for the first time. The four placed men at the Olympic games in Sweden last summer, the United States, Sweden, Finland and Grouhagen, will take part in a great event.

Under the new army officials are doing special efforts to win the coveted trophy, and several crack teams are being trained.

At the first time soccer football receive recognition at an American international sports exposition will be under the control of the Federation Internationale Football Association.

Since the controlling body of football throughout the world, it is stated to be no less an authority in the United States. It is dependent on the federation, that from the teams which will participate in the exposition will be teams selected to represent America in Berlin.

Tryouts To Be Held.
"Tryouts will be held for all sections of the country for the selection of teams to represent the various forms of United States army in the military competition to be held in London in the summer of 1924 for that purpose. A navy week will be staged according to the time of the arrival of the battleships of the world in the San Francisco harbor, and the opening of the Panama Canal. Competitions will be conducted between members of foreign and American navies. The presence of battleships in the harbor, being the exhibition of the navy, will add great brilliancy to the naval events."

invitation is being extended to the following:

The first frame of the world's record is being played at the exposition stadium, where the winner of the exhibition game will be crowned champion of the winners in the different divisions.

An invitation will also be extended to the major league baseball clubs to use the baseball field as a million ground for spring training.

A special invitation is extended to the Army and Navy to try their athletes in the exhibition game.

Some of the events of national and international importance have already been scheduled for the great 1913 exposition. The following are the subject, as to dates and regulations to the receiving of the official program, the arrival of the exhibitors that are interested.

Barry's Mates Invited To His Celebration

QUINCY, Oct. 16. (Manager of the) of the champion and Frank Barker, Police Commissioner of Chicago, who were arrested, have been seen visiting the city of Chicago. The manager of the reception to Jack Barker, who will be held at the Barker's residence, is being held at the Barker's residence.

One Sunday last year Bert Humphries, pitching for the Reds, cracked a rib while trying to throw a ball into the box and did not put on his uniform to play the next day.

"Any time a pitcher has something wrong with his elbow it is considered a serious injury," says a baseball expert. "He uses an odd motion in delivering a ball, and the elbow is the joint in which his elbow plays a prominent part."

"It looks like Bert is through for good," says another expert. "He probably will never pitch another big league ball game."

But the experts tell for sure what the chances were for Humphries to pitch again. "I don't think he was drawing a blank when he took Humphries as a player," says one expert. "Think of the Reds."

The averages for the 1913 season, just passed, showed Humphries leading the pitchers of the National League. He won 20 games and lost only four. Humph was the real star of the season, and he was the best pitcher on account of his fine work that the Cubs finished in third place. He is

FRANK CHANON, manager-outlet of the St. Louis Cardinals, was the club's last fall by President Murphy. Chanon, 46, was born in St. Louis from the leadership of the St. Louis Browns (his fall by President Herlihy). Chanon was the first to be named to the position of manager of the Sox, handled the grown spin during the mid-1960s and last season by the mid-1960s.

Harry Levin. Elevated to the managerial position of the St. Louis Cardinals by President Murphy in the first fall of 1967, he was named to the position of President Murphy during the mid-1960s of the season of 1972.

—*St. Louis Post-Dispatch* New York

NEW YORK, Oct. 25. — The American and National leagues have in sight a joint fund of more than \$2,500,000 to help the war effort and to help the war movement. The threat of the Federal League to war on the major organizations has been met by the American and national league magnates to declare that they will make a joint fund to help the league and that they long had been preparing for a war.

For the last ten years each club has been allowed 10 per cent of its net earnings and this fund was used for the relief of the war and the leagues, under supervision of the National League, to use in case of emergency.

In addition to this fund the National League has received \$100,000 of the amount left of the \$150,000 which it has received from the war games it has conducted.

Yankees Real Jinx

And This the Case

Yankees—for a while, two years or so back, and mighty glad to get on under.

* * *

ALL these men were star ball players, in fact we doubt if you could name five higher class first

NEW YORK, Oct. 21—Foreigned "Muggs" Mettwa, manager of the Negro National League, looking forward to the National League struggle of 1934, has recruited five recruits who are said to offer more than usual promise.

They are Elmer Johnson, catcher, secured by draft from the Omaha Nebraska club; Ray Lister, pitcher, also secured by draft from the Omaha club; Wayne Rife, pitcher, last year of the Wilmington, Del., club; Harrison, center fielder, from the New York Yankees; and Edward Merritt, outfielder, from Kansas City, Tenn.

PRINCETON SEEKS A KICKER.

PRINCETON, N. J., Oct. 25.—Given Princeton's first-class kicker and the Tigers will be perfectly willing to do without him. Yale and Harvard for the past few years have been the main rivals of the school as well as being its chief financial supporters. But since Princeton is developing it may prove difficult to get the victory.

TEARS, IDLE TEARS

CONTINUOUS PERFORMANCE.

I read the sporting page each morning
And have a heavy sigh.
A tale that makes me feel forlorn
Forever merits my eye.
I try to duck without avail,

... before the battle started
 and Man Stagg was full of war,
 fighting like a soul departed
 in the regions down below.
 ... and down the field he scended
 Like a man in bitter pain;
 But before the battle ended—
 That is something else again.

Zulu prince touring in our midst says American football is too rough for his subjects. As a result, the natives of Zululand will continue the ancient pastime of shooting craps.

In spite of the world tour baseball never will become popular in Russia, according to a Zulu prince. He says the results that would be his in the game are too small.

It is time. Mr. Palmer may foil him in his quest for a new sport, but he is quitting the game. —

A big league buyer undergoes a terrible mental strain. For instance, to find a player who is perfectly ready to sell, wants to be an umpire.

Clark Griffith avers that his pitching staff will be greatly improved next year, leading one to suspect that Walter Johnson will be the only one to stay.

In a way, the Giants are far luckier than the Athletics. As a result of winning the world's series, the Athletics had to play its first through a banquet.

And he just happened to meet Fred Lacey, who was one member of the 1906 Sox, now plays with B-movie Har-

Since American League Entered Field, Ten Years Ago, It Has Won Six World's Series

[illegible][illegible]

ONE HUNDRED AND ONE OF the 129 games have been won by the stars. The other 28 have been lost. Twenty-eight have gone to the losers. Fifteen times a National League club has won the flag; once the old American League club has won it. Fifteen times it has flouted over an American League park. In fact, the American League clubs have been its keeper as often as its challenger. The American and National League clubs

It begins to look as if neither Holden nor Whiteman will be retained as regular outfielders by Chance next year, says a New York writer.

Holden probably will be farmed out to Jersey City, where he will have an opportunity to learn something about the running of an outfield from the likes of nothing at present. Whiteman, it seems, can not hit curve pitching and is not up-to-date as an outfielder. Ottobee is a fixture, and Chance thinks he will be a star hitter in 1914. Crew will be retained, also. Luther Cook, however, feeling need for bringing up before he can step along with the major league Dicks.

Daubert May Lead Dodgers Next Year

Opening Next Season

NEW YORK, Oct. 26 — Manager John M. Graw of the Giants, says he hopes the team will begin its season with a record of wins to presell plans, the magnates are big on the subject. Graw says he expects that April 10 would be a better date on the ground than the cold weather in New York is a hindrance to the team. The Giants will return from their trip to the World Series on March 1 and will begin the championship season begins on April 1. Strife will have only about three weeks to get the team ready.

AMERICANS FIND BRITISH RACING HARD TO BEAT

Belmont Alone Had Much Luck on English Turf This Year.

Paddock Gossip.

By E. G. R. Fitzhugh.

LONDON, Oct. 23.—American horse racing has been at its low ebb on the English turf just now, and it is not at all likely that it will be any better in the near future. The only American to finish the year high up in the list of winners was Harry Payne Whitney, who has won the 4-year-old colts' stakes, the 4-year-old fillies' stakes, and the 4-year-old fillies' stakes. He has also won the 4-year-old colts' stakes, the 4-year-old fillies' stakes, and the 4-year-old fillies' stakes.

When Mr. Whitney's horse, Silver Fox, won the 4-year-old colts' stakes, it was a great feat. He has also won the 4-year-old fillies' stakes, and the 4-year-old fillies' stakes. He has also won the 4-year-old colts' stakes, the 4-year-old fillies' stakes, and the 4-year-old fillies' stakes.

Double Squeeze Not a New Play Elberfeld Worked It With Yanks

SHORTELTY before the American League closed the season, the Athletics pulled off a double squeeze in one of the games, forcing Philadelphia scoring on an infield out.

The play caused some comment at the time, and since then it has been called the "double squeeze." When Clark Griffith, president of the Athletics, had charge of the New York Americans he had the more hunting with a man on third base and a man on first base.

The New York team was successful with this play and used it frequently. It was called the "double squeeze." When Clark Griffith, president of the Athletics, had charge of the New York Americans he had the more hunting with a man on third base and a man on first base.

The New York team was successful with this play and used it frequently. It was called the "double squeeze." When Clark Griffith, president of the Athletics, had charge of the New York Americans he had the more hunting with a man on third base and a man on first base.

He would start in with his pitch the pitcher would leave the ball at the head of the batsman or so far away that the batter was unable to bunt. This broke up the "squeeze" and men were not allowed to play much more.

The play was not worked in the Southern League a dozen times this season. There has been nothing new in the playing end of the game for the last two decades, with the exception of the pitcher, and the claim has been made that Bobby Matthews, the Philadelphia pitcher, had the double squeeze worked out.

The "double" has been more of a detriment than an improvement to baseball. In the first place, it is more of a line disorganizing, according to the manner that the pitcher comes in throwing it. It delays the game and, as a general rule, when there are two out, the pitcher is not allowed to pitch more than two hours.

KID ELBERFELD was playing on the New York team at that time and pulled the "double squeeze" with him.

When Mr. Whitney's horse, Silver Fox, won the 4-year-old colts' stakes, it was a great feat. He has also won the 4-year-old fillies' stakes, and the 4-year-old fillies' stakes. He has also won the 4-year-old colts' stakes, the 4-year-old fillies' stakes, and the 4-year-old fillies' stakes.

Bob McWhorter Off on a Long Broken Field Run

The captain of the Georgia eleven is expected to play better this year than he did last, as he is in much better condition.

AT the outset of the season it was noticed that Princeton had a line of championship caliber and the line improved steadily as the season wore on. For years past the Princeton line has been as good as any in the East.

With the line taken care of, the coaches turned their attention to the backfield, and the season went on. As the season wore on, the Princeton line was "some" line, and the coaches turned their attention to the backfield, and the season went on.

THE great "Hobbs" Baker was tried out as a punter. New Haven has a knack of shooting the ball pretty far over the goal line. He is 30 to 35 yards high, but when it came to kicking, Hobbs couldn't send the pigskin far more than 10 or 15 yards. He simply wasn't there.

Then came the discovery of a punter named Oles, who had an idea of kicking the ball on a high trajectory. Mr. Oles tried it, and he kicked the ball on a high trajectory. He kicked the ball on a high trajectory, and he kicked the ball on a high trajectory.

ST. LOUIS, MO., Oct. 23.—Rugby players, who were in the list of players, were in the list of players. They were in the list of players, and they were in the list of players.

ST. LOUIS, MO., Oct. 23.—Rugby players, who were in the list of players, were in the list of players. They were in the list of players, and they were in the list of players.

Optimism Is Tigers' Chief Asset Expect to Beat Harvard and Yale

By Francis Baker.

NEW YORK, Oct. 23.—What is Princeton going to do on the gridiron this fall? Head Coach Anderson says that the Tiger eleven has a better chance of defeating both Harvard and Yale than it has in several years. Of course, optimism is one of the chief assets of the Tigers.

They always were an optimistic lot, but this year their optimism carried them through the Yale game. Yale victory before the season was a full credit for the Princeton victory over the boys from New Haven.

Perhaps it isn't just to give Princeton full credit for the Princeton victory. It isn't just to give Princeton full credit for the Princeton victory. It isn't just to give Princeton full credit for the Princeton victory.

AT the outset of the season it was noticed that Princeton had a line of championship caliber and the line improved steadily as the season wore on. For years past the Princeton line has been as good as any in the East.

With the line taken care of, the coaches turned their attention to the backfield, and the season went on. As the season wore on, the Princeton line was "some" line, and the coaches turned their attention to the backfield, and the season went on.

GRIFF EXPECTS TEAM TO BE IN RACE NEXT YEAR

By Francis Baker.

NEW YORK, Oct. 23.—Clark Griffith has been tried out as a punter. He has been tried out as a punter, and he has been tried out as a punter. He has been tried out as a punter, and he has been tried out as a punter.

CLARK has also shown up well in the backfield, while Griffith has been tried out as a punter. He has been tried out as a punter, and he has been tried out as a punter. He has been tried out as a punter, and he has been tried out as a punter.

THE list of coaches now includes the names of some of Princeton's past stars. Griffith has been tried out as a punter. He has been tried out as a punter, and he has been tried out as a punter. He has been tried out as a punter, and he has been tried out as a punter.

AT the outset of the season it was noticed that Princeton had a line of championship caliber and the line improved steadily as the season wore on. For years past the Princeton line has been as good as any in the East.

With the line taken care of, the coaches turned their attention to the backfield, and the season went on. As the season wore on, the Princeton line was "some" line, and the coaches turned their attention to the backfield, and the season went on.

THE great "Hobbs" Baker was tried out as a punter. New Haven has a knack of shooting the ball pretty far over the goal line. He is 30 to 35 yards high, but when it came to kicking, Hobbs couldn't send the pigskin far more than 10 or 15 yards. He simply wasn't there.

Then came the discovery of a punter named Oles, who had an idea of kicking the ball on a high trajectory. Mr. Oles tried it, and he kicked the ball on a high trajectory. He kicked the ball on a high trajectory, and he kicked the ball on a high trajectory.

ST. LOUIS, MO., Oct. 23.—Rugby players, who were in the list of players, were in the list of players. They were in the list of players, and they were in the list of players.

McLean Satisfied; Larry Got His Share

By Francis Baker.

BOSTON, Oct. 23.—Larry McLean, who caught for the Giants in the only game they won in the recent world's series, denied the reports that he was dissatisfied with his treatment by the Giants in regard to the division of the world's series receipts. In a statement made today he said that he received a full share.

THE list of coaches now includes the names of some of Princeton's past stars. Griffith has been tried out as a punter. He has been tried out as a punter, and he has been tried out as a punter. He has been tried out as a punter, and he has been tried out as a punter.

Tech Defeats Florida, 13 to 3 Fumbles Cost Jackets Big Score

JACKSONVILLE, Fla., Oct. 25.—Tech won a victory in the annual football contest against the University of Florida, today, by the score of 13 to 3. The game was witnessed by about 3,000 people. Tech's victory was due to its strong offense, while Florida's defeat was due to its weak defense. The Jackets scored three touchdowns and made frequent changes in their line. The Yellow Jackets' offense was very effective, and they scored three touchdowns. The Jackets' defense was also very strong, and they held Florida to a score of 3 to 0.

McGraw Gets Five Recruits for 1914
NEW YORK, Oct. 25.—(Forgetting "Mummers") McGraw, manager of the team, who is already looking forward to the National League struggle of 1914, has secured five recruits who are said to offer more than usual promise. They are: Timmer Johnson, catcher, from the University of Michigan; Harry Killebrew, pitcher, from the University of Michigan; Ed. Williams, pitcher, from the University of Michigan; Ed. Williams, pitcher, from the University of Michigan; and Howard Merritt, outfielder, from Knoxville, Tenn.

Barry's Mates Invited To His Celebration
WORCESTER, Oct. 25.—Manager George Barry, who is leaving the Worcester team to join the Boston team, has invited his mates to his celebration. Barry is a popular manager, and his departure from Worcester is a great loss to the team.

Captain Bob
was easily the Georgia hero in yesterday's game.

CHIP MAY BE MAN TO LEAD 150-POUNDERS

Boy Who Knocked Out Klaus Recognized by His Victim as Dangerous in Any Battle.

BY LEFT HOOK.
SOME surprise—and for that matter, a good deal of astonishment—has been caused by the fact that a boy who knocked out Klaus in the first round of the fight between the two boys, was recognized by the victim as dangerous in any battle.

That is why the whole of new York is talking about what happened to Frank Klaus, the hero of a hundred hard fought battles, at Pittsburgh recently.

Klaus was knocked out completely by George Chip, a variable unknown, for five rounds. Klaus, the veteran, had the better of the contest in the sixth chip was there with his right hand and Klaus went down for keeps, at least so far as time limit was concerned.

At once, of course, explanations were in order. Men thousands of miles away from the scene of the disturbance were discussing it intelligently on the subject as though they had been at the fight.

It was a case, they said, of a variable appearance, high class fighter, under a rugged, rugged-looking man.

Klaus was suspected of neglecting his training and of being all over the place and unprepared when he faced the boy.

Then along came our old friend, the "fury punch," and the boy was knocked out of the world's best middleweight, but the dust.

It is a case, they say, in which the boy was in a position to win.

Williams Is Ready To Start West for Bout With Camp

NEW YORK, Oct. 25.—Sammy Williams and Kid Williams will start on their way to Los Angeles to meet Louis Camp again the second week in December. Williams, who has been in the ring for a long time, is ready to go. He will challenge Johnny Kilbane for the featherweight title at 125 pounds.

Harris says he has had offers from Wisconsin clubs, principally because of his record. He is willing to go a few days before coming West. He prefers Young Finnist.

Here's Patten, Tech's Star

This photograph shows Patten, a long and difficult forward pass.

Patten was snapped just as he started on a long run out of tackle.

BROWNS MOST 35 GAMES BY SINGLE TALLY

American League Tail-Enders Managed to Blank Foes on Thirteen Occasions.

LORING games by one and two runs was a habit of the Browns during the 1913 campaign. Just 35 contests were dropped by the team margin of 360 feet by the St. Louis American League. But when it came to batting the shut-outs, the athletes who worked under George Stowall, Jimmy Austin and Branch Rubeck fairly held their own.

During the campaign the Browns contested 31 games in which one side failed to gain a marker. In other words, one-fifth of the team's games were decided with the losing side failing to score the pay-off station.

Of the 31 games played, the Browns were the winners of 15, while if were dropped, giving the Browns a percentage of 45 in the shut-out ratio. That pretty good for a club that finished in sixth place, with a record 12 large a percentage.

The Browns' standstill in the one-run league had been as good as it was in the shut-out league, the team could not have finished in last place but probably would have landed ahead of the Yankees for one, and maybe the Tigers, had they not been so good.

The pronounced star of the line-up was the pitcher, who was the star of the team. The pitcher was the star of the team. The pitcher was the star of the team.

ON the other hand, such heroes as Joe Engel, who was kept in the American League, because he could beat the Browns so easily, and Dutch Schuler, the youngster for the Red Sox, fared well against the Browns. Both of these stars, however, were good moundmen, captured two battles from the Browns without being scored upon.

Only one pitcher was able to withstand the Browns. He turned the trick on April 15, 1 to 6, at Allison, who went to the A. A. near the close of the season, was the only one. While the Tigers gained only one with this way, the Browns' Jennings' men failed to be shut out by one of the Browns pitcher.

Meredith Says He Will Not Quit U. of P.

PHILADELPHIA, Oct. 25.—Ted Meredith, the Olympic champion and University of Pennsylvania star, is not thinking of leaving Pennsylvania to enter Georgetown University. Ted yesterday boldly repudiated the rumor that he had been offered a scholarship to enter the Washington institution.

He will finish the year at Pennsylvania and hopes to score many more points during the season to come.

Ritchie and Cross Box Wednesday Champ's First Appearance in N.Y.

By W. W. Naughton.
SAN FRANCISCO, Oct. 25.—This coming Wednesday night New York will have its first glimpse of a lightweight champion. Willie Ritchie in action, and just what kind of an impression Ritchie will make upon the Eastern fight followers remains to be seen. Willie and Leach Cross are to clash in a ten-round bout. Ritchie, according to what has been flashed across the wires, has delighted reliance in his ability to handle young Mr. Cross in a masterly manner. As Willie occupies the proud position of king of the lightweight, he could hardly be expected to talk in any other strain.

In deference to his exalted station a champion has to radiate confidence as an enemy wheel meets spars. It is a matter of fact that Ritchie has stuck up his here-words and it may be the man he is training for will not come with that feeling of awe in his heart that length. He has labor under when he finds himself in the presence of pugilistic rivals. Apart from all that, however, Willie Ritchie is a thinking individual, and he probably recognizes that the coming test will prove a serious one.

To begin with, Leach Cross has specialized over the ten-round distance and is thoroughly at home in a bout that length. He has started on so many ten-round journeys that he knows—or should know—how fast he can rate himself with other fellows in the ring. He will be able to carry, fortified with such powers, a man who knows the short bout game from A to Z can outlive as long as a man in reserve and make it decidedly uncomfortable for an opponent who has fought himself into a state of weariness.

THEN again Leach is a tricky fellow. In the matter of speed, he is a stinging punch, when least expected, he is a veritable surprise package. There is no particular continuity to his work, as he shows to poor advantage occasionally against mediocre boxers and performs brilliantly in high-class company. He is not to be shaken by what he has in his last battle of the one before, and he sends vicious glances at the enemy and in such a way that the highest tribute one can pay him is to pronounce him a dangerous man.

While Willie Ritchie is to all intents and purposes a product of San Francisco's best pugilistic training, it can not be said that he shows any of the advantages of his birthplace. There is a story told far that matter, that he recognizes the much and that he recently decided to leave a leaf out of Bob Fitzsimmons' book.

BOB in his later fights around New York found that he could not immerse to satisfy himself and he instructed a practice of warming up in his dressing room with one of his sparring partners before entering the ring. Ritchie, it is said, believes that course of that kind would enable him to get down to his bearings more quickly after the starting gun rang and he told some of his friends that he intended to make the same attempt to get down to the business of the fight.

Maybe the coming bout with Cross will mark the beginning of this new order of things so far as Ritchie is concerned. Far be it from the writer to discuss any man's scheme of battle, but as Willie has made public property of his system, no confidence is betrayed in this special instance.

MACKEN CAN SLUG, BUT NOT LIKE OLD BOYS

Baltimore Orioles Had Extra Team of Real Sluggers—Only One Hit Under 300.

THE Philadelphia Athletics have demonstrated conclusively that they are a great hitting club, but it is the contentment of the club that is so remarkable, not the number of sluggers on the squad.

For the last four years the Athletics have had at least five men batting over 300. In 1911 they had six men hitting over 300.

Any ball club that can produce the results of the Athletics is a great club. It is a rare occurrence when a ball club can show six sluggers in the line-up.

Philadelphia has always had a reputation for strong batting clubs and the days of Thompson, Shantz, Clements and others. In 1902, when Connie Mack won the first pennant, one of the main reasons for his success was the fact that he had six sluggers on his ball team. Larry Fox, Ralph Sorey, Omer Nichols, Dan Murphy, Harry Davis and Dave Barry batted the team to the pennant.

CONNIE MACK has had the same club since the American League was organized that has had on it many of the best players in the league. But the Athletics of today are not so much a team of sluggers as the Athletics of the past. Think of the present Athletics and then imagine a major league team which could produce the same results as the Athletics of the past. It is a club that has a reputation for strong batting clubs and the days of Thompson, Shantz, Clements and others. In 1902, when Connie Mack won the first pennant, one of the main reasons for his success was the fact that he had six sluggers on his ball team. Larry Fox, Ralph Sorey, Omer Nichols, Dan Murphy, Harry Davis and Dave Barry batted the team to the pennant.

THE Athletics have been compared to this remarkable ball club. Hanlon's. Unquestionably, it was a wonderful collection of ball players. Like the Athletics, besides possessing a wonderful hitting strength, they could run the bases with great speed and judgment. As for which team could win the most games today, the matter of conjecture. Here is a list of the Baltimore club's batting line at that season:

Kaifer, 1st base.
Kearney, 2d base.
Doyle, 3d base.
Jennings, 4th base.
Starnes, 5th base.
McGraw, 6th base.
Bowerman, 7th base.
Robinson, 8th base.
Reitz, 9th base.

character mentioned can not be made to stick. Klaus was not unprepared for Chip and Klaus did not neglect his training.

When Klaus returned to Pittsburgh, he found that he had been beaten by Eddie McCreary at Millersville. He was a good fighter, but he was not a good fighter. He was a good fighter, but he was not a good fighter. He was a good fighter, but he was not a good fighter.

It is not generally known that the Klaus incident was the second important event by mysterious Mr. Chip in the space of ten days. On October 14, at Akron, Ohio, he knocked out Tommy Geisler in the eleventh round of a bout that was scheduled to go twelve rounds. This makes it all as though Klaus, because he is becoming a habit with Chip.

On the strength of what Chip has accomplished so far it is thoroughly reasonable to suspect that he is the proprietor of a stiff punch. It is a correct suspicion of the fact that he will surely be heard from further.

The words are of a boxer who is a fairly clever and who can stand and fight in the ring. But it is the man who makes the really rapid stride in the unexpected game.

Just now the sport of the ring is wealthy. It is a rich man's game. It is a rich man's game. It is a rich man's game.

FRANK KLAUSE is lucky in a way. He has secured a return engagement with George Chip and the contest is to take place in the very near future. This means that if the knockout Chip is credited with was the result of a mere accident Klaus will be able to cover the notice with the world and set himself right with the world.

Daubert May Lead Dodgers Next Year

NEW YORK, Oct. 25.—Hunters from the more league in Brooklyn today declared that "Red" Daubert may be succeeded as manager of the Brooklyn Dodgers by Jack Daubert next year. President Griffith of the Brooklyn club, who is the manager of the team, has agreed that in future negotiations between the two teams the National Commission shall govern. The matter of Daubert's resignation was the subject of the post-season series.

Murphy Matched to Box Welsh on Nov. 10

CHICAGO, Oct. 25.—Freddie Welsh, Irish lightweight champion, and Eddie Murphy were matched for a battle in San Francisco on November 10. They are to weigh in at 125 pounds. The match is expected to be a close one.

Chance May Drop Pair of Recruits

It begins to look as if neither Holden nor Williams will be retained as regular outfielders by Chicago next year, says a New York writer.

Holden probably will be turned out to some club, where he will have a opportunity to learn something about his own game. Williams, who has been in the ring for a long time, is ready to go. He will challenge Johnny Kilbane for the featherweight title at 125 pounds.

Club Leader Calls Off All Games

CHICAGO, ILL., Oct. 25.—The first snowstorm of the season yesterday sent the Cubs scattering. The first thing that Manager Storer did when he awoke was to look out of the window. The next was to hustle to the club house and get in communication with the cities where exhibition games had been arranged. When he finished with the telephone, all of the clubs had been canceled and the West Side players who had been barnstorming were left to get out of the city as soon as they could. Some of them were willing to depart immediately.

GOLF IN JAPAN IS LATEST.

ALBUQUERQUE, N.M., Oct. 25.—Disc golf, which will introduce a sport second to baseball, recently arrived. Gordon Richards, a Colorado golfer, left yesterday for Albuquerque, where he will make his home. Richards came to Colorado Springs several years ago for his health and took up golf for exercise.

GOOD ROADS RESPONSIBLE FOR LAND VALUES IN STATE, DECLARES EDWIN P. ANSLEY

By EDWIN P. ANSLEY.
A RECENT automobile trip of 1,200 miles through South Georgia not only convinced me that Georgia is making splendid progress in her road-building, but that the section has splendid crops this year and is developing faster than any section of the United States. And that the automobile is the great factor that is going to help open up the state to a remarkable tide of immigration.

Five years ago, before the good roads movement had started, there were no good roads in Mitchell County, and some of the best land in the county could have been bought for \$10 an acre. A week ago Colonel J. L. Stand told me that Mitchell County now has spent \$250,000 on good roads, and ex-Senate Senator Bush, of Mitchell, told me that he had a large number of acres of land that he had refused \$50 per acre for a number of times.

The effect of good roads on land values in every county is very marked. In Tift County, three miles from Tifton on the National Highway, land at public outcry for over \$100 per acre.

Description of Trip.
The fact that I left Atlanta at 1 p. m. on October 4 and returned at 1 p. m. on October 11, with my speedometer reading 1,216 miles for the trip, is the best evidence that I had good roads on which to make my inspection tour.

I left Atlanta, as stated, at 1 p. m. reached Macon a little after 1 p. m. had dinner, and left there at 4 p. m. made 46 miles to Vienna, Floyd County, reaching there about 9 p. m. I left Vienna after breakfast Tuesday morning, went to Cordele and inspected property within a radius of fifteen or twenty miles of that place, came back to Cordele, and thence to Auburn, where I had early lunch. I left Auburn about 1:30 p. m. and

went to Bolivar to examine a property near there.

After examining the property, we went on to Albany, and thence to Columbus for an early supper. We left Columbus at 6:30 p. m., and reached Bainbridge a little after 9 p. m. We went to Jacksonvilleville Wednesday morning and went that day southward to Quincy, in Jackson County, and then to Bainbridge for supper. We left Bainbridge after supper and passed Tallapoosa, Fla., about 8:30. We inspected the S. C. Luff place and my department near Tallapoosa Thursday morning, and then went to Thomasville for lunch.

Compliments Along.

Friday we inspected property in Macon, Peach County, Tifton, Ashburn, and then Saturday we inspected properties around Cordele until 11 a. m. Then went to Perry for lunch, and reached Atlanta at 3 p. m. Saturday for supper.

Mr. J. W. McQueen and J. Hope Tigner accompanied me on my trip, and Mr. Mayson says that seeing Georgia from an automobile was a revelation to him, and that while he had inspected every convict camp in the State while in the Legislature, since taking this automobile trip he thought ten times more of his State than he ever had before. We found South Georgia full of cotton, money and prosperity, with farmers paying debts and three years old.

Mr. Tigner and I were told in Albany three weeks ago that flight was sold to the farmers that day for cotton in cash, and a similar amount was paid to the farmers that day for cotton in cash. The following week \$70,000 was paid in one day to farmers in Harroville. This clearly indicates the prosperity of this wonderful section of Georgia. These instances just as a sample of what was occurring throughout the entire section, and these days were no exception, but the every where that we came in contact with, whether farmer, merchant or banker, was

NEW STUDEBAKER 'FOUR' AN ATTRACTIVE VEHICLE

Here is the brand new, from-the-factory Studebaker "Four" that has just been received at the Atlanta branch on Peachtree street. It is a five-passenger affair, and promises to be one of the most popular of the moderate-priced cars.

rejoicing over this wonderful era of prosperity.

History is simply repeating itself by having the cotton of the South bring gold to America, when our friends in Wall street were predicting that it was impossible to turn the tide of gold to this country.

Crops Diversified.
We noticed in every section a greater diversity of crops than any of us had ever seen in Georgia, and we were told that there was more grain, corn and hay produced in Georgia than ever has been known in the history of the State.

An evidence of my belief in the future of South Georgia I have entered into a contract with G. M. Pinson, who owns 2,355 acres of land in Worth

County, on the Atlantic Coast Line Railroad, about halfway between Sylva and Albany, to develop and subdivide into farms and offer same to the prosperous white farmers of the United States where land values have increased to a high price and which are no more productive than the lands in South Georgia.

In fact, I am more convinced than ever that the lands in this section of South Georgia, under the proper treatment, will yield a greater net profit than the lands in the Middle West and, besides, the climatic conditions here are far more desirable. I have a corps of engineers on this property, and will within a few days begin settling it with prosperous white farmers.

JACK TOWER LOCATED.

Jack Tower, the race driver whose sensational spill was a feature of the last Indianapolis 500-mile race, is out of the hospital and has joined the Studebaker staff in Detroit as expert driver for the engineering department.

CYCLECAR HERE AND IT COSTS EXACTLY \$375

First Car of Kind in Window of Cole Motor Co.—Has Speed of Fifty Miles.

THE cyclecar has arrived in Atlanta and is attracting great attention. It is on display at the Cole Motor Company's shop, at No. 329 Peachtree street, and K. N. Sessions, Southern representative, with headquarters in Atlanta, is showing the car and taking orders. Indications point to a large local sale, and Mr. Sessions reports that so many orders have poured in on the factory at Auburn, Ind., it has been impossible to supply the demand.

Probably the most interesting point in connection with the cyclecar is that it costs but \$375 f. o. b. the factory. It weighs only 450 pounds and has been referred to as the "poor man's hope." Forty to fifty miles per hour can be attained, and the car will run at this speed for an hour on a gallon of gasoline.

The average maximum upkeep, declares Mr. Sessions, is \$12 a month, which point also touches the heart of the man of ordinary means. The car is two-cylinder, air-cooled, 35-hp. and has 100-inch wheel base. The name of the machine is the "Studebaker" and it is a product of the W. H. McInyre Company.

Cyclecars are made very narrow, only one seat wide. They are occasionally double-seated.

Foolish Questions Asked In Trips Through Factory

DETROIT, MICH., Oct. 25.—"Tee," said James, a guide at the Ford automobile plant, "we have some amusing experience. People have no idea of the extent of the plant before they take a trip through it and many of them have but little idea of what they have seen after they have gone through. The comparisons they make are a big laugh. They are always trying to size up something by the size of something they are familiar with."

"Get them looking like a bunch of cream separators."

"People get funny ideas of what they are going to see. I was taking a party of women through and one asked me where the slaughter house was. That was a new one and I stuttered, guessing, asking her what she meant."

"Why," says she, "I read a piece in the paper about the thousands of cows that are killed every year to furnish the leather for the upholstery and I wanted to see the slaughter houses."

"One of the funniest was a bunch of Englishmen that was here. I was telling all about the enormous quantities of material—that the screws used in all the 185,000 cars made this year, if

put end to end, would stretch from here to Cleveland and stick out away over Ohio."

"But you can't do it," I knew," said one of the Britishers."

"Stretch those blooming screws from Detroit to Cleveland," he answered, "because you couldn't stretch them together and they would interfere with navigation."

"Not long ago, when it was announced that we were making a car a minute, I was towing a crowd of business men through. When we got to the assembling floor one of them, a hard-headed old chap who acted all the time as though he was from the heart of Missouri, pulled out his watch and began to follow the labor of the assembly crew. When the car that was being set up was run out on the loading platform, he snapped his watch shut, waved his hand and said disdainfully:

"I know it was a fake!"

"What is a fake?" asked one of his companions.

"This building a car every minute," he answered. "I have timed these men here and it took eleven minutes to put that car together."

"They all fell for it for a minute and looked at me reproachfully as though I had picked their pockets."

"But," says I, "you don't seem to have grasped the point. Look at all the other crews who are lining up a car every eleven minutes. The Ford Company doesn't say that it builds a car every minute. That is impossible of course."

STUDEBAKER AUTO TRUCK Latest Model, to be sacrificed by owner in order to install MOTORCYCLE DELIVERY SERVICE

by 5717 L. S. CRANE 328 Peachtree Street

This Regal For \$375 Cash

Balance in Eight Equal Monthly Payments—6 Per Cent Interest.

There isn't a car—there never was a car that had as much value to it for the price as the 1914 Regal. In every detail of building and finish, in all the essentials of style and grace, it's way ahead of its price—electric lighted and started, of course, and completely equipped in every detail.

There are lots of them on the streets already. Before the season is over, they will dominate Atlanta. THEY MUST—THERE'S A REASON.

The company recognizes the buyers' rights. They'll find in Regal terms the commercial courtesy to which they are fairly entitled. To every proposed buyer entitled to credit, they offer

Regals For One-Third Cash

You can keep your bank account intact, use your money in your business, and pay for your car on convenient terms. Stop and look at the new models.

REAL ESTATE FOR SALE.

REAL ESTATE FOR SALE.

REAL ESTATE FOR SALE.

ADAIR'S LIST.

BUILDING LOTS.

\$150 TO \$12,000.

BELOW we offer a number of lots from each good residence section of the city. These lots are a fine example of each section and have been selected with a view of giving the purchaser, whether he be a home-builder or an investor, the best to be had in location and in value.

The price—\$150 to \$12,000—the terms which can be made surprising, by easy, give each man an opportunity to secure a lot in his own section and at a price that will suit his pocketbook.

\$150 TO \$400.

ON WYLLIE STREET, between the Georgia Railroad roundhouse and Merchand avenue, we have a tract of land that has been cut up into building lots.

These lots are just a few blocks from car line and lookabk avenue, in a section where improvements are being made every day.

An opportunity is offered here to get a suitable lot for your own purposes at the lowest possible price. Each lot is 60 by 120 feet and range in price from \$150 to \$400.

\$900 TO \$1,500.

BETWEEN STEWART AVENUE and Row End on the East River and Catherine streets, we have a few lots of 50 by 120 feet and 60 by 120 feet. These lots have plenty of shade and all possible conveniences. With just enough building restrictions to make them desirable.

In this residential part is a new city school, city park and convenient to two car lines, being only 15 minutes ride from town. The terms on this property can be made to suit the purchaser.

\$1,700 TO \$1,800.

ON LAWTON STREET, one of West End's most desirable streets, just about 150 feet from Gordon street, we have two lots, 50 by 120 feet.

Considering the street, the convenience to car line, the school and the desirability of West End as a residential section, these lots are very reasonable at \$1,750 each. Easy terms.

ON SOUTH GORDON STREET, we offer two lots, one 10 by 150 feet, the other 50 by 120 feet. Both have an alley in the rear. These lots are just half a block from the car line and are practically the only two vacant lots left in this desirable block. Price, \$1,750. Easy terms.

ON THIRTEENTH STREET, between Peachtree street and Piedmont avenue, we offer a lot 40 by 140 feet to a 12-foot alley. The security of close-in buildings, lots on the North Side, anywhere near Peachtree street, should easily sell at our price—\$1,800. Terms.

\$3,750.

ON PIEDMONT AVENUE, just beyond the Driving Club, we have a lot 50 by 140 feet. This lot has plenty of shade trees, front east and is in a very popular residence section. Reasonable terms.

\$6,000 TO \$12,000.

ON PEACHTREE STREET, just off Peachtree and Fifth street, we have three streets and facing some of Atlanta's best business houses. This is a lot 100 by 284 feet. This represents a very best lot to be had in this property. Price, \$11,500. Terms.

ON THE CORNER OF SIXTEENTH and Peachtree streets, we offer a lot 184 by 250 feet in an alley. This lot is one block from Peachtree street and since it is in Atlanta's most desirable section and being the only vacant corner for blocks around, makes it especially desirable for a handsome home or an apartment house. Price, \$12,000. Terms.

BETWEEN TWELFTH, THIRTEENTH and Fourteenth streets, on Piedmont avenue, we offer a number of lots 67 by 200 feet each, ranging in price from \$115 to \$130 per foot. These lots are the only available ones in this section suitable for high-class homes.

This property has plenty of shade trees, faces east and beautiful Piedmont Park, ADAIR's most valuable park. This park gives a permanent outlook and should make this property doubly valuable for homes. This fact will be appreciated when you take a look at the average crowded residential street. There are no properties anywhere in Atlanta that is quite as valuable for a permanent home as this. The price on these lots will range from about \$7,500 to \$10,000.

ON PEACHTREE ROAD, this side of Buckhead, in what is known as "Peachtree Heights," we offer a nice lot 100 by 100 by 400 feet. This lot faces east and is one of the prettiest on Peachtree road.

Since everybody is familiar with an section of Peachtree, it can readily be seen that this is a bargain at \$5,000. Terms.

JUST beyond Buckhead we offer a lot 100 feet wide and 250 feet deep. This lot is one block from Peachtree road, running through the block 600 feet with a frontage of 250 feet on Roswell road. A piece of property with two properties, a tract of land that this is in and with a depth of 400 feet, offers all sorts of opportunities. Price, \$5,000. Terms.

FORREST & GEORGE ADAIR.

Company Insures Parcel Post Bundles

Premiums on Packages Valued Between \$5 and \$200 Run From 3 to 5 Cents.

HARTFORD, Oct. 25.—One of the insurance companies here is now insuring parcel post insurance, providing protection against loss or damage from any cause whatever, including breakage of merchandise while in transit through the mails.

It is possible under these policies to insure the actual value of merchandise mailed, between the limits of \$5 and \$200 for a premium of 3 to 5 cents to 5 cents. The policy is attached to a book of certificates, which is put in convenient checkbook style, containing certificates of either 1 to 5 or 10 cents value.

The insurer simply tears off enough certificates to cover the amount of insurance desired and enters upon the stub the name and address of the consignee, the value of the package and the date of the mailing, and then incloses the certificates in the package or mails them with the invoice.

The insurer simply tears off enough certificates to cover the amount of insurance desired and enters upon the stub the name and address of the consignee, the value of the package and the date of the mailing, and then incloses the certificates in the package or mails them with the invoice.

Unwary Are Warned To Buy Land Slowly

Thousands, Says Dealer, Take Lots Too Far in Country—Advice Is to Seek Good Agencies.

NEW YORK, Oct. 25.—At a recent meeting of a number of prominent New York suburban real estate operators several pathetic instances of unwise investment by persons of small means on the eastern end of Long Island were quoted. Suggestions were made for protecting legitimate operators, who have had this unfortunate condition to contend with, and regardless of the public manner of conducting business in their companies.

Speaking on this subject, J. M. Knight, of the McKnight Real Estate Company, was of the opinion that the general public should seek out for themselves the real estate firm of known reputation.

There are thousands upon thousands of people scattered throughout this country, Mr. McKnight believes, who have been persuaded by unscrupulous real estate salesmen to purchase lots for investment that have no real value and that have no general value as a site upon which to build a home or even for farming purposes.

Combination Formed Of Knitting Mills

"Aktiebolaget Sveriges Trilastker" Is Title of New Concern. Quality To Be Improved.

With the possible exception of the knitting mills of Sweden, reports Consul Douglas Jenkins of Gothenburg, have been absorbed into a combination recently organized and known as the Aktiebolaget Sveriges Trilastker (Knitting Mills Company of Sweden). It is announced that the principal object will be to improve quality and quantity of the output and thus reduce the considerable imports of foreign goods. It is intimated that the industry is to be modernized—streamlined and the machinery is to be improved by the addition of new appliances. The exact capital stock of the new combination is not given.

Farm Land Is Cheap

In Georgia--Want Some?

Georgia farm land is the best in the country. It's cheap because there is so much of it—not because it's no good.

But prices are climbing all the time. That's because so many farmers and city folks from the North and West are moving in.

They Are Getting Rich, Too.

They raise from two to five crops a year and make more per acre on each crop than they made on the one crop they raised in the North.

Let me tell you about Georgia farm lands.

Information given absolutely FREE.

Gloomy Outlook for Consumer In Season's Foodstuff Prices; Holiday Dinner More Costly

Apples and Grapefruit Higher, While Poultry
Marks Time—Things to Cost More Generally.
Produce Man Defends His Clan.

LITTLE comfort for the consumer in his quest of lower prices for the necessities of life is seen by M. D. Thompson, of the Williams-Combs Co., Broad street, commission merchants. Prices for things that go on the poor man's table will be a little higher than they were last year. Short crops in certain lines and an unusually heavy demand for

The crop of eating apples is 25 to 30 per cent short, and the grapefruit crop is reduced to 50 per cent, causing generally higher prices. Apples will be 10 to 15 cents higher, and grapefruit 15 to 25 cents a peck to the consumer. Cooking apples are also higher. Some consolation is promised in the lower prices of Florida oranges. A bumper crop of Florida oranges, says the American Fruit Growers' Association, will enable the common people to save. If oranges are eaten

plentifully rather than apples and grapefruit, the laboring man can get a better price for his produce. He arranges that he forces up the price again. Then he can switch to apples and grapefruit, which have gone down in the meantime, and reap the benefit at both ends.

Prices Up, Then Down.

At present, that is the economics of it, whether the scheme works out or not. Mr. Thompson asserts that price fluctuations are inevitable. "The

However, will we get a night of calm? It is hard to tell. People holding apples will probably be able to get ten prices until Christmas, when they will unload at lower prices. This will be true if the price is not forced down earlier through the failure to export apples and indications are that the market this year will not be broken."

THE WORLD'S REAL WORK

WHEN the savages in Africa kill a hippopotamus, they send for their friends of the tribe and they camp down beside the dead carcass until it is devoured.

Often then a man will eat fifteen pounds of meat or more—and the eating continues even after the tropical sun has made the meat decay.

If you ask those savages why they spend their lives gorging on putrid hippopotamus meat part of the time and going half starved the rest of the time they will tell you that their kind of life alone is worth while.

Ask the ordinary human being with the foolish interests—the uninformed man, the money lover and pleasure lover of our civilization—and he will tell you that such an existence alone interests him.

But this is not an article on hippopotamuses or savages. The picture is only to make you LOOK at the article, in hopes that having looked you will read about THE REAL SOCIETY OF CHICAGO.

Chicago has a real society, a genuine aristocracy—not on the North Side, which is fashionable, but on the South Side, which is unfashionable—that part of the city where human intelligence and twenty millions of Rockefeller's money have created a great university battleground of thought and scientific investigation.

Everybody knows that there is a Chicago University, and that is about all that "anybody" does know about it. Here we mean to tell you something more, something about the men, conquerors of knowledge, real warriors of civilization, who work in that university.

Read this patiently and learn the kind of life and work that are worth while. We shall give you only a few names and a few facts inadequately prepared concerning those names.

This one university—only one, unfortunately, among scores in the United States—possesses the following men of genius:

R. A. Millikan. You probably never heard of him.

He is the man who has PROVED THE EXISTENCE OF THE ELECTRON and thus brought man nearer to actual knowledge of this universe and its great mystery—the composition of matter.

To the Average Man It Is Mysterious and Seems Foolish—Like the Work of the Surveyor Passing a Crowd of Kaffirs Eating a Hippopotamus. In the Picture the Savage, Gorged with Meat, Wonders Why the White Men Waste Their Time Dragging Heavy Instruments Through the Jungle. In Our Civilized Life Savages of Another Kind Wonder Why the Surveyors of Science and the Unknown Jungle of Knowledge Waste THEIR Time in Hard, Ungrateful Work.

What we call matter is made up of molecules. Ten thousand molecules might get into your eye and you would not know they were there. The molecule is divided into atoms. If you were the size of an atom, you and your wife and the whole population of Greater New York if suddenly reduced to your atomic size could all dance on the point of a needle and have plenty of room for the hand.

The atom is divided into electrons. The electron is an infinitesimal fragment of electric force. And that which we call this universe—with its power, weight, color, light, motion, touch, taste, smell, everything in it from the brain of a genius to the hoof of a hog—is made up of electrons gathered in atoms, they gathered in molecules and the molecules gathered in "the mass."

Millikan, of the Chicago University, has isolated the atom, suspended atoms in a vacuum, captured them in the field of the telescope, made them visible, PROVED THEIR EXISTENCE. He has measured the infinitesimal which makes up the infinite that we call the universe.

This man has proved the constant motion of matter. He is a pioneer of cosmic knowledge. Beside this man are working H. J. Gale, developing important new discoveries in spectroscopy—working out problems of the composition of light which reveals the universe to us through our eyes—and J. U. Nef, professor of chemistry, who has mapped out new lines of thought discovery in organic chemistry—which is to say the chemistry and composition of living bodies.

Pilate asked, "What is truth?" Science to-day asks, "What is life?" Nef is one of the thinkers working to answer that question. He studies the secret of consciousness, as Millikan studies the composition of matter.

T. C. Chamberlain and with him F. R. Moulton are working in the geological and cosmological field of mathematics—

slightly deep for us average mortals.

As Millikan studies the electron, and Nef the living cell invisible to the eye, Chamberlain and Moulton study planets and stars a million times as big as our sun, which in its turn is a million times as big as our earth.

Chamberlain's studies and what appear to be "his important discoveries" would explode the theories of La Place, whose explanation of the birth of planets in space has hitherto been accepted.

Chamberlain has announced what he calls the planetesimal theory of the universe. He believes that very small planets—such as those that whirl around in space near us, supplying us with meteors, and others much bigger have come together and created the bigger planets—in turn being scattered by cataclysms and reunited, and so on indefinitely.

This theory would destroy the nebular theory of La Place, upon which science has been doing for some generations. Chamberlain's work may be described as "cosmological studies of geology, tending to explain through the geological investigation of this earth the entire cosmos."

While Chamberlain studies the great question by analysis as a mathematical geologist, E. H. Frost, director of the observatory at Lake Geneva and boss of the great Yerkes telescope, studies the outside suns, planets and nebulae face to face. He is the "lookout man" of our ship, the earth, watching for new stellar bodies, comets, nebulae, et cetera, as the lookout on a ship watches for other ships and for icebergs.

Spectroscopic work, measuring distances, investigation of the curvature of the universe in Frost's work. With him, connected with the great telescope and with the university, are Professor Barnard, who makes a specialty of comets, and Professor Burnham. The latter, curious to say, is clerk of the City Court, and the most famous "double star man" in existence.

A double star—two gigantic suns harnessed together by gravitation, and kept apart by the power of motion, is something fascinating to the mind of an intelligent man—although the savage eating a hippopotamus would not think so.

Then there is F. A. Lillie, a hard-working scientist, in spite of the fact that he might be spending millions. He is like Millikan, a student of the problem of life, in charge of the station at Wood's Hole, founded by F. A. Whitman, the great biologist, now dead.

And then there is Professor Michelson. If this were a plunk inhabited by civilized beings, every child ten years old would know the name of this man—whereas now every

child knows the name of some military murderer instead.

Michelson, of Chicago University, is the man who won the Nobel prize—an honor much greater than any ever won on the field of battle.

This man, working in the Chicago University for considerably less than we pay some first-class newspaper reporters, is beyond question the greatest physicist—that is to say the greatest student of physical phenomena now living.

It would take several newspapers as big as this, with considerably more knowledge than this writer possesses, to give even a feeble outline of this man's work.

It was he who told the scientific world what it did not know—the speed at which light travels through space. Upon that speed is based all our knowledge of distance throughout the universe. As a very young man, teaching his students at Ann Arbor, he corrected the supposed speed of light and made every scientist his debtor.

Besides measuring the speed of light and thus furnishing to scientists a cosmic yardstick with which to measure distances of billions of miles, Michelson gave to the people on this earth a scientific yardstick—absolutely invariable, with which to correct earthly distances—and cheating merchants.

The French have their absolute metre, which is the basis of all decimal measurements.

So many times the length of this metre gives the distance around the earth.

A certain number of cubic centimetres of water weighed at a certain temperature at a certain distance above the earth gives the French kilogram which is the measure of weight—thus the French measure all money based on the weight of gold.

Having got their exact metre by spending millions—which included the effort to measure the earth's circumference exactly—the French took every precaution to have their metre safe forever so that there could be no mistake and no cheating.

They have their metre made of platinum, a precious metal that resists the action of heat and cold. This metre is supposed to represent one forty-millionth part of the earth's circumference, and it is kept buried forty feet underground in order to escape variations of temperature, by the International Bureau of Weights and Measures, at Breteuil, near Sevres, just outside of Paris.

Michelson made all of that precaution unnecessary by giving to the world the exact measurement or length of a light wave "in terms of a standard metre." That is to say, he measured exactly, which any scientist may do hereafter, the length of the red radiation from cadmium vapor. This was an intricate process. No one had ever done it.

Michelson was able to tell the Frenchmen: "Take the length of the red radiation from cadmium vapor in a vacuum through which an electric spark is passed. Multiply it by two million and a fraction—giving the exact figure—and you will have your metre. If somebody should steal your metre of platinum, or if an unexpected volcano should burst out and melt it, you could get from the cadmium ray of light, correctly measured, the same result as you got by all the millions you spent measuring—or trying to measure—the earth's circumference."

You may, like the gentleman eating the hippopotamus in this picture, be very little interested in the length of a ray of light from the vapor of cadmium. But you might be interested in marvelous exactness.

Some French chemists, following Michelson's experiments, to make sure that he was right and to see if they could not improve upon them, announced that their experiments coincided with his within one ten-millionth part. As the cadmium light ray is only the two-millionth part of a metre or French yard, this means that Michelson's measurement is accurate to within one ten-millionth part of the two-millionth part of a yard—which, in the language of our day, is "some accuracy."

We could tell you many other extraordinary things that are done year after year in the great home of knowledge at Chicago and others like it throughout the land—Michelson's investigation of "the reality of motion," his measurement of the movement of the solar system through space.

We could tell you of scientific discoveries that are tending to revolutionize the whole of mechanics, destroying confidence even in the accepted teachings of Newton, condemning those teachings to inaccuracy except as applied to matter moving "slowly." We could show you the absolute proof that "matter in motion increases its mass," and many other marvels.

But it would not be easy to explain how men measure the velocity of light flying at frightful speed through space—the light waves racing at right angles to each other. And the subject is rather deep for us average mortals—just as the curious actions of the man with the theodolite in this picture are puzzling to the savages.

"What we want to impress on our readers is the fact that the world's real work is a work that is unknown."

The great and useful men are the teachers, the investigators, all whom we have mentioned are only a few in one university. We should if space had permitted, have described the work of Herick, Manley, Brewster, and a score of others in that one big laboratory of thought.

We wish our readers might give each week at least a few hours to earnest reading, that they—especially the rich among them who have power—might realize that the real building up of civilization is done within the brains of a few scientific men.

We pity those poor savages in the picture who do not even dimly understand the work of the engineers surveying the railroad that is to transform their wilderness into a modern land. The future will look back with pity upon us that do not understand the work of those cosmic surveyors who are mapping out roads in the land of thought and scientific knowledge—roads that will one day make of our primitive savagery A REAL CIVILIZATION.

Paul Poiret, the Poet-Artist Dress-maker, Says All He Needs Is "Scissors, Stuff and a Woman," and That He Seriously Thinks That Women Will Eventually Wear Trousers, "Not Masculine Trousers, but of Full, Graceful, Gorgeous Brocades."

heat we are receiving from the stars.

THE BATTLE OF THE BEARS

BY HUGH S. FULLERTON

SYNOPSIS OF PRECEDING CHAPTERS.

THE Bears and the Bears are the end of a bitter struggle for the baseball championship which the Bears have lost their bitter and desperate battle. The Bears are the end of a bitter struggle for the baseball championship which the Bears have lost their bitter and desperate battle. The Bears are the end of a bitter struggle for the baseball championship which the Bears have lost their bitter and desperate battle.

CHAPTER XX.

Continued from Last Sunday.
"D" it ever strike you?" inquired Swanson, "that there may be some one else in the team in this?"
"I don't believe it," expostulated McCarthy. "None of the fellows would..."
"I didn't think Williams would either," interrupted Swanson. "Come on. Let's see what you have to say to this."

Manager Clancy was waiting, striding up and down the room restlessly and as the three players entered he unconsciously shook his head. As he read the players began to look one at the other and exclamations of surprise and anger came from them. When Clancy reached the portion of the article telling of the players joining the Bears, McCarthy sprang from his chair.

"Why," he exclaimed, flushing scarlet, "why means me?"
"It's a damn shame," roared Swanson. "I'll wring his neck!"
"Let me finish," said Clancy and completed the reading. At the end of the article the three players looked at each other and then at Clancy.

"Now, see here, boys; we're against a tough proposition. This article is just part of it. I want to talk things over with you fellows. I've sent for Technicities, and want to find out a few things from him. Now you fellows know you know me the way you know me. I needn't say using Williams's name. I'm not saying he's guilty, but I know he's the one you have been watching."

"I regret exceedingly my absence when you wanted me, Mr. Clancy," he said. "I have just returned and have been reading this absurd article reflecting upon the integrity of Mr. McCarthy."
"What do you think of it?" asked Swanson. "Aloud. The figures prove directly the contrary. Let me read you some of my recent calculations."

"Never mind—never mind," protested Clancy. "Save them for the paper. What I want to find out is who is this fellow here who has been crooked?"
"Baldwin," said Feehan calmly. "I'm a politician. I know he's been crooked. I don't know that he ever has been crooked."

you," she said simply, and as he looked into her eyes, she lowered them with a quick blush and hastened to recover her book.

CHAPTER XXI.

The Bears Reply. It is 20.
NEARLY thirty thousand persons were packed into the big stands on the Bears Park, and the Bears were the champions. The Bears were the champions. The Bears were the champions.

"Keep your nerve, Kohnstoor," said Clancy, as the third baseman was tying his shoes in the bench enclosure. "We're going to be a tough day. If you lose your nerve and break they'll think the story is true."

"I'm not sure," said Clancy, as the third baseman was tying his shoes in the bench enclosure. "We're going to be a tough day. If you lose your nerve and break they'll think the story is true."

"I'm not sure," said Clancy, as the third baseman was tying his shoes in the bench enclosure. "We're going to be a tough day. If you lose your nerve and break they'll think the story is true."

"I'm not sure," said Clancy, as the third baseman was tying his shoes in the bench enclosure. "We're going to be a tough day. If you lose your nerve and break they'll think the story is true."

"I'm not sure," said Clancy, as the third baseman was tying his shoes in the bench enclosure. "We're going to be a tough day. If you lose your nerve and break they'll think the story is true."

"I'm not sure," said Clancy, as the third baseman was tying his shoes in the bench enclosure. "We're going to be a tough day. If you lose your nerve and break they'll think the story is true."

"I'm not sure," said Clancy, as the third baseman was tying his shoes in the bench enclosure. "We're going to be a tough day. If you lose your nerve and break they'll think the story is true."

"Miss Taber," he pleaded eagerly. "Please do not think I do not want to go." "Did I hint such a thing?" she inquired, with an air of innocent indifference. He could not face her with her eyes so bright and after a moment of idle exchange of glances he turned to join her. Miss Clancy and McCarthy, stretched upon the floor, watching the game and hating each other as much as they could hate each other.

"I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance.

"I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance.

"I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance.

"I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance.

"I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance.

"I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance.

"I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance.

"I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance. "I don't want to go," said McCarthy, with a look of defiance.

Some Points of View Overlooked by Mr. Hall Caine in His Famous "Best Seller."

Eddy Howard and Harry Yoste

in "Those Were the Happy Days," at the Keith Theatres

(All Stage Rights Reserved by Howard and Yoste.)
HARRY—Hey! Where you got, Ed?
EDDY—How'd you know my name?
HARRY—Oh, I just guessed it.
EDDY—Then guess where I'm at.
HARRY—But before you go, stop inside and see the most marvelous show on earth for the paltry sum of ten cents. Buy tickets at the window.
EDDY—All right. Here's a paltry dollar. Say, what's the matter here? I gave the ticket seller a dollar. He gives me this ticket and pulls the window down. What's the idea?
HARRY—Oh, that's all right. The ticket seller's just gone to lunch.
EDDY—Yes, but I've got plenty of change coming.
HARRY—That's easily adjusted. I'll simply give you nine more tickets. Now behave, and stop inside and see the freaks.
EDDY—Freaks inside? What are you doing out here?
HARRY—Run along inside now. Don't make so much noise. You'll disturb the audience.
EDDY—Aw, bring 'em out. I'll look the whole three of 'em.
HARRY—Say, there's something familiar in that assay look of yours. Did you ever hear of a town called Beestville?
EDDY—That's my home town. Is your name Harry?
HARRY—Sure! And you must be Eddy. Well, how are all the folks up there? How's my old friend Bill, the butcher?
EDDY—Oh, Bill's a tailor now. He made this suit for me.
HARRY—Oh, did he? I see he's still a butcher.
EDDY—Say, do you remember the day you threw me up against a fence and nearly broke my head?
HARRY—Ah, those were the happy days.
EDDY—Yes, for you.

Copyright, 1913, by the Star Company. Great Britain Rights Reserved.
HARRY—Say! "Ed"! Well, you can go—go do a little Western stuff and walk there!
EDDY—I know what I'll do. I'll stand outside here and keep the people away until you give me that ninety cents.
HARRY—Step right up, ladies and gentlemen, and see the three troupe of trained nightingales, see Mike Scratch and her performing feline, see the Doodrop Brothers take a fall out of the trapeze, see the dog-faced cat and the owl-faced fish, see—
EDDY—See the whole show if you stay outside.
HARRY—What are you doing out here again? Get back inside. You'll disturb the audience.
EDDY—Aw, bring 'em out. I'll look the whole three of 'em.
HARRY—Say, there's something familiar in that assay look of yours. Did you ever hear of a town called Beestville?
EDDY—That's my home town. Is your name Harry?
HARRY—Sure! And you must be Eddy. Well, how are all the folks up there? How's my old friend Bill, the butcher?
EDDY—Oh, Bill's a tailor now. He made this suit for me.
HARRY—Oh, did he? I see he's still a butcher.
EDDY—Say, do you remember the day you threw me up against a fence and nearly broke my head?
HARRY—Ah, those were the happy days.
EDDY—Yes, for you.

HARRY—Eddy, I've got a picture of my dear old mother here. It's the best picture she ever had taken. I always carry it with me.
EDDY—That is good of your mother. How well I remember her. She was a good old soul. She looks so natural in that picture. She's got my mother's shawl on.
HARRY—You rummy, that's an imported shawl.
EDDY—Yes, I know. She imported it from our house.
HARRY—That was for ninety cents your mother owed her.
EDDY—Ninety? I see. I've been there.
HARRY—To continue, undisturbed, I wanted to tell you how I came by this hat. I got it in a very unusual way.
EDDY—I see; you bought it.
HARRY—I had just been in a barber shop and—
EDDY—Dude. On your way out you got the best hat. Old stuff.
HARRY—Not at all. If you want to know my method, I simply go into a store and select the hat most appropriate for me.
EDDY—Right. A soft hat.
HARRY—No. Rather a hat which suits my face.
EDDY—Oh. A knobby one.
HARRY—All the time I've been standing here this evening I've been making faces at you, and you don't dare resent it. You've pretended not to see a man, haven't you?
EDDY—No. You got me wrong. I thought they were natural.

Our Own Prison Investigation

EDITOR'S NOTE—Prison life is full of horrors. Not the least of these nowadays is being investigated. Prison investigations for the moment have replaced in popularity mock-making the octopus, the idle rich. The Atlanta prison is about to be investigated. Thomas Mott Osborne remained in Auburn, N. Y., prison for a week and learned all there is to learn about prisons except how it feels to stay in prison more than a week, and how it feels to have to go to prison—Julian Hawthorne knows that. Always in the van of journalistic enterprises, the editor of City Life has sent Mr. Lewis Allen to make a thirty-day investigation at our expense, and report to us weekly. Read of the horrors of prison life as told by our expert.

THE BASTILLE—Editor City Life—The horrors of prison life have never half been told. I am going to unfold a tale of suffering in this first report that will touch you deeply. And I am going to touch you deeply after I get out to repay me for my suffering. Why, I haven't had a crown roast or a planked sirloin in six days. You also neglected to state that there are no divans, no Morris chairs, no hammocks, no highballs, no daily papers, no baseball score cards, no catapaults with breakfast and not a cozy corner in the entire place!

The decorations, too, are not at all aesthetic. The color scheme does not harmonize. Nor does the color line. I had known that any government would deprive its forgers, thugs and murderers of these necessities in their prison life. I would have refused to take the assignment. I would much rather be office boy for Secretary of State and so get eight days off every week, or be writing White Hope dope for the Sunday-School Herald.

MONDAY—I was rudely awakened this morning. A coarse man came along and rattled my front door.

"What time is it?" I asked.

"Five-thirty!" came the reply. I turned over for more sleep. Ordinarily I am just getting to sleep at that time.

"My good man!" I added, "tell me at half after ten."

The guard giggled. "I see you are one of those funny guys. I'll tip you, seah! This is your first night; we chuck all humorists down in the dungeons."

There was something in his voice that led me to believe I ought to get up.

"Will you kindly bring up a cup of coffee, some buttered toast and two eggs boiled three and a half minutes?" and don't forget the fruit!"

"Can that stuff! Get up and go to work!" he responded.

This was distressing. You never mentioned work to me when you proposed I come here for a month. I thought all convicts could sit about their cells throughout the day, smoking cigars and reading magazines.

Say, this is fierce! I fall to see why criminals should be made to get up early and go to work the way ordinary honest men have to do.

I went down to breakfast. There was quite a party of us, and all we had to eat was white bread and butter, and cereal with milk and sugar, and coffee. Think of the poor convicts who have accumulated fortunes by knocking down old men and women with hanks of lead pipe being forced to eat these things when they might have been breakfasting at some swell cafe but for the officiousness of some policeman who arrested them!

They put me in the chair factory, and I had to sit down on a long bench to work. There wasn't a bit of leather upholstery on this bench. Please note this is another cruelty. I had to take a piece of sandpaper and smooth down the woodwork of the chairs. Coarse work, that sand-papering.

For dinner we had a horrible time. Only beef and mashed potatoes and boiled turnips and bread and butter and coffee. Not a blasted finger-bowl in the place, fact, I assure you. I know the public will rise up in horror when they learn this. The French party after dinner, no dumplings, not even a bit of Camembert cheese. Awful! (Not the cheese, but the lack of it.)

For supper we had toast and tea and hash. I wish you would start a crusade against prisons at once. Just think of it—day make us take our dinner at noon and our supper at night. This is a horrible state of affairs. So low-brow.

WEDNESDAY—Same as Tuesday, only more so.

THURSDAY—You may not believe it when I write this, but it is a fact there isn't a manure set in this whole prison. When I asked for one two of the guards got into a fight. One said I should be taken to the insane ward, but the other one said, "Aw, no! Here's just one of them humorists. That lets him out!" But it didn't let me out. I'm still here.

FRIDAY—Am nearly all in. Doubt if I can survive another week. Asked for a shower bath of sea water and they wouldn't let me have it. Had to use ordinary water from the reservoir. And the monotony of the food—would you believe it? We haven't had a cocktail with our dinners this week, and we have had beef twice during the last five days!

SATURDAY—Am beginning to get acquainted with my companions here. They are noble fellows, every one. When I look at the long line of receding brows and protruding chins, and see them glower at the guards and double up their fists, I pity the poor innocent chaps.

Takes, for instance, the case of poor Pete Pugley. He was thrust into this horrible place just for choking an athletic old man to death for all. The poor old man had asthma so badly he'd have choked to death anyway in a little while. And yet this gentlemanly murderer is losing his identity. His head is shaved and he wears the same sort of clothes as all the rest.

Number 45,748,719 is another good chap. All he did was to burn his father and mother and three invalid cousins to death in their cottage to get both the life and fire insurance money. Yet this innocent little lad of only forty-two summers has been given a good crack or even an all-painting for his cell since he has been here!

Think of the poor diabolical! Some of them are entirely out of practice; they have been here so long, where there are no pockets in our clothes. This is depriving them of their livelihood when they get out, as they cannot learn any other trade, and they get out of practice.

Yours on the inside looking out, LEWIS ALLEN.

P. S.—Play this up—We didn't learn the result of the various wretched series games for almost an hour after they were played!

UNPOPULAR SONGS This Is Really Worse Than Betting on the Giants

By WILLIAM F. KIRK.

"YOUR FACE IS LIKE NO OTHER FACE."
In far away New Hampshire, one of the New England States,
A man and maid were sitting while the doves cooed to their
maids.

The man was anxious for a wife to treat him kind and lenient,
And wanted for to wed that maid as early as convenient.
"The man I wed must tell the truth," the maiden then did sigh,
"He must be just like Washington and never tell a lie."
He promised there to tell the truth and start right in that day,
So giving her a honest hug, these true words he did say:

CHORUS:

"Your face is like no other face
That I have ever saw.
You are too tall, your eyes are small,
You have a twisted jaw.
You've got a mole on either cheek
And wrinkles on your neck.
I never seen a queerer face,
And that's the truth, by heck!"

The maid did give a little shriek and faint upon the spot,
She laid there stunned and silent like a partridge full of shot.
He did not seem to realize, that poor, unhappy youth,
You cannot please a woman sweet by telling her the truth.
She soon recovered from her swoon and sent that beau away,
And then she wed a drummer who could shoot the snake all day.
He calls her "little Venus" every time he takes a walk,
But often thinks the following words, which he has never spoke:

SAME CHORUS:

Wiggins Writes a Novel--Almost

Copyright, 1913, by the Star Company. Great Britain Rights Reserved.
WILBERFORCE WIGGINS decided he would write the Great American Novel. He was sure he could do it, for he had material at hand. It would fairly seethe with romance and adventure, and pulsate with life and vigor, and rank with the best of modern living. He was sure of this.

When he had completed the first chapter he showed it to his wife. "Him?" muttered Mrs. Wiggins, looking at the manuscript as a cat looks at a mouse. "I see you gave your heroine the name of 'Helen.' If I remember rightly that was the name of the woman who was once engaged to me."

"Honestly, I never thought of that," exclaimed Wiggins, nervously. "Really, it never occurred to me." Mrs. Wiggins looked at the manuscript as though she didn't believe it. "The description of the hero," she said, "with all the adjectives in her voice of a cobbler's street. 'His face fairly glowed, and the description of the heroine—author's hair, hazel eyes, dimpled chin—' Wilberforce Wiggins, it's a perfect description of her!"

"Of whom?" asked Wiggins, now as calm as a newly disappointed boy. "You know very well. Of that—of Helen. And that note you have her write in this chapter looks very much like the same writing of a note I found—quite by accident—tucked away with some old trinkets of yours."

"That note?" asked Wiggins, suspiciously. "It was signed 'H. W.' It that will refresh your memory. And—here Mrs. Wiggins stared hard at the page, and this description of the love-making at the beach, this that happened before you met me. If this is to be—this is to be—'I am to be ignored.'—Mrs. Wiggins was now gulping like a sculpin. "If I am to be ignored and made fun of and your cheap flirtation with 'Helen'—that's what Wiggins took the first chapter and tore it into bits. "Never occurred to me. Will write it over entirely," he said, to

Best Jokes from Here and There.

PULL A CORK.
"HERE is an article which says that a dead body can be raised from beneath the water by passing a mirror over the surface of the water." "But suppose it is the body of a man?"

MADE AN EFFORT.
"SAW her once when she couldn't talk." "How was that?" "The dentist had a napkin in her mouth; also a was of putty, a mirror, a rail of cotton and an electric drill. She couldn't talk, but she tried to."

BUSINESS.
"YOU run your automobile very fast through the streets," said the friend to the doctor. "Yes," replied the man of pills and bills; "I'm always in a hurry to get there; and, besides, when the times are a little dull, I can pick up a few cases on the way."

A BRIGHT OUTLOOK FOR THE BRIDEGROOM.
"SUSANNAH," said the preacher, when it came her turn to answer the questions, "does your betrothed man to be your wedded husband, for better or worse?" "Just as he am, Pehson," said the muscular colored scrologist. "Just as he am. If he gits any bettah AH'll know de good Lawd's-gwine to take him, en ef he gits any wuss AH'll tend to him my self."

APPEARANCES DECEITFUL.
"MY gracious boy," said the uncle, "you do certainly eat an awful lot for a little boy." "Well, sir," replied the boy, "maybe I'm not so little as I look from the outside."

GETTING READY.
"I KNEW you were coming tonight to call on my sister," said Willie. "How did you know?" inquired Mr. Staylate. "Because she has been asleep all the afternoon."

MORE HORSE SENSE.
"LADY—You ought to be ashamed of yourself to put such a tight checkrein on your horse!" "Thank you—Oh, he doesn't mind the checkrein, mum; but he'd kick like a steer if I put corsets on him."

MEAN MAN.
"MY husband is a very mean man about some things," complained the wife to the woman around the corner. "He has a deaf ear, and every time I try to call him down he acts as if he didn't hear me."

New Ones Heard in Atlanta

A Month of Installments.
"DID you say you were a month in your last place?" "Yes, madam—a week with the family on the top floor, a week with the lady on the third floor, a week on the second and a week on the ground floor."

Good Idea.
"THE MANAGER—I've got a new idea for melodrama that ought to make a hit." "The Writer—What is it?" "The Manager—The idea is to introduce a cyclone into the first act that will kill all the actors."

More to the Point.
"THEY say that when an ostrich is surprised he hides his head in the sand." "I wish to thunder he'd overtake his tail there," observed the man who had just settled a blood-sucking military bill.

Funny Tales From Everywhere

Taking No Chances.
"HERE—I'm afraid I can't let you have that drug, sir." Customer—Why not? Do I look like a man who would kill himself? Clerk—Well, I wouldn't go so far as to say that, sir; but if I looked like you I should be tempted.

Exasperated.
A FRESHMAN was taking in a large school where he had a reputation among the pupils for making some queer mistakes. One hot day he was taking a class which was rather disorderly. What with the heat and the trouble some boys he was very snappish. Having punished several boys and sent one to the bottom, he at last shouted out in a passion, "Go whole class go to ze bottom."

What She Wanted.
SHE walked into the public library and sweetly said: "I would like 'The Red Rose,' please." The librarian diligently searched the catalogue and came back with: "Oh, I beg pardon. I mean the 'Rhubarb.'"

Certainly Not!
E GREEN—I saw you at the theater the other night with a lady. A friend of the family, I suppose? Green—No, she is no friend of the family. She's my wife's mother.

AESOP'S FABLES

(As Translated by the Office Boy.)

Copyright, 1913, by the Star Company. Great Britain Rights Reserved.

Herklees an' th' Truckman.

ONCE there was a truckman who had been readin' about th' champion strong guy of th' olden days, a gink called "Herkles," an' so when this truckman was a drivin' along Whitehall street one day where th' mud is up to th' knuckles on yer knees, his cart got stuck in th' mud.

"I'll ask this here Herklees guy to help me outen this mess," said th' chump of a truckman, an' so he puts up a shout for Herklees for come an' boost his truck out of th' mud.

All th' folks gives th' truckman th' once over an' sides him up for a nut an' goes on. Finally th' truckman be says to himself that this here Herklees guy is a fake an' he climbs down an' shows th' truck outen th' mud with his shoulder.

This ain't a very funny story, but old Aesop what wrote it be sendin' a moral, which is that if youse wants anything done just go an' do it yourself.

Th' Crow an' th' Pitcher.

THE pitcher in this here story of old Aesop's was a dish to hold water in, not a base-ball pitcher. One day a crow comes along an' he was so thirsty he nearly choked. He sees this pitcher an' he gives it th' once over an' finds it has some water in it, but when he goes to drink he finds he can't reach th' water. Th' poor crow hops around an' around an' finally he picks up a little rock an' drops it in th' pitcher. Then he drops in another rock, an' another, an' he keeps this up for a long time altho' he's nearly dead for want of somethin' to drink. Finally he drops so many little rocks in this pitcher that th' water rises up to where he can reach it an' he finally gets his drink.

Moral—A guy with a thirlish throat will do anythink, even work for a drink!

Take It from Solomon

Copyright, 1913, by the Star Company. Great Britain Rights Reserved.

By J. J. Leibson.

IF ANYBODY EVER knew ANYTHING about women, Solomon was the person. He had, according to common report, an even thousand wives. Seems to us that allows him to qualify as an expert on matters matrimonial. Here is another batch of hitherto unpublished wisdom.

1. My son, consider the ways of Creation; out of the rib of man was woman made, and she hath ever been thine him a thorn in the side.
2. Man was but an experiment, made first, out of mud, and MUD hath been his undo ever since.
3. But woman was the work of a master hand, and lo! when a maiden blitsh up her hair, she is a match for any man.
4. She feinteth with the young for practice; she stalketh those mature for marriage, and the aged are her amusement.
5. For age is no protection to thee; thou art then off like the ripest fruit that faileth first.
6. But in the Spring of life, see that thou be not a Fall Guy; for when thou faltest IN LOVE, thou faltest UNDEED.
7. A woman is never too old to yearn, and a little yearning is a dangerous thing.
8. What is a man proffed if he gains the lool of his Dreams and loses his Liberty?
9. Liberty and Union hath a sweet sound in the mouth of an orator, but in truth, their ways lie far apart.
10. O my son, be not proud in thy folly, but give rite to thy tongue. Thou givest thy loved one sweet names, honeyed names, and callst her after the fowers of the field, thy Honey-suckle, thy Morning Glory. Yea, when there is sound of revelry by night, and the merry humbels are heard, and the harp and the psalter, she looketh to thee like unto a blossom.
11. But wait until thou meet her on the morning after; compare her then unto a Morning Glory, and admit thy folly.
12. Hast thou never heard the saying of the sages, that beauty is a Skin Gano?
13. Trust not a woman that telleth thee that she will never marry; she meaneth another than thou.
14. And when she maketh up her mind, she stoppeth not for Judgment; nor doth she pause for Discretion; she stoppeth for naught, save to get a little powder on her nose.
15. A woman hath but small religion; yet will she sacrifice often, and thou shalt be the goat.
16. The Pharos have said that marriage is a gamble; but even a gambler hath a chance.
17. Stolen kisses are sweet, and the prospect of them pleasant; yet linger not too long, for he who'll kiss and run away, may live to kiss another day.
18. But be that payeth Court must be prepared to pay Alimony.
19. Covet not the wife of thy neighbor, lest he give her to thee; be that seeketh a SOUL MATE oft findeth a FLAYER.

THE MORNING SMILE

South America

More Dope on the Country That's Going to Discover Our Old Chum, T. R.

YOU meet South America head on when you're going south. It is not a difficult place to find, and we never could figure out how Columbus missed it.

But then we don't think so much of Columbus. Although it was evident that some one must have lost America, when Columbus found it he never put a single ad in the "Lost and Found" column.

FOUND—One continent. Owner may recover same on identifying property and paying expenses. Columbus, Madrid Palladium.

South America, like North Africa, has a large frontage on the ocean. Here we use this frontage for bungalows, bass flannels, silk bathing skirts, banana peels, life guards, New York Central and other improvements. In South America they use it to land smuggled rifles on.

We know more about South America, but can't tell you this week.

OUR WEEKLY HEALTH HINT.

Never dispute the right of way with a railway train.

Household Hints.

If your furnace fills the house with smoke, close all the doors and windows and stay out on the porch. You will thus keep your eyes from getting red.

Screens may now be removed from windows. This will give the flies a chance to get out this week.

Eggs may also be served as dishables.

To cure a cat of swalling fish, keep only canned salmon.

Did You Know That—

It's hard to spell adimals, similar and sinners?

Fly fishing isn't fishing for flies, but trout fishing is fishing for trout?

Dor biscuits are not made of dogs, but doughnuts are made of dough?

A man isn't dogging it when he barks up the wrong tree?

It's worse to get football stories than world's series stories?

IN THE SMILE'S LETTER BOX

TO THE EDITOR—I, Crab most said. 2. Livingest death. R. T. WILLIAMS.

BASEBALL
TO THE EDITOR—My dope for next year's World's Series, Cuba vs. Yankees. If you like I will give you my dope on which of these will win.
DOC DONOVAN.
(Never mind—Ed.)

GHOSTS.
TO THE EDITOR—Some people do not believe in ghosts, but how do they explain a human voice groaning loudly in a small matchbox in a cupboard?
JOHN SKILLMAN.

IF what you say is correct, you agree with you that it's a pretty hard thing to see plain—Ed.

ABOUT CROWS.
TO THE EDITOR—Why does a crow caw, or doesn't it?
OBSERVER.
(Seems to us that a crow should caw. A crower crows, ain't it?—Ed.)

We're Impulsive, Says Our English Cousin

By William F. Kirk

Copyright, 1913, by the Star Company. Great Britain Rights Reserved.

"T"OO much hearty impulse you Americans have," said Lord Esterhazy, of the Dublin Poulvers. "Take this United States Series for instance, old fellow. Nothing but a lot of bally bouncers in uniform struggling for the baseball supremacy of the United States, and the Americans have the audacity to call it the World's Series. Too much like this person Barnum, deceased, who used to refer to his blooming American circus as the world's greatest show, as if there were no good shows in England."

"It seems like the whole world to us, the winning or losing of this series," I ventured.

"Precisely," said Lord Esterhazy. "That is the blooming point that I want to make, old fellow. With you Americans, everything is the whole world. Take your swag, for instance. 'Last Night Was the End of the World,' 'Love Me and the World is Mine,' 'I Love You More Than All the World,' and all that sort of rubbish. One might suppose that this little part of the world was the whole universe, leaving out England altogether. Not at all, my dear friend."

"But the beauty how you Americans make over your athletes is more than I can understand. I saw a headline in one of your blooming papers the other day which said 'Long Live King Matty!' For a moment I supposed that some new king had taken a bally throne, or something of that sort, but reading down into the article I saw that King Matty was nobody but a person named Mathewson, who is a vulgar tradesman, pitching a leather sphere for a livelihood and working so hard that he perspires. Fancy a real king perspiring. Rubbish!"

"Mathewson is a winner," I explained, "and we Americans love a winner. That is why we loved Washington, the father of his country, lie son."

"But he wasn't a graceful sort," exclaimed Lord Esterhazy. "Look at the way he took Lord Cornwallis's sword away from him; jerked it away like a boy catching a blooming club out of a stream. Fancy Lord Cornwallis seeing Washington's sword away without some sort of an explanation. And fancy any nation calling a baseball player a king."

"I swear, old fellow, that I was so disgusted with the praise your journals gave this person Mathewson and some Irish person named Connel Mack that I vowed I would never read another American paper. Too much praise for the common people. 'King Matty!' One would almost think that your blooming newspaper was speaking of King George."

"Why, last week I was riding in one of your poorly ventilated subway cars, not a bit like the Tuppenny Tube, and a bouncer sitting next to me shouted 'Matty win! I guess that's poor!' and smashed my derby quite down over my shoulders. I suppose the poor beggar meant to say 'I guess that's good!' but in his excitement he used the wrong word and broke my hat besides."

"Too impulsive, you Americans. Think of all the good too you spoiled in Boston, the perfectly beauty way you shot at the whales of our eyes, and all that sort of thing! Too impulsive!"

HEARST'S

CHAMBER SOCIETY of Peachtree

THE Nine O'Clock German Club is going to make a desperate effort to commence its affairs on this winter. Whether or not it succeeds to quit on time, or what it considers quitting time, I really do not say—and would not if I could, for I see no reason for giving my friends away in this manner. Anyway, the governing board has fully passed upon the giving of a prize to the first young woman on the floor after 9 o'clock, which is to be the hour for the official opening of the Nine O'Clock Club dance this winter. I suppose there will be some trouble in awarding this prize. The man who decides which girl was out first will have about as close a decision to make as did Umpire Connolly in the second game of the World's Series, when he declared Strunk out at the plate in the ninth inning. Oh, yes, I lost all my money, too, but I am still for Mathewson—right or wrong! Of course, if warning had been given, the reward of merit which the Nine O'Clock are to bestow would have been justly awarded, but now that the girls know I imagine that the prize will be to the swift, instead of to the girl who is naturally "tough." Anyway, the idea is good, and it will result in more parties being given at the proper time, too, of course. For you know, we shall have with us at that time the debutantes of the season, and the "little girls" should be kept up too late.

each of these buds expects to attend the Nine O'Clock—else the season is not begun auspiciously for her. The second Nine O'Clock, I believe, has been dated already for the evening of December 26, this to be a brilliant Christmas ball. Speaking of the Nine O'Clocks, I wish to say that I think it was very considerate of Constance Knowles to furnish a brother to be president of the club bachelor organization, as she was the cause of the vacancy.

ADAY or so after the recent visit of Richmond Pearson Hobson I rode down on the Peachtree car with a certain Atlanta belle who was a chum of Hobson's sister, Margaret, when she was a student at Agnes Scott. Our conversation naturally turned to Hobson.

"You know, I think Hobson was the kindest and not the wisest in that famous skating episode, which he underwent right after the Spanish war," she sagely remarked. "I think that date, I don't see how you know anything about it." I testily added, "And then she told me that last summer she and a half dozen other girls from Georgia and other States at Monticello were completely captivated by Richmond Pearson Hobson as soon as he arrived on the scene."

"I give you my word, every girl in Monticello was in love with him before he had noticed a single one of us," she said. "The second morning of his stay the weather was awful cool and no one expected to take a dip in the lake that morning, until Hobson appeared on the bank of the pool at Chautauque Park wearing 'his' bathing suit. Then every girl there 'swam' in the number—'New' into their bathing suits and got into that icy water, where we shivered and shook and nearly froze to death—but we stayed in the pool as long as Hobson did, anyway."

SUCH a fine time Marion Acheson is to have this autumn. I believe she is already engaged to be bridemaid at two weddings and to "assist" two buds to bloom out besides making a series of visits to various other places. I am afraid that Atlanta will know her no more until the holidays come on, anyway. Marion Acheson, you all know of course, has become one of Atlanta's most popular girls—and I mean that, though it sounds as if I were only writing a society notice. She arrived in Atlanta early last summer, I believe, when her father and mother moved to this city. A large introduction party was given for her by Mr. Robert Maddox, and after that her own special charm and her exceptional beauty quickly made her a belle. The brides whose weddings were or will be graced by Marion Acheson's attendance are Nashville girls—friends of her school-girl days. On October 21 Wilkey Hall was married to Henry Fraser, at which affair Miss Acheson was maid of honor. Some time this week—on the 25th, I believe—she will again "stand up" with a bride. This time Margaret Trousdale will wear the white satin and orange blossoms, and her husband-to-be is Rogers Caldwell. All of these are Nashville young people. Soon after the wedding festivities the "buds" will be giving their parties. Miss Acheson will first visit Miss Ellen Stokes and after the debut of Miss Stokes she will be the house guest of Miss M. Wilber, another Nashville "bud."

I HAVE the pleasure to announce another debutante to the list which will adorn Atlanta's social record this season. Elizabeth Boyd, daughter of Mr. Isaac Boyd, who has been "on the wing" a year or so with her mother, spending the winters in Florida and the summers in various cities, will come home for her debut season. That is, she plans to have a debut in Atlanta as well as one in Nashville, where she is spending the autumn. Elizabeth's Nashville debut will be made at a brilliant affair to be given soon by Mr. and Mrs. John H. Carpenter at their magnificent new home near the city. A large dinner party for her has been set for October 29 at the Hermitage Hotel, when Mr. and Mrs. Charles Hamilton will entertain. This charming young woman was a guest in Atlanta this summer, visiting her friend, Miss Carolyn Kies. She will be excitedly entertained when she comes to Atlanta to make her bow, and I am sure everybody will delight in the "patronage" of Mrs. Boyd and her daughter which prompts them to come out of the window, or take it home, or hide it!" She declined on the latter course.

And so, the young man who has been bewitching the town of his beautiful statue—I am tempted to believe he is not mournful because of any particular temperament—will find it to be one of the pictures on his own wall.

ENLIGHTENED girls take notice! That finger of your left hand is going to be officially engaged. Whatever its weight heretofore, be it a modern half-carat or a stunning three carat, hereafter measured in carats, it will be greater. While you are planning out that delightful future of yours, a thoughtful act of fathers at Washington have changed this entire social affair. In the days to come it will be a matter of fact, and that brand of carat is a little more than 2 1/2 carat weight than the old-fashioned children, it is confidently expected.

More Juvenile Georgians Will Be Selected for Honors at the Panama Exposition.

HANDSOME boys and girls of Atlanta have been judged worthy of a conspicuous place in the Temple of Childhood of the 1915 Panama-Pacific International Exposition. Their portraits will be hung on the walls of the temple in fifty characteristic photographs of representative children from all over the world. Selections will be made in each State by the exposition commissioners, the Governor, Congressmen, Senators and other State and public officials and men and women of prominence. An official photographer to the exposition will be named in each State and foreign nation.

Wesley Hirschberg and Lewis D. Phillips of Atlanta, have received from Richard M. Bayers, director of exhibits in the temple, notice of their appointment as official photographers for Georgia. A letter from Director Bayers bears a glowing tribute to Hirschberg and Phillips as photographers of child life.

Already the official photographers have been busy in making the pictures of children selected as representatives and beautiful. The children whose pictures have been made and will be sent to San Francisco for exhibition are Merrill and Charlotte Collier, son and daughter of Mr. and Mrs. Andrew Collier; Jane and Betty Davison, daughters of Mr. and Mrs. McLary; Louis B. Magid, Jr., son of Mr. and Mrs. Louis B. Magid; Charlotte Meador, daughter of Mr. and Mrs. Frank Meador; and Roy Collier, Jr., son of Mr. and Mrs. Roy Collier.

Prizes in gold and commemorative medals will be awarded children whose pictures appear. Altogether, this feature of the exposition will be the world's greatest congress of beautiful children. It is confidently expected.

CITY CLUB Polly Leachtree

Mrs. Hal Morrison, Jr. An attractive young married woman, who has been living in Atlanta since her husband resigned from the navy and entered business here. Mrs. Morrison resides on Boulevard Circle. (Photo by Hirschburg & Phillips.)

AM gratified to see that Mrs. John Marshall Stanton, with all her duties as first lady of the State and as one of Atlanta's leading hostesses, is finding time, or taking time, to continue her active work for music. As the president of the Atlanta Musical Association, Mrs. Stanton has simply done wonders for the art of sweet sound. She has awakened interest and has given practical aid to the association in every way. And here I will remark that the wife of the Governor of Georgia is not one to tell her name and not her interest and help to any organization or cause. She is a worker, and enters heartily into the spirit of anything which she undertakes.

The latest achievement of Mrs. Stanton for the benefit and pleasure of music-loving Atlanta, was a lecture given by John C. Freund, the noted editor of Musical America, October 21, at the Capital City Club.

WHAT with her gown and dainty socks chasing each other in a mad race for feminine favor, I wouldn't be a bit surprised to see the next article in transparent skirt blocking Whitehall street. But I will admit I got a thrill last week—during ballroom styles have fallen to impart when I learned that one of the ultra moderns had traveled Atlanta schoolroom. It's true they tell me.

A fair young teacher waited in one recent morning trying not to show pride in the new skirt which really adorned her. She might have exhibited a young for sister teachers had she stopped right there, but she didn't, for shortly concealed by the up-to-date garment was something not new in history. Yes, it was a full-blown rose embroidery on the stocking.

While Miss made sure and contented to Annie May somebody. There were too much for the school. They differed. So the principal of that particular school has become a canonized saint thereabout, favoring the older established styles.

JUST now the turkey trot has given way to the possum trot—that is, I mean, the possum hunt. You know there are great possibilities in a possum hunt. Of course one is to find a possum in the shadow of a great tree with a sweet girl near by and the night's witchery working over him. And what does one gain who takes nothing? One of the "happy" affairs of the week, they tell me, was the possum hunt given by Mr. and Mrs. Will Klier for two popular debutantes, Margaret Grant and Adeline Ellis. The Kliers and their neighbors at the Peachy Perry road are fond of possum hunts and their boys often entertain the fortunate young men who are friends of theirs at these delightful hunting parties.

It seems that small clubs are a fact of the moment for Atlanta girls. The membership of at least two social organizations who have been formed in the past fortnight seem to number only three or four girls. Whether or not the small membership of these clubs is caused by the fact that no larger number of girls with similar tastes can be got together, I do not know. There is the other club made up of three clever girls, Miss. Princes, Elizabeth Morgan and Nellie Klier. These girls are going for serious reading and study every week. And these girls have adopted as their mascot that famous little statuette which "sees no evil, hears no evil, speaks no evil"—meaning by it the broader term of gossip.

Of course these girls do not expect to remember their little blind dog except when at their morning meetings once a week. During that time they are to read and study the lives of great musicians and great artists, with in season no word of gossip, even of the most harmless kind, is to be spoken. One of the girls told me that at the first meeting the other day she was "just dying to hear about little Winnie's sweet little romance, but she didn't dare mention the subject—and it was the day after her engagement was announced. But she assured me she didn't speak of it and except Mr. McNamee, the entire meeting. How is that for self-control?

Another trio of girls who have "shut themselves into a club" will spend a morning each in "dancing day." These girls are Misses Mary, Marion Goldsmith, Alice, and Mary. There are four girls in this club. Besides, since before the war, the golf club should engage its membership to 14 or 16. The open air and the exercise for at least one morning in the week will be of great benefit to the girls who spend so much time in the ballroom through the week.

BELIEVED I told you about the young woman who was charged with an infidelity, now near Pittsboro, and a few weeks ago. And I will remember the clock in her hand stockings were largely responsible for the fastest time she ever made, and that her skirt was narrow since that time the dressmaker "gave" given exactly narrower, as the following story will prove. I will not give the exact date, but it happened between the changes of the street and the last month. Since the Brookhaven Club has been built there has been a mild complaint from some about the behavior of the girls on the bus running between the

street car and the club. One young woman in question went to the club in her pretty new frock and when she reached the bus she was presented with a problem as serious as "Voice for women" has become. To be clear, she could not get in. Her dilemma ended happily, however, for her companion lifted her in his arms and made her way. Of course, the young woman was delighted, but she did not see the smiles of amusement that followed her.

You know about the turkey trot. The possum hunt. The bunny hop, as like as not, is on your list.

You know the vessel dip, of course. The pigeon wing. And that great dance, the crazy horse. The latest thing.

I love the neat gorilla flop. The kangaroo. The proper place to give a hop is at the top.

"DON'T think I shall learn the new dance," said one cautious young woman. "I have always been taught that the woman who hesitates is a fool." And that is certainly what she meant down in the latest trip. A new novelty to become the fad in Atlanta ballrooms. At a dance last week, when guests were hidden to a "turkey-trot party," the entire evening was spent in the hesitation and careful dance, though I do not predict for the hesitation the future of success which was given the turkey trot. For one thing, it is hard to do, and for another more subtle in its charm. Just what the name implies—a couple of cooling, cooling, cooling, dreamy steps, and then a bit of hesitation, as if listening for the whistle of a "sweet nothing" from your partner.

Now, for the graceful dancer and the good looking one, the "hesitation" is all right, but I do think the "turkey-trot" is the fad of the future. The short ones, in fact, all who wear the athletic appearance should go with the athletic dance. The fact is, it is a very medium one between the "animal dance" and the "hesitation" and is becoming popular. Among the girls who wear the "hesitation" beautifully are Jennie D. Harris, Pamela, and Carolyn King. Of course, the Hoke Smith girl, a date this afternoon, saw those two girls dancing and not knowing them, tried to open up questions for their going on the stage. He was charmed when he heard who the two sisters were. Of the told friends that, in his opinion, there were no dancers on the professional stage who were more graceful than these two young daughters of United States Senator Hoke Smith.

The L of Society

WITH twenty-odd debutantes awaiting their presentations in the first half of the winter season, and with an equal number of evening dances, many of them intended to debut of the new generation, the young set has an outlook that furnishes no ground for complaint that the winter's prospects are not equal to those of last year.

The first events of this kind are to come with the last day of October. Miss Margaret Grant will be the first debutante to be formally presented, the date of her presentation having been set for October 23.

Mrs. John Williams Grant will introduce her daughter to her married friends at an afternoon reception to be followed by a dinner-dance for her friends among the younger set.

On the following day, Miss Katharine Ellis, a debutante, shares honors with Miss Constance Knowles, whose marriage to Joseph Cooper takes place the following week, at a buffet luncheon to be given by Mrs. R. E. Gentry, of Tampa, formerly of Atlanta, at the Vauxhall street.

The luncheon will honor a limited number of young matrons, as well as Mrs. Gentry's friends among the unmarried set.

Miss Adeline Ellis, another charming debutante, and her guest, Miss Adeline Davis, of Virginia, will be honor guests at a Halloween luncheon Mrs. Wilmer L. Moore gives Friday.

The bride-elect will have a share of social pleasures next week, and for several weeks following will be tendered a brilliant series of affairs.

The initial social event of next week is the luncheon which Miss Harriet Calhoun gives Monday at the Piedmont Club for Miss Sarah Rawson, whose marriage to Marion Smith will be a brilliant ceremonial of November. Miss Calhoun's guests will include only the girls who are to be Miss Rawson's attendants.

Miss Rawson will be the guest Thursday at a tea to be tendered by her aunt, Mrs. Thomas P. Westmoreland and Mrs. William H. Hammond, at the Piedmont residence of Mrs. Westmoreland. A group of relatives will assist in entertaining, and the occasion will be marked by elegant details.

The society party for Thursday, and arranged for a visit, is Mrs. John B. Howell's party for her sister, Mrs. Lewis Clark Smith, of Nashville and Jacksonville.

The Halloween supper party and dance which Mr. and Mrs. James Richard Gray give Thursday evening at Crestview will compliment the son, Walter Frank Gray, and his bride, formerly Miss Jessie Mack of Nashville, when 100 guests will be entertained.

The Halloween ball to be given on the following evening at the Piedmont Club will assemble 300 guests, who will find elaborate decorations and music. The occasion will rival in splendor, Black, white, cream and ecru. Several large parties will be given in this occasion, among them a dinner of 25 covers, which John Brice gives for Miss Sarah Rawson and her fiancé, Marion Smith, and one at which Miss Jessie McKee entertains a group of her friends.

Following after Mrs. Floyd McRae gives a tea for Miss Rawson and her fiancé, Marion Smith, on December 1. Several informal afternoon parties will be tendered and the week will be the gayest so far this season.

M. RICH & BROS. CO.

Women Assembling Winter Wardrobes Will Be Charmed With This Showing of New Mid-Season Styles in Suits, Coats, Dresses, Furs and Blouses.

A merchant may have more than a thousand suits, many of them alike. A suit specialist will have half that many suits with scarcely any two alike. We are suit specialists. Not quantity, but style-variety is our ideal. We don't buy a thousand suits at a time; we do buy scores of fresh new suits every week. It is nothing to have a stock of a thousand suits. IT IS ACHIEVE-MENT to have a stock that a woman looks over and exclaims, "Ah, that is the very suit I want." Within the past ten days we have received upward of three hundred new suits, among which is the very suit you want. Though the assertion is broad and sweeping, it is based upon your knowledge of present styles and desire for the beautiful. Among the most popular suits are those at

- \$25 — a fashionable boucle suit with broad belt to emphasize the knee tendency. Black velvet cuffs and collar and velvet button trimmings. Lined with black silk-satin.
- \$35 — a plum colored raincoat in the newest short skirt and wide hem of plush to match coat. Collar is lined with white broad model. A copy of Fartian shade of plum.
- \$45 — a "compeone" suit with black broadcloth plaid and broadcloth skirt with wide hem of plush to match coat. Collar is lined with white broad model. A copy of Fartian shade of plum.
- \$29.50 — a satin finished broadcloth development in dressy ten-button exterior. Velvet cuffs and collar; button set on shoulder. Artistically draped skirt, button trimmed.
- \$39.50 — the fashionable wool corduroy in the latest two big buttons of the short cutaway coat; one button at collar, the other at the broad belt. Black plush collar. A simple suit, but very striking.
- \$50 — a wistaria satin finished broadcloth, has fancy cutaway coat with broad belt collar and cuffs of skunk fur. A new three-tier skirt completes this stunning costume.

If Milady Wishes a Fashionable Silk Petticoat, She Can

most surely find what she wants in just the desired silk and shade.

- Measurables, \$2.98 to \$4.95
- Jersey tops, \$4.95 to \$6.50
- Crepe de chine, \$5.00 to \$10.00

A new idea is a mesalline petticoat with a plaid inserted in the second pleated bottom, \$4.95. The "Kist" silk petticoats that you see advertised in the cars here in wonderful variety.

(Ready-to-Wear, Second Floor.)

Clearaway of 20c to 50c Laces

500 yards or more of odds and ends in shades of laces, chantillys, flit, venise, dam and fancy laces. Bands and edges 2 to 7 inches wide. Black, white, cream and ecru. 3 to 20 yard lengths. Formerly 20c, 25c, 35c, 39c and 50c; for a quick clean-up, choice 10c.

50c Laces 39c

12 to 20 inch shadow laces. Roundings for new blouses, dresses, corsets covers and trimmings for negligees and crepe de chine petticoats. Cream, white and ecru.

12 1-2c to 20c Embroideries at 10c

—12 to 1 inch ribbon headings and 2 to 5 inch Swiss and Nantook edges and tassels.

8c to 10c Val Laces at 5c

—A little clear-up of edges and insertings for flouster caps, fancy aprons, doll dresses, etc.

(Laces—Main Floor, Right)

Knitted Goods to Keep Away Jack Frost

- Knitted Legging, 50c to \$1.50.
- Old Ladies' Hoods, 98c to \$1.95.

50c Silk & Cotton Fabrics

The color line is broken and we can order no more from the mill. Having been our most popular silk fabric in Van Dyke pattern, edged at top with silk ribbon, and beautified with hand-made French flowers. It's the most adorable and desirable material we have ever seen at \$2.50, which figure scarcely covers the cost of the materials at retail price.

Undressed Dolls The Opening Days

Get them now in time to have them dressed by Xmas.

(Annex—Main Floor, Left)

Fashionable New Kimono Crepes

Our cotton crepe de chine looks like a silk—the printed designs are that wonderfully rich and colorful. 90c. Another crepe at 25c in Japanese flowers; white others are light or dark grounds in Japanese and conventional patterns at 25c.

CHATTER SOCIETY
POLLY PLACHTER

not hard to give! "She used to paint so well; I hope she hasn't given it up since she married?" and the gleeful man replied, "That's one of her hidden arts. I think she does keep it up, though." The dear old lady, of course, was not surprised at her mistake and her gentle remarks, though somewhat misdirected, succeeded in raising amusement and good cheer, despite the mistake, and that was a result she would like, anyway.

OVERHEARD a compliment which sounded somewhat doubtful the other night at the Hirschburg & Phillips wedding. A charming young woman, formerly a school teacher, has grown larger since she left Atlanta several years ago, was really quite delighted when one of her girlfriends, admiringly gazing with open admiration at her white chiffon and tulle dress, remarked, "I declare, Polly, you look like a covered wagon this evening!" Now, "Polly" only laughed, whereas another woman would have been rightly indignant, the reason for her pleasure being that she was in ill health when she left Atlanta, and now, now, now, with perfect health, so, you see, she could afford to laugh at the backhanded compliment.

AN Atlanta 2-year-old celebrated her birthday not long ago with a turkey trot. I am told that the little news at Helen Boardman's party were waiting as they danced the trot with the abandon of childhood and the grace that several months' training by a devoted kindergarten teacher had imparted. The little hostess, whose birthday cake held only three lit candles, is devoted to the dance, I hear, and has fair to be the winner when the first 100 days. I recall a turkey trot party of the summer when I was the first I had heard of for children, though I suppose that the 15-year-old sales girl who gave it would not like the idea of the smart young boy I know, who is a great dancer, to be invited to the party. Now, I know that while this young man was a good dancer, he was

Davison-Paxon-Stokes Co.

200 Beautiful Dresses
Have Just Come and Are
Priced for Monday at \$17.50
Regular \$35 to \$40 Values

The event is even more remarkable than the sale of last week, from a viewpoint of variety and scope. There are 200 Dresses, every one new, just out of their wrappings—shown for the first time Monday. Any one of them worth \$35, at a very low estimate, and a great number of \$37.50 and \$40 value.

Dresses for Street, Afternoon and Evening

We can not tell you adequately of their real beauty and charm, and can only hint of the great range of materials, colors and trimming features.

The materials, Canton crepe, valance crepe, crepe de chine, broadened crepe, all of beautiful quality. Plenty of black, blue and white crepes de chine with plaited pleurms. Then in lovely novelty dresses, including the broadened crepes, there is every new and wanted color one could ask for—such as brass, taupe, wine, bronze, terra cotta, rose, brick, mahogany, wistaria, amethyst and all the blues, greens and browns—besides the list of evening shades.

They are beautifully trimmed with furs, soft laces, nets, rich velvets and various other effective accessories.

We believe you will agree that they are the most remarkably good Dresses we have ever offered at so low a price.

Fourth Floor—Monday

A Big Millinery Sale

13 "Gage" Pattern Hats

\$25.00 Values
Offered at . . . \$9.95

No Two Alike—Only One of a Kind

There are only 13 models left—only 13 women to share the opportunities and economies of this great event.

Colors are black—trimmings are feather fancies, moire ribbons, etc. The woman who knows "GAGE" values at regular prices need not be told what to expect in the way of styles, trimming effects, nor quality of materials. No need to tell you the styles are just brought out, nor that they are fresh and new.

What an opportunity it is, then, to buy GAGE models at **Less Than Half Their Actual Worth** almost at the beginning of the season and a full season's wear ahead.

TRIMMED VELVET HATS

Grouped in Two Lots

\$7.95 for Hats Formerly \$15.00

\$4.95 for Hats Formerly \$12.45

We feel safe in stating, with all possible emphasis, that hats of such rich styles—such excellent materials—such high-grade workmanship have never before been offered at anywhere near these prices. They are hats you would expect to pay their former prices for.

They are splendidly made on buckram frames of erect pile silk velvet and hatters plush in black—in all the newer shades.

The trimmings are fancy feathers, ribbons, etc., in individual styles in black and color effects.

The real value of the trimmings on some of them are worth more than the sale price of the hats.

Hand-Blocked Velvet Shapes \$2.95

Actual Value \$7.95

Exact copies of French side flares, rolling brims, sailor effects, soft and blocked crowns—in black only. Materials are hatters plush, silk beaver and erect pile silk velvet.

Hatters Plush Shapes \$1.95

Former Selling Price \$3.95

A dozen or more distinct styles are represented in this assortment. Colors are dark rich tones of green, taupe, old blue, navy, brown, etc., in fact all the most favored shades.

SMITH & HIGGINS
Walker Street or Lucile Avenue Cars

fashioned coat, which Congress has refused out of doors. I hasten to assure you that this will in no way affect the symbolism of that emblematic ring or learn the significance of the delightful sentiment for which you wear it.

THEY tell me Viola Johnson, of Macon, was the belle of the ball at the brilliant one and a half mile marked the opening of the season at the Freshwater White one afternoon last week. The season for Southerners at the White is in the summer, and while Georgia was brilliantly represented in July and August I think Viola Johnson and her lovely mother, Mrs. McKen Johnson, are the only divorcees there. The present season, however, is greatly favored by another folk of the East, Miss Johnson and her mother have worn some beautiful clothes, and have taken conspicuous part in all the gaieties. I heard that Viola was one of the most successful of the room hunt party which culminated the social calendar a few evenings ago. It is said to be perfectly delightful to see the way in which the dilemma of the divorcee and the young ones, fall into real American ways and amusements. One of the girls wrote me from the White describing the real old-fashioned Virginia supper of hokese, fried chicken and new corn, which, which happily was followed by the room hunt, mentioned above. The hostess of this Southern party, my friends, was "Miss Viola Johnson, divorcee." The room hunt was a very clever and the young folks over the Mountains for miles and miles in the moonlight. This week Mrs. Johnson comes home and understand, and Viola goes for a stay in New York.

I like the country fair, my boy.
That is no joke.
And of its friends I most enjoy
The merriment again.
I hope near it, heavily pay
The tribute due.
I contemplate in fervent way
Its golden hue.
It is the cream of all the crop:
I love that quash.
I love in the farmers shop
And warmer "Gage."
I like to contemplate its curves,
Its gaudy size.
Of all the friends it most deserves
The major prize.

AND now we have with us the season of the State Fair. This fair that Atlanta has no such thing, the Central City for once being ahead of us in this line—or is it behind? For the sake of old times, some of the boys went down to Macon and wandered over the State Fair grounds, inhaling the odor of—well, of the State Fair grounds—and thinking of the days when we were young, Macon? Do you remember when you used to go to Piedmont Park and eat popcorn and watch the sideshow and walk about the grounds—and everything you did was glorified because you were young and in love and the object of your love was strolling along with you and eating popcorn out of the same bag? And do you remember the thrill that came over you when you—the two of you—went into the show and sat in the gloom to watch the two-legged calf or the wild man of Borneo, and in the gloom "he" told your hand fearfully and tenderly? And do you recall the miles and miles of preserved fruit you saw there—Lard preserve vs. fruit, paying the price the farmers' wives do for a husband and a home?

I like a State Fair, and I was one of those who slipped off and went to Macon to see one last week. Of course the Governor and Mrs. Hutton and their party went down to state and looked officially on the pie and things, all by myself, recalling a day one only once, when her White I am not going to let you be guessing my age?

I HEAR that several of the girls have been obliged to purchase new automobile coats of dark, shimmer hue of jet. The friends? Well, you see some Hickam have a new car and the old automobile—blue of the state—suppose. The car is a handsome one, and I can't imagine any real, old-fashioned automobile to the kit, who rules in the state.

A FRENCH incident at one of the musical affairs of last week. Mr. John J. French, a native Atlantaer who attended the fair with a New York friend, who is the brother of her husband-in-law. In the preceding party, a dear old friend, Mrs. French, who is a French girl, came up to introduce the brother-in-law to the friends. The brother-in-law, who is a French girl, was looking only the name. The French girl, who is a French girl, was looking only the name. The French girl, who is a French girl, was looking only the name.

Miss Sadie Jacobson

Whose engagement to Samuel L. Ginsburg, of Boston, is announced. She is a Capitol Avenue girl, who is popular in her circle.

CITY-TOWN SOCIETY

meeting of the State federation in Columbus, Oct. 25.—Miss Kath-
leen Higgins Golden was married to
William Clarke Pease, Jr., Thurs-
day evening at 8 o'clock at the home
of the bride's parents. Mr. and Mrs.
J. P. Golden, on upper Second
avenue, the ceremony being per-
formed by the Rev. O. B. Chester,
pastor of St. Luke's Methodist
Church.

Columbus

The bride was attended by her sister,
Miss Vera Golden, as maid of
honor, and the only bridesmaid was
Miss Louise Shepherd. Norman
Pease, brother of the bridegroom, was
best man. The guests were a few
intimate friends.

Another event of the past week was
the marriage, Tuesday evening of Miss
Lena Belle Newman to Walter Owen
at the home of Mr. and Mrs. J. L.
Newman on Ross Hill. The bride was
attended by her sister, Mrs. Lawrence
Wheatley, of Atlanta, who was maid of
honor, and Miss Lela Newman, as
bridesmaid. The bride was given away
by her brother, Chester Newman.
The ceremony was performed by the
Rev. B. S. Senial. Among
off-attendance visitors were Miss Pa-
tricia of Union Springs, Ala., Mr. and
Mrs. J. F. Weather and Miss Leslie
Weather, of Atlanta.

An enjoyable event of the past week
was the birthday party tendered by
Michael Andrews by Mrs. Andrews on
Thursday evening.

The Bachelor's Club has been re-
organized, and the membership is
limited to 50 members, has almost
been reached.

CUBAN FRENCH HEEL FOOTWEAR AT ALLEN'S

The prevailing style tendency in footwear this season is toward
extremely dressy and beautiful designs.

The better class of boots, colonials and slippers for the winter of
1913 and 1914 have a decided similarity to the beautiful creations of
the Louis XV period.

It is almost necessary in order to be well shod this season to have
the new Cuban Louis XV or Spanish heel on one's footwear.

This is a feminine type that instinctively ap-
peals to those who would cling to the charm of real-
ly beautiful things and enhances
that feeling of satisfaction that
every woman experiences from
being correctly appareled.

We show black satin, patent
leather and gun metal
boots with the new Cuban
French heels at

Extraordinary Sale of

Fine Imported Evening Dresses

Paquin, Lucile, Poiret, Doucet and Callot Models

Our very latest purchase was an unusually happy one—one hundred very handsome
Evening Dresses and fine Afternoon Costumes, including a few 2 and 3-piece Suits of Velvet,
Broadcloth and fine Brocades—one of a kind.

Atlanta women have never before known such an opportunity to possess the finest Gowns
from such famous designers as Doucet, Poiret, Felix, Callot, Bernard, Paquin and Francis at
such a figure.

These Dresses come to us as such things do very frequently, though it is, indeed, rare
that we chance on such a handsome lot, fitting in so beautifully with the season, and to be
able to buy them at one-half and one-third the full prices such high-class goods are expected
to bring.

We have chosen fifteen models to tell you about. You may like the remaining 85 even
better. Come here Monday morning and see them all. Even though you are prepared to see
some nice gowns, you will be surprised, and, of course, delighted with what you see here.

Selling These Dresses at the Quoted Prices Is More Like a Sea-
son-End Sale Than a First-of-the-Season Offering of New Goods

For MILADY'S FASHION PROBE

By MME. HAUTE MONDE.

A strictly new idea, and a charming one, combining the softness of the manure and the firmness of the ostrich, are muffs, stoles and small neckpieces made of both of these feathers.

Newer barbers have less collars and cuffs, ruffles, fichus and other dainty neck fabrics coupled so much of lady's woman's situation as they are doing now. And newer fashions have no much thought and care been expended upon them to make them fine and dainty or so much exquisite hand-work.

With lace are the material of excellence of the new French plaitings and shadow and crepe effects are much sought after. The plaiting and ruffles are exceedingly smart, especially when edged with a narrow line of black. The simple-shaped skirt can make an entire collar of these plaitings, using a tiny fan of orange ribbon or velvet as a finish in front.

And behold this! To cover dress suitable for walking the French modistes now attach little ruffled ruffs which pass cords running to the waist to join another cord which is drawn at will around the waist when the lady prepares for a promenade, and loosened within doors, thus allowing the dress to assume its natural length in the saloon.

The new mesh bags have alternate stripes of varying widths made with the silver and gold linings. These are a peculiar effect that may be likened to the mesh in silk, an elaborate reflecting of light and shade that is very attractive. The stripe effect (and the mesh as well) is often carried out in the frame of the bag, which is uniquely hand-sewn. The bags are slightly larger than those of last season.

If the new wrist strap becomes popular there will be no end to the fad for bracelet watches, for this strap has a device that will hold any size or kind of watch. All that is necessary is to pass the strap over the wrist and through a slit in the strap and let the watch in the holder, which has a strong spring clasp that can be adjusted to hold the lower rim of the watch. When the strap is buckled on the wrist, the watch can not be removed—until, of course, the bracelet is taken off.

Boards will be worn as usual, the low bodices and collars provide a greater sphere of usefulness for these jewelry ornaments than before. The latest boards come in all the light shades, and there are some novel and Japanese effects. White lace boards have their beauty, and are worn with outlinings of bead and crystal.

Ostrich feather boas are a trifle shorter than they have been and are finished with bows of soft mosses in black. The prettiest ones come in black, used in combination with color such as beige, green, king's blue and purple. All-black boas will be extremely worn, some of them being "rippled" off with tassels and others with ribbon.

Flowers for corsage bouquets are generally smaller than before, except the gorgeous big roses and other flowers that are worn at the back as a finish for the high fitted waistline.

Even when one wears gowns of summer colors it is quite easy to be killed by using any one of the new lines. As so much of the skirt shows, the dress with the skirt in front or back which is put in the middle of the skirt and is therefore not made and in the hem that is turned up over the skirt as well as coats. The line is a clever touch.

The white serge now being used for full suits is heavy in texture, but at the same time supple. It hangs well and wears eternally to quote a leading Parisian tailor. The serge is made in a peculiar shade of pale blue which is lined with gray.

The latest military models are exceedingly picturesque in outline. The soft crown is in great favor and bands of sable and studs are freely used on the brims of close fitting hats and toques. Many of the best military models are composed of simple waist, while in others embroidered and de sole is substituted.

Women may just as well accept the low back for the street, because the fashion is established. But the acceptance should be accompanied by discrimination. The mere fact that the low back is in fashion has nothing to do with the matter, we have gotten far beyond such reservations.

The line transparent sleeve is shown on many of the handkerchiefs. Sometimes they are made again there is very little difference, the effect being that of a veiling. They are very long, extending over the hand so that even the fingers are hidden.

Gray in all possible shades is one of the colors of the season. Pearl gray being most successfully used for really rich and delicate shades of smoke gray is being very much used for dress and decoration with bands of gray.

It is increasingly popular, and it is a fitting tribute to the way it is heavy enough to avoid the thin character often in the present. It is being used in many and important ways. Moreover, it is being used in many and important ways. Moreover, it is being used in many and important ways.

Velvet is to be more used than on frocks for little girls. In the form of shirred collars and cuffs it is being used freely, and velvet coats are being worn with ease.

Material lace is to be more fashionable than ever this winter, as is

instance, has a border of leopard or other end, and the matching scarf is generally bordered at the sides with this novelty fur. The matching collar is in the above shows a combination of ermine and seal, and bands

of the ermine appear on the oval scarf. Chiffon is also used in combination with fur for the more dressy collarettes that complete the calling costume. In contrast to these collarettes

there are long, lustrous stoles that wrap and wrap about the figure. Some are in the form of scarfs, and some are in the form of stoles, and some are in the form of stoles, and some are in the form of stoles.

generous in size. They offer an excellent opportunity for combinations of fur, an opportunity which the furriers, even the more conservative ones, have not missed. Moha, for example, will be combined with a

lustrous, striped fur which some call leopardine and others Russian moses. The fashion for combining fur with delicate summer materials has caught the capricious fancy of the Parisienne

She revels in the incongruity of the idea and glories in the delicious effects produced by the juxtaposition of unexpected materials. White fur sable will be largely used on dresses and ball dresses this winter.

Reign of the Sash

The reign of the sash is by no means over, nor is its end in view. It was worn so extensively this summer that even its admirers feared it was being overwhelmed by its own popularity. Instead, it has appeared on many of the smartest gowns in more refined form than ever. In attempting to achieve an individual touch by the sash, it is well to remember that the sash, after all, may be, is not for all figures.

The woman with pronounced hips—if there are any men who will admit to these appearances—and the short, stout woman must forego the temptation to wear a sash. The becoming effect of the sash is the sash in well-adjusted form. Some women can wear it successfully knotted low at the side, while others must demand a long, loose bow in the back. Every girl who only knows sashes with youth and lissence, should attempt the delicate bow between the shoulders in the back.

The sash, of gentle, washed around the hips gives the fashionable line waist line in a most satisfactory manner. The wide leather belt performs the same feat equally well, especially on tall, slender, youthful figures, and as these slender mode belts come in every conceivable color they can be depended upon to add an effective color note.

'Corots' and 'Troyons' Cheap at This Sale

But All Paris Knew the Masterpieces of Famous Painters Were Bogus.

By MARQUIS DE CASTELLANE.
Special Cable to The American.
PARIS, Oct. 25.—A unique sale of pictures was just taken place in the Latin quarter. It was a sale of bogus pictures and I do not recall ever having seen one like it in Paris. The pictures bore the names of Corot, Troyon, Ingres, and other famous masters; every one of the paintings had been painted upon by the Paris Artists' Guild and pronounced forgeries.

WHY ARE **Me-Too Corsets** A BOON TO WOMANKIND? THEY GUARD YOUR FIGURE HEALTH & PURSE

"Me-Too" Corsets Do You Know Them? UNTIL about five years ago, almost no corsets were made with elastic garters and bands. Why? Because no elastic existed that could be trusted to wear well.

About that time we invented Lastups Webbing—the FIRST durable elastic fabric, we fashioned Lastups Cloth, the ONLY OTHER durable elastic fabric.

We began to make corsets with these new fabrics. Their success was instant. Imitations were compelled to copy our models, as best they could; BUT they had to use, and STILL USE, the same old unreliable elastic. They can get no other.

Don't waste your money on these "Me-Too" corsets, no matter what anybody tells you or how much they may look like the genuine Nemo. Find the trademark, "LASTUPS"—it's your only safeguard.

The Nemo "Lastups-Back" shown in this picture, is being limited by only a few "Me-Too" manufacturers, here and abroad. THE DIFFERENCE is that the Nemo feature is made of semi-elastic Lastups Cloth, which outwears the corset, while the imitations have just the same old elastic you used to get in hose supporters—likely to "give out" in no time.

This No. 336, by the way, is a wonderful corset for \$3.00. No comparable low bust; skirt is so long that it would be uncomfortable if the Lastups-Back didn't make it flexible. Self-Reducing, low bust; for full figures.

Other Nemo Corsets, For All Figures—\$3.00 to \$10.00. The women who don't know all about the Nemo has something to learn that should demand her immediate attention.

In Good Stores Everywhere Nemo Hygienic-Fashion Institute, N. Y.

—ought to know, probably he does. And perhaps, if he's an up-to-date man, he'll sell corsets automatically. The Nemo Hygienic-Fashion Institute way.

To become "corset-wise" ask us to send you the Nemo Hygienic-Fashion Institute, just out—free.

—ought to know, probably he does. And perhaps, if he's an up-to-date man, he'll sell corsets automatically. The Nemo Hygienic-Fashion Institute way.

Believe in Advertisements. These daughters of liberty are generous. They need money lavishly, but with discrimination, and if their manner of doing so is occasionally a little blatant, early much can be forgiven. Those who give much, they believe in the value of advertisement. They like to see society paragraphs about their jewels and gowns, and they know all the world will read about their vast improvements.

AN attractive program has been arranged for the regular meeting of the Woman's Club at Monday afternoon at 2 o'clock at the auditorium.

The business session will be followed by Current Events, under the direction of Mrs. Emma Connolly, chairman. Mrs. A. M. Clarke will then deliver an interesting lecture on "The Fine Art of Speech." Musical recital will be given by Mrs. Lorraine Woffington, soprano. Her Woffingtons is most highly recommended as a delightful concert singer and voice specialist. This will be the initial recital in Atlanta. His work is for the uplift and development of high-class music. "Le Printemps" (soprano), in French. "Still as the Night," in English. "When the Roses Bloom," in German. "The Evening," in German. "The Little Boat," in Italian. "Verdi's Requiem," in English. "The Little Boat," in German. "The Evening," in German. "The Little Boat," in Italian. "Verdi's Requiem," in English.

MISS MAYME CLYBURN, assisted by Mr. Rothberg, has arranged for a concert at the Federal union this afternoon. Mrs. Douglas has taken a great interest in getting reform and has accomplished much good along that line.

The concert numbers will be rendered by Edward Werny, Miss Agnes DePuy, Miss Myrtle Rott, Miss Charles, Mrs. J. B. Greenfield, J. C. Worrell and G. F. Under.

The Los Angeles People's Orchestra receives the support of all the musicians in California. Just now meetings are being held over the state to raise a fund of \$10,000 for the organization, which is conducted by Edward Leitch.

Another orchestra, the Los Angeles Symphony, also is supported by the city, and a separate fund of some \$10,000 is set apart for its support. The People's Orchestra will on its program present the series of eight fantastic dances for orchestra by Alfred Schnittke, and later in the season will play the symphony in A Major No. 1 by the same composer.

A quadrille for two, piano, the principal theme of which are taken from Wagner's "Tristan and Isolde," has been found among the papers of the late Emanuel Chabrier and will shortly be published.

MISS MAYME CLYBURN

Atlanta's Most Popular Young Vocalist Will Augment the SUNDAY EVENING CONCERT at the HOTEL ANSLEY

Hotel Ansley, Atlanta, Ga.

Atlanta to See Annie Russell in Classics Revives Goldsmith and Sheridan Comedies

Primrose and Dockstader in Black Face Follow—Forsyth Features Harry Bulger.

By TARLETON OLLIER.

MISS ANNIE RUSSELL, with commendable aestheticism, hopes to see a more classic stage in the United States. Miss Russell with her revivals is probably doing as much to that end as any drama league leader, but will she succeed? It must be confessed that there is a pretty general public desire for far things, that the fine and complex are in offering for the public's delectation.

However, Atlanta will have the benefit of her revivals. Miss Russell is shown at the top; Oswald Yorkie, with her in revivals of classic comedies at the Atlanta, is at the right. The three dancers are Ray Montgomery and the Healey sisters, at the Forsyth. Low Dockstader, at the Atlanta, and Grace Scott at the Lyric, are below.

real foundation of the bill will be comedy.

Harry Bulger and Herbert Cortelli are the newest recruits from standard vaudeville. They have a dialogue that is crisp and timely, and the impersonation of two well-known vaudeville, whose faces are familiar to the audience.

There are no better laugh winners than these two men. Charles Klein and his company will make their first Atlanta appearance, presenting one of the newest of their successful sketches.

Ray Montgomery and the Healey Sisters will present a singing and dancing novelty, and Homer Miller and company, in a new sketch, will add to the merit of the week. Kimberly and Mohr, two clever young men, will offer a piano playing and singing novelty, and a real feature will be the introduction of Lolette, the South American roller skating bear.

At Raynor buildings, well trained cantinas, will round out a show that has real promise of being one of the best that Forsyth goes each week.

"The Third Degree," From "Lion and Mouse" Author

"The Lion and the Mouse" will always be held up by which to identify Charles Klein, the playwright. However, there are those who say "The

Third Degree," his later play, far surpasses the other in power, technical perfection and appeal. If it does, it is a great play.

Atlanta playgoers will have the opportunity of finding out for themselves this week, when "The Third Degree" will be presented at the Lyric Theater every night of the week, with matinee Tuesday, Thursday and Saturday.

The story of the play deals with a crime which, by reason of snap judgment of police heads, is attached to an innocent man. Finding they must make good their first suspicion, they bend every effort to the one end—that of fastening the chains on their victim. "The Third Degree" methods are vividly depicted, just as clearly as were the workings of high finance and big politics in "The Lion and the Mouse." There is a love story in the play.

"An Orphan's Prayer" Fills Bijou Company's Tent Week

The tenth week of the Jewell Kelley Stock Company will begin Monday with a four-act rural comedy drama, "An Orphan's Prayer," at the Bijou Theater. Edward E. Courser, who wrote the play, is author also of the popular drama of the same name. The story of the play is that of an orphan girl who must fight

to keep her place in the home to which she was brought, and who then is fighting for her chance to succeed. There are dramatic situations, pathos and at the same time considerable play of comedy. Eddie Black, the comedy star, will be as usual, in a suitable role.

The usual arrangement concerning free admission for women Monday night holds good this week.

More Sprightly Girls Added To Columbia's Burlesque

Rejuvenated and enlarged, the White Way Burlesque Company will offer "The New Office Girl" at the Columbia Burlesque Theater this week, with performances each afternoon and evening. The week will be notable because of the appearance of new stars. Fred Kennedy and Gus Mortimer, worthy burlesque comedians, came to Atlanta last week to head the company's cast, and Miss Lucille Vincent, a young woman of beauty and ability, was with them to assume the leading feminine role. "The New Office Girl," staged by Mr. Kennedy, is said to be fresh and bright and full of novelty. The bright and full of novelty. The bright and full of novelty. The bright and full of novelty.

The Boys' Winter

There'll be skating, walking, watching football games and many other things to keep a boy out in the open this winter.

Every active, normal boy, warmly enveloped in a good overcoat, is better off there than anywhere else.

The Muse Boys' Shop is rich with overcoats. Big double-breasted coats with belts and shawl collars, warm, all-wool chinchillas and chevrots, rich brown and blues and grays—the sort to turn the edge of the sharpest winter. All sizes, 11 to 18 years.

The "Petticoat Squadron" of the Czar

"The Sultan's Favorite." Drawn by Leon Bakst.

How the Fascinating Russian Dancers Have Played Russia's Subtle Game of International Diplomacy

THAT the world position of Russia has undergone a radical change since the Russian dancers won international popularity is a significant fact that has hitherto escaped public attention.

Many European statesmen, however, have noticed this phenomenon, and while some are perturbed by it, others are carried away with enthusiasm. The truth is that the Russian dancers form "a petticoat squadron" similar to that by which Catherine de Medici maintained her power in the dark and desperate politics of her time.

The gifted and often beautiful young women of the Russian imperial ballet corps mingle in the society of all the capitals of Europe, make friends among the politicians and high officials of the country, exert an influence in favor of their own country and convey valuable information to the Foreign Office at St. Petersburg, which could be obtained in no other way.

Probably the most beautiful and charming of the women dancers is Anna Pavlova, who is coming to perform at New York's Metropolitan Opera House next season. A remarkable picture of her, made specially for this newspaper by the great Russian artist Leon Bakst, appears on this page. Bakst has had a great share in making the success of his dancing compatriots.

Now, it is interesting to know that Anna Pavlova has established her permanent residence in England, and has purchased a beautiful estate near London. She has been taken up by English society in a manner rarely accorded to a dancer. In connection with this it is to be noted that the most remarkable change in Russia's international position has occurred in her relations with England.

For years Russia and England were the deadliest enemies. When the Japanese war was brewing England seized the opportunity to crush her ancient foe by aiding Japan in every way. After the war Russia was completely humbled. Her French allies looked upon her as a broken reed. Germany disregarded her in the Near East.

But the Russians, though humiliated in war, retained their old capacity for diplomacy and intrigue. Strange to say, England was induced to enter into an understanding with Russia, and through England an agreement with Japan was reached. France once more looked with respect on her ally, and loaned her money. Germany began to fear Russia again.

In all these momentous events the fascinating Russian dancers have had an important part. Trained for many years

at the expense of the Czar, they have a thorough understanding of the aims of his government, and many of them enjoy the intimate friendship of the autocrat himself, his grand-ducal relatives and the highest officials of the empire.

The romance of Mlle. Trouhanova, one of the handsomest of the Russian dancers, has already been referred to. The young Duke of Leinster, head of the most ancient noble family in Ireland, wishes to make her his bride, it is said, but she will not consent unless she can continue to dance. Trouhanova is distinguished as possessing the finest figure among the Russian dancers.

The dancers have made friends with the most influential men in all European countries, from dukes to members of the popular branches of the legislature. The intimacy beginning with a common interest in art has often passed on to a discussion of political affairs. Thus Russia has been guided in her foreign policy by much confidential information.

The success of these artists in winning the sympathy of foreign officials has been, at least to a great extent, a legitimate one. Their art is very genuine and novel to most Europeans, and it is only human to admire it.

The United States departed from her traditional policy of friendliness toward Russia at the time of the Japanese war. Will the Russian dancers be successful in winning back this country?

NEW DISCOVERIES ALL OVER THE EARTH

Why It's FOOLISH To Say "STOP WORRYING"

By WILLIAM LEE HOWARD, M.D.

"I stop worrying!" That is the advice you hear on all sides. And that is just what you want to do, try to do, but simply cannot. The more you try the more they harrow, harrowing thoughts and ideas pile over your mind. It's so easy to say "Stop worrying!" What you want to know is HOW to stop worrying. I am going to try to help you.

Do not confuse useless and killing worry with anxiety. Anxiety is a normal part of woman's life. Worry is a symptom of some physiologic disturbance which reacts upon the brain cells.

For instance, the boy leaves his mother and home for the first time. He is starting to take hold of his career. Anxiety as to his comfort, his success or failure, is natural. But if that mother worries continually about him being cold, ill, starved, meeting rough men and evil women, if she sees in everything she reads or hears something happening to her boy, she is approaching a state of unreasonableness—a state of danger to her health. Such a woman does not see life as it is; everything is distorted, exaggerated; it is all worry—to her.

Soon this unnatural worry is affecting her husband and friends. The woman reads of railroad wrecks and

INSULTED STOMACHS Produce REMORSE; Poor BLOOD, Abnormal ANXIETY

Immediately writes or telegraphs her son to stop traveling. Often, to have peace at home, the father goes to the son in order to calm the worried mother.

Of course, there are hundreds of varying forms of brain-travelling worry, but they can all be traced to three or four causes, and when these causes are known, this useless worry may be avoided.

To continue with this mother's condition. Her natural anxiety merged into unnatural worry. This soon brings about self-loathing or self-worry. She hears or reads of some woman about her age who died from cancer. Then she hunts for some sore or tender spot. In this state of mind she can always find one. A slight neuritic pain in the head, the beginning of cancer pain. She loses appetite and sleep, her whole body is affected, and she literally WORRIES herself into a serious illness.

This, in outline, is about the history of the majority of the "nervous wrecks" we doctors have to see—and do what we can for them.

To advise a person suffering from this really serious loss of self-control by saying: "Stop worrying!" is cruel and mischievous.

The condition of the brain cells depends upon the condition of the blood flowing through the brain. Now, this blood is affected by the secretions of the many glands in the body. There are the kidneys, the adrenal glands, the pancreas, the thyroid, and others. When one of these glands is secreting too much or not enough of chemical elements some disturbance takes place in the quality of the blood. The brain cells become irritated and then worry is added to normal anxiety.

The kind of worry that takes hold of the individual depends upon the form of normal anxiety. For example, a man is anxious about his investments or about the position of the stock market. The brain's physiologic system is all right, he controls this anxiety, does his best and looks at the matter philosophically. Let him, however, indulge in a few days' of dissipation, and worry takes the place of controlled anxiety. Then he becomes reckless, more

worry follows, and unless properly treated, the end soon comes.

This happens because the dissipation has caused a disturbance of some of the secreting glands and the brain blood is poisoned. Remorse is, under ordinary circumstances, only a symptom of a clogged liver. A stinging conscience is frequently only the kick back of an insulted stomach—and a warning not to repeat the insult.

When one commences to worry over matters that are really as being really unimportant, it means some commencing disturbance of the secreting glands. Try to find the cause. Have you deprived your body of rest? Have you been eating and drinking too much—either soda water or alcohol? Have you been exercising? Have you forgotten to give your brain rest, or have you dulled it by too much sleep? Have you danced long or late or been breathing the hot, poisonous air of crowded rooms or halls? Have you in any way disturbed the physiologic rhythm of your body?

Remember, you are a law unto yourself in details. Every one has his or her body some weak spot which must be considered. This you must find out for yourself. Any work, sport, study or amusement which leaves you trembling, anxious or brain-muddled is the thing which you must avoid or continue with care.

A man who speculates and who has to resort to stimulants to keep himself—as he thinks they do—from over-worrying, should change his vocation. The nervous strain affects some secretory gland and brain-ringing follows. The daily "ditch courage" increases the state of affairs. This is the cause of recklessness, haziness, suicide.

On the other hand, there are men so constituted that they can risk their last dollar on speculative schemes with the same mental poise a day laborer shows when he drops his tools, eats a hearty meal and drops the sleep of a babe. He may be anxious over the outcome, but useless worry does not afflict him.

Practically the same varying conditions are seen in

"The condition of the brain cells depends upon the condition of the blood flowing through the brain. The blood in turn is affected by the secretions of the kidneys, the adrenal glands, the pancreas, the thyroid and many other glands. When one of these glands is secreting too much or not enough of chemical elements the quality of the blood is disturbed, the brain cells become irritated, and worry is added to normal anxiety."

those who have responsibilities. The chauffeur, the motor man, whose heart beats rapidly after ordinary work, shows that the nervous system is under a strain. Soon the strain will tell. Worry over what one's imagination conjures, selfish, demands stimulants, and then come attacks of psychic epilepsy and accidents.

The man and woman who carry worry with them when they go on a vacation are better off at work. True, change of climate and associations will do much for the tired, anxious person, but not for the one whose brain blood is receiving irritants from some diseased gland.

To tell an over-worried woman to leave her worries behind as she does her old clothes, is cruel, as I have stated and purposely repeat.

Such a person needs right scientific attention and observation, microscopic and chemical examination. This attention will disclose the cause of all her worry. Treatment will partly eradicate it.

I say partly, because the self suggestions have implanted fixed ideas which leave their impressions. If these are not thoroughly wiped out there will come a time when they will rise again, and then the woman is worse off than at first.

This is due to the fact that she loses faith in the treatment; that age has left her less mental resisting power, and the secreting organs have become less amenable to medical aid.

With the aid of an understanding psychologist, just as soon as the worry becomes controllable, write down the facts which stood for such gigantic fears. From your normal view of matters you will see how useless was all the fear. Continue this method of seeing and reasoning.

In other words, look upon your brain as having been over-exercised. Now that the blood flowing through it is pure blood, all you need is brain drilling, mild exercises. Surely, if you had muscles which became flabby, (trembling) and under complete control, you would go to work and exercise them, develop them, control them. You can do the same with the brain. It is extraordinary what you can do with this method in developing a mind that will laugh at worry.

CANNED EGGS That Are FRESH as NEWLY LAID

ONCE again it is a woman who has hit upon a brand new idea that promises to be importantly useful. She is Dr. M. E. Pennington, in charge of the Philadelphia Laboratory of the Government Bureau of Chemistry. Her business is scientific investigation, and the idea she has originated has to do with the canning of eggs.

For many years past eggs have been commonly sold in cans—"broken out" and frozen in big tins, for sale to bakers and confectioners. They have commonly a nasty, decrepit, being included in the mess.

But Dr. Pennington's idea is something entirely different. Eggs canned after the process she has invented will be as fresh as when new laid, even though used until they are years old. It is all a matter of using only perfectly fresh eggs, and putting them up in cans or glass jars under sterile conditions—conditions, that is to say, which will prevent germs from getting at them. The eggs are first "candied," to make sure of their freshness. Then each one is broken separately into a sterilized cup. If one comes along that is in the least doubtful, it is promptly rejected, and the hands of the

operator, as well as all appliances used in connection with that egg, are freshly sterilized.

The cans or glass jars are sterilized before the eggs-contents are put into them. Everything in connection with the process aims to the exclusion of germs. The very knife with which the eggs are broken, as well as the cup that receives them, must have been previously sterilized.

When any kinds of things are canned, they are subjected to heat after the necessary time has been sealed, in order to kill any germs in the containers. But in this case heat cannot be used. What is wanted is not cooked eggs, but raw eggs. Accordingly, the jars or cans, after being sealed, are put in a place where the temperature is close to freezing. They are kept at this temperature until wanted for market.

When the idea comes to be applied on a commercial scale, the canned eggs will be transferred directly from the cold storage warehouse to the refrigerator of the dealer. The housewife, when she buys them, will get eggs on the freshness of which she can absolutely rely, no matter what their age may be. And in the winter time she will not be obliged to pay winter prices for them.

Why MILK Should Be Kept COLD

EVERYBODY knows that milk will sour unless it is kept cold, but many do not know how important it is that milk should be kept at an ice-cold temperature continually from the time it leaves the cow until it is finally consumed.

In the effort to insure the undoubted purity of the city's milk supply the Health Department at Springfield, Mass., has been making a series of valuable experiments to determine the effect of various temperatures upon milk.

Two grades of milk, each about twenty-seven hours old at the time of purchase, were selected for the test. A record was made of the bacterial count and the sweetness of the two grades, which for convenience in comparison, were marked No. 1 and No. 2. Grade No. 1 showed a bacterial count of 280,000 colonies per cubic centimeter. No. 2 had a bacterial count of 16,400 colonies per cubic centimeter, which indicated immediate cooling after milking and subsequent careful handling.

Samples of milk from the two grades were then tested at temperatures of 100, 75, 50 and 40 degrees Fahrenheit respectively. Each sample was thoroughly mixed every twelve hours and tasted for bacterial count and acidity. As soon as the first trace of acidity appeared, a sample it was eliminated.

The following were the lengths of time the two grades of milk remained sweet:

At 100 degrees—No. 1, 12 hours; No. 2, 36 hours.
At 75 degrees—No. 1, 36 hours; No. 2, 60 hours.
At 55 degrees—No. 1, 80 hours; No. 2, 180 hours.
At 40 degrees—No. 1, 180 hours; No. 2, 360 hours.

These experiments conclusively proved two things: First, that milk souring with bacteria turns sour much quicker than pure milk, regardless of what temperature is maintained; and second, that milk which is reasonably pure to start with can be kept sweet longest at a low temperature.

Further investigations of the milk sold in Springfield showed an average of 20,000 bac-

teria to the quart at the farm, 63,000 at the dealers and 360,000 at the consumers. The average temperature at the farm was found to be 47 degrees, at the dealer's 44 degrees and at the consumer's 58 degrees. This shows how small a rise in temperature is necessary to bring about a great increase in the number of bacteria.

NEW SIGNS to Make MOTORING SAFER

MANY serious accidents to automobiles are due to the fact that danger spots in the road are not marked with warning signs distinctive enough or placed in the right way to be noticed by the driver travelling at even a moderate speed.

Much confusion results from the fact that every State, and often every section in a State, uses different style of signs for the guidance of motorists. And this confusion is heightened by the unfortunate tendency of many advertisers to overshadow the road signs with large announcements of their wares.

Several European countries have lately adopted a system of signs which has many advantages over this country's chaotic method, and which it is hoped will some day become universal. In these new signs, the words are used—they give their warnings by means of cleverly devised symbols, which can be easily mastered and can be grasped much more readily than even a short sentence.

If, for instance, a sign shows a right angle turned to the right appears on the roadside, the motorist knows that he is approaching a sharp curve (turning to the right). If the angle turned in the opposite direction he knows that the curve is toward the left.

If he sees a sign like a huge Z, he knows that he is approaching a

double curve. If the sign is a great X, he knows he is nearing a crossroad. If the sign is a wavy line, that means "railroad crossing." If the sign is a disk with three black circles, the road is barred to motor cars. If the picture shows a "hump" the road is filled with "humps."

Why POPCORN Should Be MORE POPULAR

POPCORN ought to be more popular. At all events such is the opinion of the Department of Agriculture, which has been collecting information about the production of this kind of corn in the United States and the uses to which it can be put.

The popcorn crop is already of considerable importance in some sections, though the bulk of the market supply comes from a few small districts in Iowa and Nebraska, where farmers make a specialty of it. This supply is taken in part by dealers who meet the demands of local trade in various parts of the country, and for the balance by manufacturing concerns which make "cracker-jack" and other kinds of popcorn confectionery.

There is beginning to be a small export trade to Europe. If the people of Europe, as yet almost wholly ignorant of this magical grain, could be induced to appreciate it we should be glad to supply them with all they wanted to pop. Or, if desired, we would pop it for them and ship it across the water in the form of package goods.

There is a very satisfactory profit in the manufacture

of popcorn confectionery, as may be judged from the fact that \$20 worth of popped corn in packages of four, a nickel package, represents an outlay of only \$1 to \$1.50 for raw materials, including sugar, etc.

For good results in popping the main requisites are good corn and a hot fire. Do not use too much corn at one time—not more, that is to say, than enough to cover the bottom of the popper one kernel deep. One pint of popcorn should yield from fifteen to twenty pints of popped corn.

A recent Government bulletin says that popped corn is superior to many breakfast foods now on the market. Sometimes it is eaten with milk and sugar. In many farmhouses popcorn cake is considered a necessary adjunct to Christmas festivities, and the ears of the little corn variety are particularly popular for Christmas tree decorations.

On many farms where popcorn is not produced for market it is customary to plant a few ears of it in the garden for home use. Anybody who owns a garden can do this to advantage, being thus enabled to make popcorn confections at home and to have them fresh in which condition they are at their best. There is much economy in this, inasmuch as enough popcorn to make \$20 worth of 5-cent packages of popped corn may be

grown on a patch of land 40 feet long by 30 feet wide. Popcorn growing interests the children, who are usually glad to do the planting and hoeing. If properly stored in dry and well-ventilated bins the corn will retain its popping quality for a number of years.

Why does popcorn pop? On this subject there has been a good deal of dispute, but the fact seems to be that popcorn pops because of the expansive power of steam. A grain of popcorn is a rice-shaped little husk of starch, which has walls strong enough to resist considerable pressure from within. When the heat is applied the moisture in each little husk is converted into steam, which finally escapes by explosion. A little steam escapes from the little husk to explode simultaneously, whereupon the grain of corn turns inside out and is transformed into a relatively large mass of snow-white starch.

But while gaining so largely in bulk—the popped grain being fifty per cent as big as the unpopped—the corn loses in weight. It has been found that 100 average grains of unpopped corn weigh 11 grams, whereas the same number of grains after popping weigh only 11 grams. The difference is the weight of the evaporated water originally contained in the corn grains.

FISHING to Be Good at PANAMA

THE Government Fisheries Bureau thinks it likely that a fish hatchery may be profitably established on the banks of Gatun Lake—the largest artificial lake in the world, across which all ships will pass on their way through the Panama Canal.

This lake, formed by the dammed waters of the Chagres River, will have by next December, when it is hoped to have it filled, a surface area of 167 square miles. It will be, of course, a body of fresh water, and the experts think that it may be possible to introduce into it some of our valuable northern fishes, such as bass, crappies, sunfish and other kindred varieties.

If a fishery station is established there experiments will be made in the artificial propagation of some of the more valuable finny species native to tropical America. This will be a very interesting few departure, of course, viewed merely as an experiment, and it will also serve a highly useful purpose.

It is believed that the great lake can be made to serve as a large source of food supply for the Canal Zone, and that ships passing through the ditch will be able to obtain all the fresh fish they want from the waters of Gatun.

The fish should be good fishing, not only in the lake, but also in the canal itself—unless the Government forbids. It has already been suggested that some of the desirable food fishes of the Pacific Ocean may find their way through the canal into the Atlantic, and vice versa.

This would supplement by natural means a work in which the Fisheries Bureau for some time past has been engaged. Thanks to its efforts shad today are more abundant in the rivers of Oregon than in the Delaware or Potomac, and shad eggs are being taken for hatching purposes from "ripe" mother fish on the Willamette, a tributary of the Columbia River. Fishermen are even catching shad in salt water off the river mouth of Oregon.

Why EVERY PHYSICIAN Should Have a GOOD VOICE

IT is not always the ablest and best trained physician who gains the largest practice and the greatest fame. Many reasons have been suggested for the failure of large numbers of graduates of the best medical schools and Dr. T. D. Crothers, superintendent of a Hartford, Conn., hospital, finds a new one in what he considers the lamentable lack of musical, well trained voices among members of his profession.

Knowledge alone does not constitute the difference between failure and success, Dr. Crothers, but the person's capacity to apply this knowledge in a practical way. Such application is impossible unless a man can express his thoughts effectively and to do this requires a good speaking voice.

The greatest musical compositions of the world if presented on broken, discordant, inharmonious instruments, would attract very little or no attention. In the same way the human voice, out of tune, broken, jarring, untrained, can never convey facts and thoughts in their proper setting.

The human voice is capable of as thorough training and as high a development as the intellect. It is an instrument of marvellous capacity, almost beyond our power at present

to realize. Yet in educational circles, the tradition that the voice needs no cultivation persists, and so far as systematic training goes, it is the most neglected of all the functions of the body.

Hundreds of graduates of the best medical schools show a complete lack of training in voice and expression. They speak in harsh, broken, discordant tones and with nasal inflections which are unpleasant and sometimes positively repellant.

Talk, Dr. Crothers believes, interfered seriously with their success. Voice culture, he urges, should begin in the medical colleges and every student should be taught that his voice is an organ worth cultivating and that it can be of more practical value to him than many other resources that are considered essential in his profession.

A good voice not only creates a favorable impression of a doctor's ability, but it is often of positive benefit to his patients. As Dr. Crothers points out, the physician with a musical voice is much more welcome in the sick room. His soft tones bring renewed courage to the patient by striking, like the harmonies of music, responsive chords in the brain and nervous system.

\$800,000 For A Glass of Beer—And Refused!

But What the
Bartender Scorned as
"Beads" Proves to
Be the Famous Stolen
Pearl Necklace, and the
Laborer Who Found
It Wins a \$50,000
Reward!

An Episode with No Parallel in
the Whole History of Mankind

"Augustus Horne produced the dirty matchbox and showed its contents to the bartender, explaining:

"I picked 'em out of the gutter a little way back."

"A string of beads and a few marbles," said the bartender. "I wouldn't give a shilling for the lot."

"Take 'em for a beer," said Horne.

"Nor a beer, either," said the bartender.

"Maybe they're no good," remarked Horne, "but I'll turn 'em in at the police station, anyway."

On July 15 a necklace of sixty-one graduated pearls and three separate large pearls, the whole valued at \$800,000, were stolen from the mails between Paris and London. Six weeks later four obscure jewel dealers had been arrested on suspicion, and a reward of \$50,000 offered. But for two months the whereabouts of the stolen necklace remained a mystery.

At 9 o'clock on the morning of September 18 Augustus Horne, a workman, proceeding along a London street with his lunch basket and kit of tools toward the scene of his daily labors, noticed a soiled and battered match box on the curb near a lamp-post. With a flick of his toe he brushed it into the gutter. Then, with an impulse of mild curiosity, he fished the box out of the gutter and opened it. A man who had been standing near the lamp-post turned and walked away.

What Horne saw in the box, so he thought, was a string of beads and three small marbles. He stuck the package carelessly in his pocket and walked on. Coming to the Swan public house, he stepped inside for a morning dram. Finishing his drink, he produced the dirty match box and showed its contents to the bartender, explaining:

"I picked 'em out of the gutter a little way back."

"A string of beads and a few marbles," said the bartender. "I wouldn't give a shilling for the lot."

"Take 'em for a beer," said Horne.

"Nor a beer, either," said the bartender.

"Maybe they're no good," remarked Horne, "but I'll turn 'em in at the police station, anyway."

Leaving the disreputable little package with the desk sergeant, who his name and address as the finder, Horne went about his usual business.

Next day this poor London workman learned that what he had been unable to exchange for a glass of beer had earned for him a fortune of \$50,000, for he was the finder of the \$800,000 worth of stolen pearls, about which two continents were wondering.

Much mystery still surrounds this astonishing Paris-London mail robbery of one of the finest and costliest necklaces of pearls ever strung together. They are perfectly graduated pearls, weighing a total of 1,350 grains, the great central pearl of the made-up necklace alone weighing nearly fifty grains.

How did the thieves get their hands on that sealed and registered mail package? How were they able to break the seals, open the wooden box and the jewel case within it, remove the pearls, elaborately substitute counterfeit sugar of exactly the same weight, and close and re-seal the package without detection?

It is presumable that, finding themselves under suspicion, they placed the jewels in an old match box—not likely to attract attention as having possibly valuable contents—and dropped the soiled package in the street, planning for an unsuspecting member of the gang to "find" it and secure the reward offered. The investigation is still going on, with the view of the keenest detectives of Paris and London engaged in the task.

The necklace was made last October, a year ago, for Max Mayer, whose wholesale jewelry establishment is at No. 88 Hatton Garden, London. Mr. Mayer had no particular customer in view at the time. Safely and uneventfully it passed in the mails three times between London and Paris during the winter, as prospective buyers were located in one city or the other.

For this purpose the registered mail package is regarded as safer than the travelling agent of the jewelry house, and Mr. Mayer was satisfied, for a specified period, to carry a blanket insurance policy of \$750,000 to cover any losses of jewels thus transported.

Early in July the famous necklace was again in the keeping of Henri Solomon, Mr. Mayer's Paris agent. As the Paris agent was about to go away on his vacation, Mr. Mayer instructed him to mail the necklace to the London house. Accordingly, on the morning of July 15, Mr. Solomon personally placed the necklace from the bank where it was kept, carried it to his home and there packed and sealed it as above described. The outer wrapping was of blue paper backed with flannel. This he sealed with wax in half a dozen places, stamping each seal with the Mayer initials, "M. M." He carried the

package to the Paris Post Office in the Rue de Provence, saw it weighed by a clerk named Leon, who registered it at a cost of \$1.11 to Mr. Solomon, and threw it into a basket with other registered matter.

At 7:40 o'clock that evening the registered bag bound for London was sealed and taken in a motor van to the Northern Railway Station. The bag reached the London Post Office at 5:30 the next morning, where its seal was broken and the bag's contents sent out for delivery as addressed.

The London episode in the history of the \$800,000 registered package of pearls has been the subject of an inquiry by the House Secretary of the British Cabinet. Following is the result:

At 8:30 o'clock that same morning the postman delivered the package at Mr. Mayer's office. It was received and receipted for by the responsible caretaker of the premises, who placed it in a safe used by Mr. Mayer for registered mail matter. Three clerks arrived a few minutes later, and at 8:40, Mr. Mayer himself.

The head clerk went immediately to the safe and brought to Mr. Mayer his registered mail, among it the pearl package from Paris, saying:

"Here is a package from Mr. Solomon, Mr. Mayer."

At that moment Mr. Mayer was reading Mr. Solomon's letter of advice saying he had just mailed the pearl necklace.

"It contains the necklace," said Mr. Mayer. "We will take it to the Bank of England and leave it there while I am on my vacation."

The head clerk opened the package, and, finding nothing in it but a lump of counterfeit sugar, uttered the exclamation which was the first announcement of the greatest pearl robbery on record.

Mr. Mayer at once telephoned to Paris for Mr. Solomon. Then, undisturbed by the discovery, he took charge of the case, notifying the London and Paris Police departments, and inserting in the London Times of the next morning a "Personal" describing the stolen necklace in detail and offering a reward of \$50,000 for information leading to their recovery.

No jewel robbery had ever created so great a sensation. Owing to the mystery of how a registered mail package could be rifled while in a sealed bag in transit from Paris to London, and its contents so elaborately replaced with lump sugar of precisely the same weight. Yet the closest investigation of all the French and English post office employees who could have come into contact with the rifled package revealed no clue. The united efforts of the Paris and London detectives were therefore concentrated on the movements of notorious jewel thieves in England and on the Continent.

There were one or two sensational false "leads." The famous pearl necklace was found in a Paris cafe, and Mr. Mayer's Paris agent identified it as genuine. It proved to be composed of false pearls, and was taken from the same manufacturer by a Paris theatrical agent named Hornbostel, who had promised a certain actress that he would show her the stolen necklace. The actress failed to keep her appointment at the cafe. M. Hornbostel sought other consolation and forgot all about his precious pearls, leaving them in the cafe.

In the meantime Mr. Price of Price & Gibbs, acting for Lloyd's, was in Paris, conferring with the Paris police. One day about the middle of August he was visited by two men who introduced themselves as Brandstatter and Quadrantieri, who said they believed they could place their hands on the stolen necklace, and wanted to know if the \$50,000 reward still held good. Mr. Price asked them to return in three days.

Thereafter he called on a Paris gem merchant little known in London, named Spaulier, and arranged with him to accompany the two informers to London and obtain material proof that the necklace offered was identical with the stolen one.

"You knew the stolen necklace well," said Mr. Price. "You know that the big central pearl and the third pearl on its left cannot be mistaken for any others in the world. If the necklace is shown to you, offer to buy outright the two pearls I have mentioned. That will give us the proof we need. Bank of England notes will not be accepted in payment, as they may be stopped at the bank. Provide yourself with French notes, which we will mark for identification."

Armed with these instructions, and a liberal supply of

A Photograph of the Famous Pearl Necklace Which Was Stolen While in the Registered Mail Between Paris and London.

marked French 1,000-franc notes, Spaulier accompanied the informers to London as a possible purchaser of the stolen necklace. From the moment of their arrival in London all three were shadowed by Scotland Yard detectives assigned by Chief Inspector Ward, at the request of Mr. Price, who remained in Paris.

On the afternoon of September 1 Quadrantieri brought four men to the obscure hotel where Spaulier was waiting. Spaulier being introduced as a buyer of gems, one of the visitors took from his pocket the identical stolen necklace, intact, except for the diamond clasp, which was missing. Mr. Spaulier could have it for \$250,000. The four men came down to \$200,000. As Mr. Spaulier did not have that large sum with him, he would "settle the affair to-morrow." The men were so disappointed that Mr. Spaulier offered them then to show his good faith by paying \$20,000 on account and taking as security the large central pearl and the third pearl on its left.

Thus he carried out his instructions, receiving the two identifying pearls and paying over \$20,000 in marked French 1,000-franc notes.

On the following day these four men and one other were arrested, several of the marked notes being found in their possession. Four of them are more or less suspicious characters with shady jewel-dealing connections, named Silverman, Grissard, Lockett and Gutwirth. The presence with them of a man named McCarthy was found to be a coincidence, and he was released.

The informer, Brandstatter, who turns out to be a relative of Gutwirth, told the police he had been told that it cost the thieves \$40,000 to perfect their organization and perform this pearl robbery—and this is practically all the police have learned of the details up to the present time. There are vague clues connecting the arrested men with confederates in different classes of society in England, France and Germany, but no sort of answer to the big problem of the elaborate, almost incredible, rifling of the sealed pearl package during its transit in the Paris-London registered mail.

Neither has the mystery been solved which surrounds the dropping of an old match box containing the necklace in an obscure London street, after the arrest of the men who sold two of the pearls to Mr. Spaulier. Out of a huge mass of testimony taken before London Magistrates, the one interesting human incident is that of Augustus Horne, quoted above—the workman who found the pearls and turned them over to the police, after vainly trying to exchange the "beads and marbles" for a glass of beer.

This lucky person remains dazed by the prospect of receiving the \$50,000 reward. Rather humorously, however, the payment of that reward is temporarily postponed because of the frantic claims made by the informer, Quadrantieri.

Why a Portrait's Eyes Follow You as if Alive

Why do the eyes of a painted portrait follow you?

It is often uncanny, the way they do it. In older days a superstition attached to it—especially with regard to certain portraits in ancient houses. The idea has been embalm to some extent in literature.

But we know now why the thing is so. It is simply an optical illusion, easily explained.

To produce such an effect, the eyes of the person represented in the portrait must be looking directly front, and not toward one side. So much for that. Now, under such circumstances pupils of each eye are necessarily in the middle there, as with much "white" on one side as on the other.

Obviously, this relation does not vary at all with the position assumed by the portrait. The latter may stand far over on either side of the picture, and yet, from the point of

view, there is as much "white" on one side of each eye as on the other, and the pupil still is in the middle. Such being the case, the painted image continues to look directly at him.

That is all there is to it. And exactly the same principle applies to the pictures, often seen in advertising signs, which not only look but also point a steady finger directly at the observer, no matter where the sign may stand. Sometimes, instead of a finger, it is a pistol in the picture that is pointed.

This very curious optical phenomenon is exhibited most strikingly on the street cars. One enters, say, at the rear door, and sees, on a picture sign, a man pointing a finger or a pistol at him. As the passenger goes forward the man actually seems to turn and follow him with eye and pistol, still pointing the latter at him when he has reached the front door of the car. It is a wondrous thing

view may be (so long as the picture is in sight at all), the muzzle of the pistol, or the fingertip, is always optically central. The picture being a plane surface, the relation of fingertip or muzzle to the other parts of it are unaltered. Hence, wherever you stand, the pistol or finger points at you.

In the palatial mansion of a New York multi-millionaire there is a double staircase, the two flights joining at a landing above. On the wall is a huge painting of a flock of sheep coming downhill. The picture is a famous work of art, and cost nobody knows how many thousands of dollars; but the thing about it that chiefly interests most people who see it is that, no matter which of the two flights (which are fifty feet apart) one ascends, the sheep seem to be running directly toward the observer. Here again the optical principle involved is exactly the

The Unstrung Pearls of a Necklace Worth \$800,000 Would Make a Handful Like That Shown Here.

NEW MIRACLES of MEDICINE ACCOMPLISHED BY RADIUM

Leading Physicians and Surgeons of the World Report a Surprising Number of Cases of Cancerous Growths Cured, Stomach and Liver Trouble Relieved, and Even Arterial Hardening Checked

When radium was originally discovered, public interest was greatly excited by the merely curious properties of this substance—its power of emitting invisible rays which penetrated solid substances, of rendering various bodies phosphorescent, taking photographs in the dark, of expending energy without apparent loss and so forth.

Then came the discovery that radium possessed certain curative powers. The first results were not very convincing, and popular interest waned.

Now, we learn suddenly, that physicians and scientists have for several years been patiently conducting experiments which finally prove that in radium we possess the most wonderful curative agent in disease ever discovered.

Radium has cured many malignant growths which were hitherto hopeless. It has brought back destroyed body cells to life. It has exercised a beneficial effect in diseases of the liver and intestines, and it is now even said to be a cure for that heinous disease, hardening of the arteries.

In the early days of radium the effects of treatment were very contradictory. Sometimes a marked aggravation of the disease was observed, sometimes the radium produced serious injury on healthy tissue. But in many cases there was a surprising and unaccountable cure of a malignant growth.

The reasons of this uncertainty are now understood. Radium emits three kinds of rays, which have very different properties. It also emits emanations, but that is another story. The three kinds of rays are called alpha, beta and gamma rays, after the first three letters of the Greek alphabet.

The most distinguished scientists in the world, including Madame Curie, the discoverer of radium, Sir William Crookes, Sir William Ramsay, Professor Soddy and Rutherford as well as many physicians and surgeons have been absorbed in the task of studying these three kinds of rays and establishing the difference between them.

The alpha rays are the shortest, having a length of about an inch. They have a destructive effect on healthy tissue. That was why, in early experiments, radium often caused such injury. The beta rays have a length of about a foot. They have a stimulating effect on cell growth. They are, therefore, very dangerous when applied to cancers and abnormal growths, but they are useful in other ways.

The gamma rays are the longer, having a length of three inches or over. These are the rays that have effected marvelous cures of cancerous growths. They check the development of abnormal cells and gradually re-establish a normal cell balance.

The alpha rays are stopped by glass, aluminum and other metals. The beta rays are stopped by lead, but the gamma rays penetrate lead. A thin sheet of lead will, therefore, protect the tissues against the beta rays and alpha rays. These rays are also eliminated by holding the radium at about two inches' distance through lead requires many

more applications than distance eliminates the lead causes a loss even of much of the gamma rays.

Radium also produces a kind of gas, known as an emanation, which fills a receptacle in which the metal is kept. This gas causes bodies with which it comes in contact to become radio-active for a limited time. This furnishes a basis for another kind of medical treatment. The radio-activity may be induced in water, which is then drunk and exercises a valuable curative effect in many intractable internal diseases. The radio-activity may also be transferred to solid substances and used in the treatment of abnormal growths. As the use of the incredibly costly radium is minimized by this method it becomes an important economy in treatment.

The alpha rays are charged with particles of positive electricity, the beta rays with negative electricity, while the gamma are apparently not charged at all. When a stream of alpha rays is in the field of an electro-magnet the alpha rays are thrown to one side, the beta rays to another, while the gamma rays flow straight.

With an instrument called the sphinteroscope it is possible to watch the bombardment of countless tiny sparks produced by radium. When these are not under the influence of the electro-magnet it is possible to see the difference between the three kinds of rays. It may be seen for instance, that the alpha rays are very weak and wavy.

The alpha rays have a strong bactericidal action when they are brought in immediate contact with disease germs. This is why radium, when held too near, destroys healthy tissue cells. When a thin sheet of lead is held between the radium and the object, the bactericidal action disappears.

The curative effect of radium on malignant growths is not due to its bactericidal or germ-killing power. This is the opinion of Dr. Robert Abbe and other high authorities. In treating malignant growths the bactericidal action of the alpha rays must be eliminated to secure good results. Their curative value is attributed to some imperfectly understood power of restoring the balance of normal cell growth.

The gamma rays have a decided effect in checking life. When normal tissues were radiumized they went on living as normal worms indefinitely, terrible Methuselahs, while their sisters and brothers, unradiumized, increased for generations, complexed cycles of bugs, eggs and meal worms over and over again.

There are many ways of applying radium. One method, shown in the large illustration at the head of this page, consists in preparing a paste with radium bromide and spreading it upon a metal plate having a long handle. The operator, wearing a rubber glove, applies this to the tumor. The alpha and beta rays may be eliminated by holding this at a distance of about two inches or by interposing a sheet of lead.

The length of application varies with the case. Dr. Abbe speaks of a case where he applied radium for thirty minutes to a malignant growth and it began to retrograde in ten days. In another case he applied it for twenty-four hours.

Two other methods of application consist in placing the radium in a leaden tube, open at one end, and spreading it on a cloth which is attached to the applicator or to the surface of radium injected into the

How Radium Is Used in the Treatment of a Malignant Tumor. The Radium Bromide Is Spread Upon the Metal Disc Which Is Held by the Surgeon with a Rubber Glove. The Alpha Rays (Indicated by the Greek Letter for "A") in Lighter Circle Around the Disc, Reach an Inch and Would Do Harm if They Touched the Tissues. The Beta Rays (Indicated by the Greek Letter for "B"), Shown in the Lighter and Darker Circles, Would Be Equally Harmful, as They Stimulate Growth. The Gamma Rays (Indicated by the Greek Letter for "G") Shown in Both Circles and Beyond, with a Range of Three Inches or More, Have a Destructive Effect on the Tumor, and Must Alone Be Permitted to Reach It. The Distinctive Signs of These Three Kinds of Rays Are the First Three Letters of the Greek Alphabet.

Scientist in the Radium Institute, London, the Chief Centre of Radium Therapy, Using a Scale to Weigh the Millionth Part of a Gram of Radium.

veins increases blood production, improves the digestive function, stimulates the liver and strengthens the nervous system. Radiumized water has a similar effect.

A piece of radium placed against the head of a blind person, or the head of an ordinary person in the dark, will cause him to see light in which solid objects may be distinguished.

It is from London that the definite announcement of the efficiency of radium in curing malignant growths has come, although Americans have had a large share in the achievement. Sir Frederick Treves, the famous surgeon, who made his reputation by treating the late King Edward, announced recently at the Radium Institute in London that the emanations of radium could be used in place of the original substance. The Radium Institute is a philanthropic institution founded by Sir Ernest Cassel for treatment with this material. It possesses more radium than any other institution.

"Radium gives off this emanation constantly," said Sir F. Treves. "The amount of the emanation depends on the amount of radium used. The emanation practically never weakens. The radio-activity of the piece of radium from which it exudes is inextinguishable."

As a matter of fact, it has been estimated that an atom of radium sheds out-half its radio-activity in 2,500 years. The emanation probably lasts for something; approximately that time, although its duration has not yet been calculated.

Radium emanations contained in sealed metal applicators are now sent out to doctors throughout Europe for patients who cannot obtain radium or go to the institute. A gram of radium costs \$10,000, but the emanation is given almost for nothing.

At the Radium Institute many cures of inoperable cancers or malignant tumors were announced. One woman had an enormous sarcoma of the collarbone. She had been informed by surgeons that the only remedy was removal of the entire right arm and shoulder. A tube containing 116 milligrams of radium was imbedded in the tumor for twelve hours on two consecutive days. Within a month all signs of the growth had disappeared. Now, after the lapse of six months, there is no recurrence.

A school teacher, aged thirty-five,

Diagram of a Cancer Treated by Dr. Robert Abbe, of New York, with Radium. The White Dots on Black Ground Show the Cancer Cells Degenerated Under the Influence of Radium.

From the Medical Record, New York.

"I have been able to study the efficiency of these specimens of Madame Curie's radium on more than 750 individual cases in private, including 260 epitheliomas of all parts; 180 carcinomas of the tongue, throat, oesophagus, breast, intestines and other visceral organs; 50 carcinomas of the skin, parotid gland, bones, etc., besides sarcomas, tumors of the liver and mediastinum and a variety of naevi, molles, papillomas, etc."

In all cases where he had not obtained beneficial results Dr. Abbe said it was due to error in using the radium. There were three types of results: (1) destruction of tissues too closely in contact (2) stimulation and harmful results, and (3) efficient retrograde degeneration of malignant growths, with lasting benefits amounting at times to a surgical cure.

Since he had understood that the gamma rays were the cause of the degeneration of tumors Dr. Abbe said he had never failed to obtain beneficial results.

Here is an example of one of Dr. Abbe's many cases:

"A young man had the upper three inches of his right humerus entirely replaced by a myeloid tumor expanding in lemon shape. Under scathe anesthesia a portion removed

showed mixed giant-cell and spindle-cell sarcoma. I embedded in the mass four tubes of radium (total 150 milligrams) for three days, so as to irradiate and cross-fire it. During the eight weeks following gritty bones began to form in the soft tumors, and then a bony shell formed. During six months a marked increase in bone and simultaneous shrinkage has occurred. Notwithstanding some central necrosis of the soft tissue, it bids fair to recover its bone solidity and strength."

So wonderful was the regrowth of normal tissue previously destroyed by a tumor that Dr. Abbe put forward a theory that radium has the power of restoring the balance of life forces.

"In what does the beneficial action of radium reside? This question, with many others, will await solution. We know only that we have a subtle force, which as far as we discern, is a stream of rays charged with negative electricity with intense penetrating power, capable of traversing stone, human flesh, or solid steel with facility, which plays upon the vital cells (animal or vegetable) and alters their rate of growth or kills them altogether."

"What the vital spark is in a living thing no one knows. It has been surmised that life itself may only be a movement of electric forces. It has been supposed by some that a living cell continues its normal career owing to a balance established within it between positive and negative electric force, and that an aggregate mass of cells in the body, such as constitutes a tumor, may result from their erratic growth curbing a loss of balance of electric equilibrium. May it not be reasonable to suppose that a mild ap-

Where Livers Are Seats of Virtue, and They Build Monuments to Liars.

THE Sea Dyak, that strange race found in the Island of Borneo, has no idea of clear thinking; logic finds no place in his mind. The Dyak, strange to say, is regarded by the Dyaks as the seat of various praiseworthy qualities and emotions. Bravery is considered the highest of virtues, and when they wish to describe the great courage of a man they say he has a "brave liver."

Intelligence also resides in the liver, and a man of knowledge is one possessing an "enlightened liver." Kindness is the quality of the man who has a "large liver," and perseverance that of one who has a "hard liver." A weak, undeveloped man is spoken of as one who has a "soft liver."

The Dyak is truthful and honest, and these qualities are rather unusual in Eastern races. Families are often away from their homes for weeks at a time, living in huts built on their farms, and the men are left in charge of their rooms in the village house in the jungle. These men seldom steal.

After an experience of nearly twenty years in Borneo, a writer says that the most serious instances of theft. One was the theft of rice. The woman who lost the rice most solemnly and publicly cursed the thief, whoever it might be.

The next night the rice was gone. The thief was cursed. The greater part of the money of the village returned to the box from which it had been abstracted. Both these incidents show the great dread

which the Dyaks have of a curse. Even an undesired cure is considered a terrible thing, and, according to Dyak law, to curse a person for no reason at all is aifiable offense.

As regards their truthfulness, it is said of the Dyaks that so disgraced do they consider the deceiving of others by an untruth, that such conduct is handed down to posterity by a curious custom. They heap up a pile of branches of trees in memory of the man who has uttered a great lie, so that future generations may know of his wickedness and take warning from it. The person deceived starts the "rogue" buli-up a large number of branches in some conspicuous spot by the side of the path leading from one village to another. Every passer-by contributes to it, and at the same time curses the man in memory of whom it is.

The Dyaks consider the adding to any famous tale they may pass a sacred duty, the omission of which will meet with supernatural punishment, and so, however pressed for time a Dyak may be, he stops to throw on the pile some branch or twig. Believing, as the Dyaks do, in the efficacy of curses, it is easy to understand how a Dyak would dread the accumulation of curses that would necessarily accompany the formation of a famous tale.

From an Eastern point of view, the morals of the Dyaks are good. They are very uncommon after the birth of a child, but where there are no children, for such reasons as in the case of the Dyaks, the influence of divorce is obtainable by either husband or wife on payment of a small fine.

"Making Children Perfect"

Lady Constance Richardson, the Titled Dancer, Gives Her Unusual Rules for the "All-Around Development" of Boys and Girls

By LADY CONSTANCE RICHARDSON
I AM bringing up my three sons to be perfect men. If I am so fortunate as to have other children I will bring them up in the same way, be they boys or girls. I am glad to bring to the attention of intelligent American mothers my plan for rearing perfect men. If they adopt it I believe one branch of agencies will have taken a long stride in America.

Bringing up children is a striving toward an ideal. Before I begin telling you how I am training these little men of mine I would better tell you what is my ideal of the perfect man.

The perfect man is one whose brain and body and character are equally strong. The perfect man is Nature's best example of balance. His body is strong and handsome, with no muscle developed at the expense of others. His brain is active and well trained without the extreme intellectual activity that makes an overdrift upon the body. His character is clean and fine and unmovable as to principle. Such is a harmonious individual, a perfect man.

I went upon the stage for one sole reason—to educate my boys according to my ideas. My husband and I have very little money, and to establish this group school, which is my aim, for ten boys, including my own, will require an income of \$5,000 a year. When I have earned that I shall retire permanently from the stage. I hope to retire in two years and give all my time to bringing up my boys.

My school will be in the country, near our home, a beautiful spot in the Highlands of Scotland. There I shall have carried out on a larger scale the ideas embodied in the present education of my three little lads—Rory, Philip, Hamish, six, and Torquil, four years old.

I make my boys take exercise every morning for fifteen minutes in a perfectly nude state, so that the air and sunshine may directly reach their vital organs. Whenever the season will permit, and that is from eight to nine months a year, for my boys are not afraid of the health giving, rose-in-chest-producing Scotch mists, I send them straight from their beds to the garden. There they

Lady Constance Richardson, Whose Ideas on the Proper Rearing of Children Are as Advanced as Her Dances.

they wouldn't be clean without them. In the milder months they take these exercises before the bath. In the midwinter they take their exercises in doors and after the bath, first warm, then cool, then warm, then cool again—the famous Scotch bath.

A very important part of the education of my children is teaching them a love of beauty. If they love the beautiful they seek to become beautiful. We think of what is about us and we become like what we think about, so it is most necessary to see only beautiful objects. Keeping this principle in mind I am most careful about the selection of my children's toys. I never allow them to see anything that is maimed or distorted. Before I came to this country last month I went shopping in London to buy my children's toys. To my surprise and disgust I found that the six or seven leading toys were all hideous distortions of human or animal bodies. Be sure my children received none of those toys. I never give them anything like your Billdolls and Kewpies and your Mexican doll dolls that have huge abdomens and little legs and heads too large or small for the body. Your Teddy bears are not bad because they look like bears. But many animal toys are horrible travesties of the real animal.

My boys have never seen anything like this. This is being done consistently by the legions of the toy trade.

Lady Richardson's Three Sons at Their Home in Scotland. Exercise Every Morning in a Perfectly Nude State Is Part of the Novel Training Their Mother Is Giving Them.

the sculpture and paintings in the Louvre and other great galleries of the world. If I let them look at the picture books it is only after I have gone carefully through them and scissored every one that shows the human figure as other than perfect. Also I cut out every picture that shows killing. My boys have never seen pictures of Jack the Giant Killer, nor have they heard the story, nor the picture and story of the hideous witch riding a broomstick.

I am as careful in the selection of fairy stories for my children as I am of the pictures they see. I tell or read them only such stories as deal

I base my children's education upon religion. Not in the sense in which we usually think of religion, for I never go inside a church. But I teach them a religion that rests upon a profound faith in God and a sense of responsibility to other human beings. I teach them that it is their duty and pleasure to make people about them as happy as they can, that they must never make the world harder for any one.

I teach them to respect the human body and be unconcerned of it, save to keep it clean. I do not believe in giving the body undue prominence in life by excessive athletics. I am training my boys only to be athletic enough to be healthy. But I train them away from sex consciousness. I teach them that it is wicked to degrade the human body to the level of the bedroom.

sort's method is the natural one. I am deeply interested in it.

I have planned that my home school shall be a small one, so that every child shall have special attention according to his particular bent.

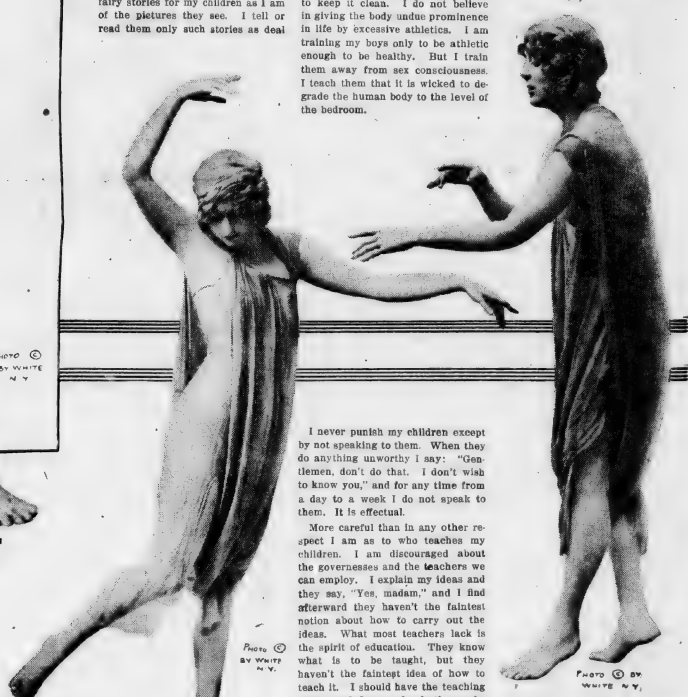

I do not care especially what my boys learn. Beyond the more rudiments I shall only see that they are trained well in whatever most interests them and in what naturally follows, that from which they derive most pleasure. If one sings well I

I never punish my children except by not speaking to them. When they do anything unworthy I say: "Gentlemen, don't do that. I don't wish to know you," and for any time from a day to a week I do not speak to them. It is effectual.

More careful than in any other respect I am as to who teaches my children. I am discouraged about the governesses and the teachers we can employ. I explain my ideas and they say, "Yes, madam," and I find afterward they haven't the faintest notion about how to carry out the ideas. What most teachers lack is the spirit of education. They know what is to be taught, but they haven't the faintest idea of how to teach it. I should have the teaching force weeded out and only those who love children and those who have the spirit of education would be allowed to remain. They must not only love children, but they must understand them. There should be a course in child nature in every school and every teacher should have a year of probation. After that, if she fails, she should not be allowed to teach our children nor any one's else. She should take up her livelihood-earning in another way. Madame Montres-

Lady Richardson as She Appears at the Start of Her Dances.

will have him trained to sing very well. If he paints well I will have him trained to paint good pictures. But I will not have their talents trained to the abnormal point of genius. Better that they should be farmers than Cabinet Ministers. The will be far happier leading their people lives in the country. Far better that they should be good than great.

One of the Poses with Which Lady Richardson Is Earning the Price of Making Her Boys Perfect Men.

go through with J. P. Muller's fifteen methods of exercise. I have no favorite exercise. Unless one gets through the entire system one muscle will be developed more than another, and the purpose of the perfect man is defeated. I like the Muller system. It is the best system of exercises I know. But I should discard any artificial system of exercise if I were sure that my boys would always like it in the country. In that case their natural play and work would be enough. I hope they will, but I mean to prepare them for the unfortunate emergency of living in town. In that case a system of exercises, perfectly learned, with the habit of following them, will be better than a million dollars to their credit in the Bank of England.

Ordinarily fifteen minutes of play in their nakedness in the garden is enough. Children's instinct for play is an unerring guide. They do better at their play. Instead they run about as playfully and cease each other as persistently as puppies.

I never excuse my boys from this fifteen minutes of naked play unless they are seriously ill. I have trained them to believe that they are as necessary a part of their day's program as brushing their teeth—that

Lift Your Hat and Bow When You Meet a Statue

ONE of the strangest societies in existence has lately been organized in London. It is called the Courtesy League. It has no headquarters, requires no entrance or membership fees, holds no regular meetings and has neither rules nor badge.

The distinguishing mark of a member of the league is that whenever he passes a statue he stops and faces the effigy, lifts his hat and makes a low bow.

membership, which is confined exclusively to men. The result of this action is invariably to attract a good-sized crowd. As it gathers the league member mounts the curb or a nearby flight of steps and proceeds to deliver an address on the virtues of the statue he is endeavoring to restore to popular favor.

These virtues are threefold: Reverence for the great of all ages and all climes; respect for the dead, and honor for the living.

"Discourtesy is a far greater evil than might

appear to the casual mind," says a charter member of the organization.

"If negatively all the virtues of courtesy. If persistently followed, courtesy invariably results in calmness of thought, equanimity of mind in times of difficulty, patience and general strength of character. All these things are being lost through a decadence of courtesy, and it is to arouse the community to a sense of the importance of this loss that we are following what may seem to some the senseless custom of lifting our hats and bowing to statues."

THE STORY OF MY LIFE—

By Evelyn Thaw

Fifth Instalment of the Most Extraordinary
Human Document Ever Written--Stranger
Than Any Story in Fiction or Drama

Synopsis of Preceding Chapters:

THIS is the fifth instalment of Evelyn Nesbit Thaw's remarkable story of her life.

In preceding chapters she told of the incidents of her childhood as she remembered them.

Her father, a lawyer, of Tarentum, Pa., died when she was nine years old. Mrs. Nesbit, with Evelyn and a son, moved from place to place in her struggle for existence. Eventually they landed in New York, where Evelyn took up posing for artists in order to keep the wolf from the door. Her picture was widely published in the newspapers, and various theatrical offers were made to her. She became a member of the famous "Florodora" musical comedy company.

Mrs. Thaw told in detail of her impressions and experiences as artist's model and chorus girl and of her meeting with Stanford White, whom she characterized as a "benevolent vampire," telling how after he had gained the absolute confidence of Mrs. Nesbit and Evelyn as to his honor and integrity he suddenly threw off his mask and revealed himself in his true colors.

She recounted, too, how Harry Thaw came into her life and wooed her, after a trip to Paris with him and their return to America.

The unique environment in which the former chorus girl found herself when she was installed in the home of the purse-proud Thaws in Pittsburgh was splendidly analyzed in last week's instalment.

She told of the earnest efforts she made to conform to the demands upon her in the new society in which she found herself, although, she asserts, her efforts were in vain. Then she began to hear in ever-increasing number startling stories of Harry Thaw's vicious habits. She confronted her husband with the stories, which he easily explained away. She explained how the quarrel which previously existed between Harry and Stanford White was being constantly stirred up by these reports and accusations as to the responsibility disastrously on the 25th of June, 1906, when Harry Thaw shot White down before her eyes is the subject of to-day's instalment.

the record of his first law cases, his meeting with the girl who was to be my mother and his courtship.
I pass on then to the notes I made in this troubled time.

Consultations with lawyers, with the police, with reporters occupy the full space of my time.

I am to tell the story of Stanford White.

It gives me a nasty taste to think of it; it filled me with horror when I first understood I had to do it.

It is an unthinkable thing that I must stand up in open court and tell—

But there is no way out—nothing less will serve, and Harry's life is in the balance. After all, what does it matter?

I tell myself this a hundred times a day.

Other women have gone into court and told stories without so much as turning a hair, which were infinitely more deplorable to themselves, but I feel my youth and the future looms up very black.

Nobody doubts that I will hesitate to lay bare my soul. The Thaws take it for granted that I should be pleased to have this opportunity. It shows Harry in the light of a saint and that is enough.

Thaw Anticipates His Wife's Tragic Story.

I hinted that the evidence might discover him to be something else, but was shushed out of hearing by his loving relatives.

For my own part, I am determined to tell all that will help him, yet there is a very patent alternative. It is a question whether any human being should so suffer as I must suffer on the witness stand, however momentous the issue. I have read in books of heroic prisoners who have risked death rather than that the honor of their wives should be questioned. Harry's heroism is not of that variety. The newspapers would know nothing about it, and Harry is not the kind to be satisfied with posthumous honors.

Harry is sometimes ridiculously pleased with himself. He seems to look forward to my appearance, in the box as he

I TOLD last week of the events that led up to the killing of Stanford White. I pass now swiftly to the consummation of that tragedy.

It must be remembered, although I had no warning of Harry's intention, I had lived so much in the atmosphere of his hate that I had no doubt as to the condition of his mind. I was satisfied, however, that things would never come to a climax. There was no reason why the two men should meet; indeed, so far as I knew, they never did after my marriage.

But Harry had taken this question of White's evil influence, upon the young with terrible earnestness. He imagined his life was in danger because of the work he was doing in connection with the vigilance societies and the exposure he had made to these societies of the happenings in White's fat. Because of this fancy of his he was advised to carry a revolver. This I knew, but I was not aware that he was armed when we went out to dinner on that fatal night.

We went to the Cafe Martin, Mr. Truxton Beale and Mr. McCallie with us. It was an ordinary dinner party, rather quiet. If anything, we sat on the Twenty-sixth street side of the dining room, arriving about 8 o'clock in an open motor car from Cherry's.

We were an hour at dinner, and it was there that I saw Stanford White. He came in from the Fifth Avenue entrance and went out on the balcony.

He came back again from the balcony and went out by the door through which he had entered. He was about an hour. All this impressed itself upon me. He was a vision. Perhaps, too, something of Harry's fear for his safety had been imbed in me, and I took a distorted view of things. At any rate, I borrowed a pencil and wrote on a slip of paper, "That blackguard is here again," and pushed it across to Harry. He read it and looked across at me.

"Are you all right?" he asked.

"Yes," I said; "no other word passed."

We had taken tickets for the Madison Square Roof Garden, and we left the Cafe Martin about 9 o'clock and arrived at the theatre a little after. The show was a rather foolish kind of production called "Mlle. Champagne," and we stayed just long enough to be bored. Harry and I sat together, and we talked of nothing in particular save the merits of the play, and when I had expressed a wish to leave the theatre he was at once with me, and we rose and went.

I have been asked so often to describe my feelings on that particular night and my impression of the tragedy which followed after our leaving the theatre, and I reply invariably that I have no particular remembrance of what I was speaking of or what I was talking about. I know it was something very commonplace. If you were sitting in a restaurant with a man and suddenly saw him rise, raise his hand and shoot dead at a man at the next table, without warning, without any preliminary ex-

hibition of temper, you would sit aghast and dumfounded, and exactly what occurred and of what you were thinking before the outrage would be a matter rather for your imagination than for your memory.

We did not go immediately, but when we did McCallie and I went ahead and Harry and Mr. Beale followed. We had almost reached the elevator and I was talking to Mr. McCallie and turned round to get some confirmation of what I had said from Harry when I found to my surprise he was not there. I walked round to where he had gone. The next thing I remember was seeing Stanford White at a table about thirty feet away. For a moment I could not see Harry . . . then I saw!

He was standing about five feet from Mr. White directly in front of him. He had his hand outstretched, perfectly still. Then I heard three shots. I could not have prevented it even if I had been at his side. I could only raise my hand to my lips. "Merciful Heaven!" I said, "he's shot him!"

Harry turned and walked toward me.

I said: "Harry, what have you done—what have you done?"

He leaned over and kissed me.

"It's all right," he said, smilingly. "I have probably saved your life."

Mr. McCallie at my side was white and shaking. "Harry," he said, "you're crazy!"

I saw a man come up and grasp Harry; then they led me away to the elevator. I drove straight to the house of a friend, and that night, while the police were searching for me, I sat thinking, thinking, reconstructing the scene again in my mind, trying to grasp its meaning, trying to realize where it all led. Here was the end of a tragic period.

Here was the secret now made public property. Here were all the intimate things of life in the million mouths of New York.

The pressure of Harry's finger upon the trigger had done more than send the swift bullet upon its terrible way. It had released the curtain which hid us all from the gaze of the world. I was startled by all these eyes that stared, all these fingers that pointed. I have a dim recollection of being hunted by an army of reporters. I see again the flaming head lines which told the world of Harry's mad act.

I had no time to think of White, of that great brain acting no more for good or evil. Terror is a violent form of egotism—and I was for the time being terrified by all that I heard and saw.

Rumor had need to work double shifts anyway.

Remember where I stood, what support was afforded me in that hour of trial. The attitude of the Thaws, though in isolated instances kindly, was of the I-told-you-so order.

What more could one expect? Harry had married a chorus girl, had married one who had never been accepted into the fold—he had committed murder. There was little to choose between the crimes.

I saw Harry in jail. He was cheerful and buoyant. He had no doubt as to the righteousness of his act or as to its wisdom. He never then or at any subsequent time expressed the slightest regret for his act.

The Thaws, to give them all credit, did not reproach him. They strained every nerve to secure the best advice which it was possible to secure. They were nice to me, because, as I think, they realized instantly how much depended upon my testimony.

Mrs. Thaw and I went frequently to the Tombs to see Harry, and it was on one such drive that a little incident occurred which will show something of the working of the Thaw mind.

I went so often to the jail that I became a familiar figure, not only to the officials, but to the police who controlled the traffic of the street. They would hold up my car at a busy corner and stroll up to the side.

Written by Harry Thaw.

Was Travelling, and Was Addressed to His Two Brothers, Habit of Illustrating His Letters with Little Sketches.

I lecturer anticipates the utterances of a friendly chairman. I am to introduce Harry as Sir Galahad. "Wait till my little wife gets on the stand," he told the reporters proudly, "and you'll hear a story such as you have never heard before."

I do not share Harry's enthusiasm. The Thaw's will put up the biggest lunacy experts that money can buy on the stand. They can prove Harry was a madman, but they will prove it nicely. There will be no suggestion that he can be unpleasantly mad, or that his madness can take beautiful shapes.

More Intimate Bits from Evelyn's Diary.

"Do you know Jerome, the District Attorney?" he asked. I knew him and nodded slightly. "Jerome loves lunacy experts," said my friend. "He just en joys them. You are going to see and hear things when Jerome rises to cross-examine."

He mentioned a few instances of Jerome's skill. "Most lunacy experts like to be on vacation when a case comes into court in which they and Jerome are engaged. I should not bank on the lunacy 'bug' if I were you."

A newspaper says that Harry is taking a great deal of interest in his trial. I can well believe it. Here is the trial at hand. The plans of the defense are not as yet complete, though attorneys have been retained. Some say that even the prosecution has not quite made up its mind as to the course to be pursued, but those who know Jerome say that he will confine the issue to one point--did or did not Harry Thaw kill Stanford White on the evening of June 25?

If this is the only question to be decided the case will not last very long.

The trial has begun. It has already lasted three days. Here am I with a crowd of other Thaw's, and a grating crowd of people who are Thaw's or anti-Thaw's in sentiment, and a judge on the bench who is neither one thing nor the other, and would be glad to be both.

The jury were empaneled after a succession of wrangles, and true to the forecast, Jerome has delivered the shortest of addresses to them. Witnesses came and went. It was an amazing matter to prove the offense--not so easy a matter to justify. This man saw the shooting, this man arrested him, this doctor described the injuries in language which was mercifully unintelligible--and the defense came with a rush.

Mr. Gleason, Harry's attorney, put a mental expert on the stand. He put him on the stand to prove that Harry was slowly mad, and he proved it good.

Then arose Mr. Jerome, and for the space of a second they blinked at one another, the alienist with forced gaze, and the square-jawed lawyer, all brain and ice-cold logic. It was an interesting day. It was also a little formidable.

Jerome Starts His Vicious Cross-Examination.

Interesting day. It was also a little formidable. For there would come a moment when I should occupy that chair and face this remorseless man. There had been talk of hereditary influence in insanity. "Are you acquainted, as you sit there," asked Jerome, "with the form of insanity which the law of this State defines as excuse for crime?"

"Not entirely," replied the doctor. "Then your opinion is hypothetical," said Jerome cheerfully. "The question you have answered was given to you as a scientific and medical man, and you had in your mind the various forms of mental aberration which scientific men use together to discuss."

"Yes," said the doctor eagerly, "and from my own application of medical knowledge on the subject." His view was ordered to be struck out. "What is your opinion, based on the form of insanity laid down in the law of the State?" asked Jerome.

"The act--the murder--was that of an insane man," said the other decidedly. "Are you a psychologist?" asked Jerome. "No." "Have you studied the subject?" "Not extensively." "As a matter of fact," asked the district attorney, ironically, "do you know what psychology is?" "Yes," snorted the indignant doctor. "You say a delusion is the result of a pathological condition?" "Yes."

"Then Thaw's delusions must come from a pathological condition?" "Yes; coupled with a functional condition." "Is it possible for a function to be abnormal unless there is disease?" "Yes; a dilated artery, for example." Jerome's eyebrows rose. "But a dilated artery has nothing to do with the case of Thaw?" "No."

The doctor was rapidly getting rattled. Jerome put a question regarding the Romberg test used to diagnose brain trouble, and our expert, after some hesitation, had to confess that he did not know exactly what it was. Jerome was truly at home with this type of witness. He led him through a mass of questions dealing with the pathology of insanity, which at times seemed thoroughly to baffle the unfortunate man, who hesitated time and again.

The District Attorney Toys with an Alienist.

Jerome seemed to have every medical authority at his fingertips, and the care with which he had prepared himself to meet the plea of insanity was manifest in every question.

The district attorney's shrewdness was shown when the court returned from an adjournment for lunch, in the course of which I had had a long talk with Harry, who seemed a little depressed and irritated by the attempt which was being made to prove him mad.

"With whom have you talked during the recess?" was the first question Jerome put, and the doctor was a little staggered. "With Mr. Gleason," he replied.

"Did you talk about the case?" The witness hesitated. "Yes; one gentleman told me the Romberg test was a test for locomotor ataxia." Jerome jerked his head on one side and asked with an air of innocence: "Doctor, does the cardiac nerve connect directly with the cerebellum?"

The doctor hesitated. "Well," asked the attorney genially, "maybe you can tell if the pneumogastric nerve joins the spinal column in the lumbar circle or the dorsal region?"

Again the hesitation. "The dorsal region," replied the doctor. Jerome smiled genially.

"Where is the dorsal region?" he asked, and the witness moved uncomfortably.

"I have not read much on that," he admitted. "Oh, well, never mind," said Jerome airily. "Tell me if it is not a fact that the pneumogastric and cardiac nerves are one and the same thing?"

First Thaw Mental Expert All at Sea.

A blow for the poor doctor. "They may be," he confessed. Jerome dropped all pretenses at geniality.

"Don't you, as a specialist in nerve diseases and an expert, know which is which?" he thundered.

The doctor was wisely silent. He was silent, too, while Mr. Jerome rained question after question on him.

"What books on nervous diseases have you ever read?" the doctor mentioned two and seemed relieved to be able to do so.

"Do you recollect a single thing either of these authors said?" "No, in their language."

"When did you last read them?" "Just before coming here."

"Why did you do that?" "I merely glanced at them."

Jerome looked at him with a little gleam in his eyes that I came to know as a well.

"Dr. Wiley," he said slowly, "if you recall anything you ever read in any book please state it to the jury."

An invitation which was not accepted. The torment went on anew. "Are you a homeopathist?"

"No." "Well," said Jerome, sweetly, "what are you?"

"I am a nervous practitioner," said our expert in a loud voice. "Is it not a fact," asked Jerome, "that all the functions of the human body are controlled by the pneumogastric nerve acting through the spinal or medullary oblongata?"

Jerome Batters Down First Line of Defense.

Nobody heard the reply. A roar of laughter swept through the court which the balliff had some trouble to suppress.

"Do you know of the Argyll Robertson test of light?" asked the snare Jerome.

"Yes," defiantly. "Where did you ever hear it?" "I do not recall."

"Did you ever hear of such a thing before I asked the question?" The doctor hesitated, but Jerome went on thumping the table before him.

"Where, in any book in God's whole world, did you ever hear anything about the Argyll Robertson test?" The doctor did not reply.

"Is Argyll Robertson one man or two?" "I think two," ventured the witness.

Again Jerome's cynical grin. "As a matter of fact, he is only one man," he said. "Did you ever examine this defendant regarding his sanity?" "Yes."

"Have you seen him often?" "Yes; in Pittsburgh."

"Can you determine whether a man is insane by looking at him?"

"No; I must have conversation with him."

"Have you ever conversed with Thaw?" "No."

"Do you think," asked Jerome, "it right that you should come here to give it as your opinion that a man is insane when you have not submitted him to examination, and have not even conversed with him?"

"I gave my opinion on a hypothetical question; not on examination," said the doctor.

Altogether a bad day for us. I do not think Jerome likes medical experts.

Jerome Threatens to Tear Me Limb from Limb.

The moment has come. Jerome has told the reporters that "he won't do a thing to Mrs. Evelyn Thaw when he gets her on the stand," and those who find pleasure in the mental anguish of their fellows prepare for a treat. Yet I am not afraid of Jerome. Before the trial I was in a store in New York, and the man, pointing to a number of picture cards, said: "Do you know that man, Mrs. Thaw?"

I saw the portrait of a square-jawed man his finger indicated. "That is Jerome," he said.

I took the card home and studied it. I never fear these square-jawed men. The theory of the physiognomist that strength is found in the building chin is the greatest of all the fakes.

I have met many men, and I have not known one with square jaws who was not essentially weak. They are emotional, and their emotions in times of stress always get the better of their judgment.

The square jaw comes down from our more brutish ancestors--the folk who used physical force to help along their feeble brains. In the prison fight the square jaw finds its place--it is a ways the loser where the battle is one of brains. If Jerome's chin were sharp, I would fear him. As it is, I know that I am stronger than he is. Those emotions behind the square chin will beat him.

Now does the news that he intends tearing me limb from limb and displaying the interesting remains triumphantly inspire me with anything but amusement.

I do not despise the terrors of cross-examination.

Preparing Himself for the Ordeal.

Small wonder that people wish to avoid the witness chair as a priest the devil. The fear of cross-examination is increased tenfold by the fear of publicity, especially if the case be of any interest to the newspapers. I remember a verse from a musical comedy which hits the nail on the head:

Everyone's record is a secret more or less. A trifle chequered, although people never guess. Cut up your capers--But don't get them in the papers--For you're done for if you once get in the press.

It matters not who or what you are, there is always a chance that you may be dragged into some case. As May Mack says: "These be days of exposure." All you have to do is to read the daily papers and in their columns you will find one "prominent" person after another "shown up"--divorced, sued by some star-eyed alien and the like.

Now I want to say something for which I shall most likely be severely criticized, but I think it is necessary. It is right and proper that you should have a great respect for the law, the court and its impressive ceremonies, even the court officers and clerks--but don't take them too seriously. Most witnesses are overawed by the solemnity of the court and the proceedings, seeming to lose their wits and lapse into a state of mental numbness pitiful to behold. However, as I said before, don't take them too seriously. After all, the judge himself is only a man and probably not half as learned and solemn as he looks, and for all you know may have got his job through some political juggling. As for the lawyers--they may be leading double lives themselves.

Now does the news that he intends tearing me limb from limb and displaying the interesting remains triumphantly inspire me with anything but amusement.

I do not despise the terrors of cross-examination.

Preparing Himself for the Ordeal.

Small wonder that people wish to avoid the witness chair as a priest the devil. The fear of cross-examination is increased tenfold by the fear of publicity, especially if the case be of any interest to the newspapers. I remember a verse from a musical comedy which hits the nail on the head:

Everyone's record is a secret more or less. A trifle chequered, although people never guess. Cut up your capers--But don't get them in the papers--For you're done for if you once get in the press.

It matters not who or what you are, there is always a chance that you may be dragged into some case. As May Mack says: "These be days of exposure." All you have to do is to read the daily papers and in their columns you will find one "prominent" person after another "shown up"--divorced, sued by some star-eyed alien and the like.

Now I want to say something for which I shall most likely be severely criticized, but I think it is necessary. It is right and proper that you should have a great respect for the law, the court and its impressive ceremonies, even the court officers and clerks--but don't take them too seriously. Most witnesses are overawed by the solemnity of the court and the proceedings, seeming to lose their wits and lapse into a state of mental numbness pitiful to behold. However, as I said before, don't take them too seriously. After all, the judge himself is only a man and probably not half as learned and solemn as he looks, and for all you know may have got his job through some political juggling. As for the lawyers--they may be leading double lives themselves.

I am not saying that they are, I am just trying to show you how to get yourself into a proper frame of mind, and how to down any disgusting fears tormenting you. It is worth while observing that lawyers make bad witnesses. I know not why unless it be that they are so accustomed to prevaricating and evading direct questions, for it's one thing to use the machinery of the law and quite another thing to have it used on you.

In an important case the judge and the lawyers are themselves worried for fear of making some blunder. The power of the press is watching them as well as you.

Now, just suppose you are dragged into a case of some sort. You are politely presented with a subpoena. Immediately you begin to haggle for a lawyer. Mr. Lawyer soothes you, but not too much. That would be spoiling business, from his point of view, for the less you are soothed the more you have need of counsel. If you are to be a witness you naturally want to know all about it--what will be asked of you--will you be cross-examined? A lawyer usually evades such questions, saying: "Don't think about that now, wait till the time comes." The most they can tell you is what Mr. Delmas told me. Said he: "My dear child, I cannot tell you, no one can tell you, what questions Mr. Jerome will ask you. He himself does not know as yet. You must do the best you can, and I will protect you to the best of my ability. That is all."

A pleasant prospect--might wait?

I shall tell in another chapter just what happened when the time came for me to take the witness chair.

Next Sunday Evelyn Thaw Deals with Her Trying Ordeal as the Chief Witness in the Famous Trial and How Mr. Jerome Ingeniously Tried Every Expert to Shatter Her Straightforward Story That Saved Harry Thaw's Life.

Bringing People Who Have Been to Death Back to Life

The Dog on the Left Was First Bled to Death; then the Dog on the Right Was Attached to It by Dr. Sorel's Method and Its Blood Turned into the Empty Veins and Arteries of the Dead Dog, Which Steadily Came Back to Life as the Other as Steadily Passed Into Death.

ONE of the most interesting addresses delivered at the recent great International Congress of Medicine, in London, was by Dr. A. L. Sorel, of New York.

By Dr. A. L. SORESI, of New York.

Dr. Sorel described how he had brought animals to life nine minutes after their hearts had stopped beating by direct transfusions of blood from other animals. He argued that the same method would revive all cases of death from morphine, ether and concussive poisoning and from asphyxia and hemorrhage.

He described how his method of blood transfusion had saved many children dying from abnormal bleeding. He referred to a technique of joining severed nerves and blood vessels which would enable him to graft the limbs of dead persons on to living persons who needed them. Surgeons were of the opinion that Dr. Sorel could avoid many of the defects of Dr. Carrel's method of grafting. The most interesting passages of Dr. Sorel's address follow:

Before the International Congress of Medicine. It is generally stated that there are organs, such as heart, liver and brain, essential to the maintenance of life, severe injury of which would cause death. This assertion must now be taken with the modification that what we are compelled to admit to be a fatal injury at the present time may not be so in the near or distant future. So, if it is true that the loss, for instance, of the arms or legs, or of both, might not cause death, and the person who suffered the loss might live as long as if there had been no loss, this is due, in addition to the development of our surgical technique, to social conditions. The same loss would prove fatal to a person isolated from other human beings, as he would be unable to gather food or carry it to his mouth, and as a consequence would starve to death. Years ago it was thought that the stomach was an organ essential to life; now we can safely re-

move that organ without immediate loss of life, although the person who suffers the loss is predisposed to immature death from poor digestion.

Asphyxia, wounds of the heart, etc., were considered fatal only a few years ago, and are now where the emergency facilities are not at hand. Up to the present day a stab wound of the abdominal aorta, with its sudden and appalling hemorrhage, is considered fatal, but below experiments will be described in which life was restored, although for as long as nine minutes the heart had already stopped beating.

Remarkable Discoveries of an American Surgeon Which Are Long Steps Toward the Day When No Injury Can Be Fatal and There Will Be No Vital Organs

Diagram Illustrating the Old Method of Blood Transfusion by Connecting an Artery in the Donor's Arm with a Vein in the Recipient's Arm.

By This New Method the Blood Is Transfused from the Donor's Vein Into the Recipient's Jugular Vein, from Which It Passes on to the Heart in the Shortest Possible Time, and with the Least Resistance.

time of entering the left heart without producing irreparable damage. If the left heart could be entered with some stimulating liquid as easily as the right, life could be re-established without much difficulty. The reason is that the coronary arteries supplying the heart have their origin in the left side of the organ, and death being considered as asphyxia anemia, or anæsthesia of the heart, it is evident that better results than those now met with could be obtained if a technique of supplying the heart with a fresh, stimulating liquid which would wash out all the waste products and supply new stimuli could be developed.

It is not an exaggeration to state that all cases of poisoning from morphine, cocaine, ether and chloroform, as well as from asphyxia and hemorrhage, could be revived after the patient had been pronounced dead for a certain length of time if the coronary vessels of the heart could be flushed with stimulating solutions.

In my numerous experiments I have found that the liquid that best stimulates and reactivates the heart action is fresh blood. The most gratifying results have been obtained up to the present time in the case of animals that have been pronounced dead for a certain length of time, but that life is present only when the organs of the body are working automatically in a harmonious way, because each accomplishes certain functions which supply energies and stimuli to the others. It also shows the role of the nervous system to be the great co-ordinator of all the others.

Why, then, does the blood not flow in every case from the artery of the donor into the system of the recipient? Because the technique of using an artery of the donor and a vein of a limb of the recipient is wrong. To make the blood flow freely from donor to recipient, the blood of the donor should flow without any obstacle directly into the heart of the recipient. This is accomplished by using the external jugular vein of the recipient, and is explained by the laws regulating the circulation of the blood. When the blood enters the vein of the donor and is no more under the influence of the heart of the donor, but under the influence of the heart and blood vessels of the recipient exclusively, and in order to circulate it must reach the heart of the recipient.

Why this does not occur is easily explained. Blood pressure is highest at the

resistance there is diminution of pressure, because the width of the bed in which the blood is flowing, when contained in the artery, is enormously increased in the venous system of the recipient.

By using a vein of the neck of the recipient the conditions for the flowing of the blood from the donor are quite different from the conditions described above when using a vein of a limb. The pressure of the blood in the veins of the neck of the recipient is negative. By using a vein of the neck of the recipient the blood coming from the donor falls directly into the heart of the recipient, aided by the suction of the heart during diastole and by the changes in pressure in the chest during the inspiration and expiration.

Recent experiments have convinced me that the best technique is to use a vein for both donor and recipient. It is extremely easy to find a good-sized vein in the arm of any adult as donor. For the recipient the external jugular vein should always be used, for the physiologic reasons explained above and because the greatest difficulty met in performing transfusion in children is due to the fact that their superficial blood vessels are very small. It was then necessary to use the external femoral, which is of pretty good size, but not very superficial, while the external jugular is both superficial and of sufficient size even in infants.

General anesthesia is absolutely contraindicated; in many cases it would be sufficient to produce the child's death, and it is not at all necessary. Cocaine solution, 1 to 200, is sufficient to produce perfect anesthesia.

Remember that transfusion must proceed slowly; if the blood is flowing too rapidly make slight pressure on the donor's vein. Transfusion should last only a few minutes; a child does not need much blood.

Rapid repair of blood vessels and heart have been accomplished by a new technique which I have described but not yet published. The technique is as follows: Small gold wires are bent so as to form an arc and are inserted into the points in the inside of the ear. The intima of the cut blood vessel is brought into perfect contact by squeezing the little gold wire as a clamp for skin clippings; for the heart the clippings are doubled, as the heart is cut the tissue is torn during contractions.

Artificial respiration has been made either by simple traction on the tongue or by pressure over the chest, or by a special pump, so contrived that the tube going into the trachea is airtight, thus not allowing any escape of air between the tube itself and the trachea. By a system of double pumping a given amount of air or any gas, alone or in combination, can be forced under a given pressure into the lungs and aspirated from them. In the prevention of death the heart is the important element to consider, as there can be no profound coma or anæsthesia without loss of life. The question is not of stimulation of the heart so much as of saving its strength. In pneumonia, for instance, death could be prevented if the heart action could be kept up for a few days, the problem here being one of heart action only because the disease exhausts itself in a few days. The heart is flushed with blood loaded with poisoned products, and while its stimulating and nutritive element, the blood, is nourishing it poorly and poisoning it, it has to work harder because of the resistance met from the consolidation of the lung tissue.

Photograph Showing the Line of Incision for Transfusing Blood into a Person.

Transfusing Blood from an Artery in a Man's Arm into His Wife's Jugular Vein During the Operation the Blood Vessels Are Continuously Flushed with a Warm Saline Solution from the Irrigator, as Shown in the Upper Part of the Photograph.

left heart and negative at the right. This difference in pressure assures the circulation of the blood, which depends mainly on these factors: the blood is contained in a closed elastic system of vessels beginning and ending in the heart, which acts as a double pump by rhythmic continuous movements of expansion and contraction. The blood will flow where it meets least resistance, so an animal can be bled to death by severing any blood vessel and keeping its lungs opened, because there is no obstacle to the blood flowing out. In some pathologic conditions, such as shock or severe hemorrhage, the superficial blood vessels are almost bloodless and therefore collapsed. The blood flowing from the artery of the donor meets a great obstacle in the resistance offered by the narrowing of the lumen of the veins of the recipient.

The veins have numerous ramifications, so that the further the blood flows the more resistance it meets. With increased

was maintained by pumping air or other gas through the trachea; the thorax was opened and the heart exposed. When all heart beating had stopped artificial respiration was also stopped at times, and at other times kept up. Direct transfusion of blood was resorted to through the external jugular vein. Heart beating and life could be restored up to seven minutes after heart beating had completely stopped. No result could be obtained if instead of blood other stimulating liquids were used.

I have found my method of direct transfusion of blood very useful in cases of pathological hemorrhage (abnormal bleeding). Among the patients thus treated are those known as "bleeders," who bleed through the mucous cavities of nose, mouth, etc., at the slightest shock.

Blood transfusion hitherto has failed technically in the hands of the very best surgeons. The reason of the failure is that when transfusion is not properly performed a clot forms between the blood vessel of the donor and the blood vessel of the recipient. The clot will not allow the flowing of the blood from one to the other. All my efforts are directed to prevent the formation of a clot at the point of anastomosis.

From the time that transfusion was first attempted, doctors have used a blood vessel of the donor in which the pressure was high, or have raised such pressure by artificial means. This has been done under the impression that the stream of blood coming from the donor under high pressure would overcome the pressure in the vessel of the recipient, and so the blood of the donor would flow easily into the recipient.

The commonest procedure is to anastomose the radial (wrist) artery of the donor with a vein of the limb of the recipient. As the vein of the radial artery is under about seven times as much pressure as the vein of the recipient, it seems logical to reason that the blood of the donor will flow freely into the system of the recipient. This does not always occur is proved by the many failures of direct transfusion of blood.

The blood of the donor does not flow freely, as is commonly supposed, and this is evident from the fact that transfusion is generally kept up from one-half to one hour. A rough estimate of how much

New York Girl's Great Feat of Mountain Climbing

LONDON, Oct. 4. SIR ALFRED TURNER, who has recently been in the Alps, relates a thrilling achievement of a New York girl, which is unparalleled in the records of mountain climbing among women. General Turner said to your correspondent:

"A remarkable feat of courage and endurance was accomplished from Engelberg on August 28 by Miss Edith Welsh, a young American lady.

"Tittlis is the highest of the mountains in the locality, and though it can only boast of an altitude of 10,686 feet, Engelberg, the starting point, is some 3,500 feet above the sea, while Zermatt is 5,500 feet and the Schwarzwasser 7,541 feet, and the Matterhorn, which Miss Welsh ascended on August 23, is 14,665 feet; so that the height to be surmounted was greater in the case of Tittlis.

"The latter mountain, ascended by the ordinary route from the Trubsee, is considered to be one of the most accessible of the Swiss snow giants and only requires a trustworthy guide and good condition in the climber. It has been climbed many thousand times.

Miss Edith Welsh Climbing a Perpendicular Wall Nearly 8,000 Feet High in the Swiss Alps.

"The first ascent on this side was made last year by an Englishman, Mr. Kirkwood, the second by Miss Welsh. Accompanied by the guides Hermann Hess and Eugen Kuster, she left Engelberg at 8:15 a. m. and proceeding up the Hofliufel commenced the ascent of the northern face at 8 a. m.

"For eight hours the party led by Kuster, toiled up this nearly perpendicular precipice, the difficulties of which were found by Miss Welsh to be incomparably greater than those of the mighty Matterhorn; so great were they that the guides found it advisable to climb in stockings.

"Two hours more were spent crossing the glacier and descending the Laubergstrat to the Trubsee Hotel, and at 8:30 p. m. Miss Welsh reached Engelberg, where she deservedly received an ovation.

"It is probable that such a difficult and almost unknown ascent has never been made before by a lady, and Miss Welsh has performed an unprecedented achievement of which her country may well be proud, especially in these days of international physical competition, in spite of the utterance of her distinguished, but cynical compatriot, who said he did not know who was the greater fool—the man who climbed a mountain only to come down again, or the woman who, being two ways of doing a thing, chose the more difficult. Miss Welsh comes from New York City."

How the French Army Trains Dogs to Search Out the Wounded Among the Dead on the Battlefield and Convey Them to the Hospital

On the 14th of July, at the review at Longhamb, where the brilliant marching of our special ambulance corps, when the Alpersian ambulance was first introduced, was loudly applauded as they passed, and the Regiments had been acclaimed as they followed the masses of infantry, the corps of the ambulance was the first to meet the most amazing as well as most instructive feature of the morning—for it was the corps of sanitary dogs commanded by Captain Teale.

These dogs, which were rough-coated beards, wearing the insignia of the Red Cross, trotted along in front of the stands where thousands of people were gathered to witness the movement. Up to that time the dogs of the sanitary squad had never been lined up as part of the army, and many of the spectators were surprised to see such employment of these valuable auxiliaries in the rank of our sanitary service is a happy innovation; and the fact that the dogs were the success of this movement for the training of dogs for sanitary ser-

Now, then, is the service which these dogs can render on the field of battle to the wounded? Who does not recall the Saint Bernard dog discovering unfortunates buried in the snow, and bringing help to them? This is exactly what our army dogs can do. Thanks to his keen scent he finds the wounded quickly. If he has been well trained, he helps all he can, and then guides the surgeons

His services are by no means superfluous. Battles are more murderous than ever to-day (as has been demonstrated in the late wars in the Balkans). The Sanitary Corps is all too small for the services required. It is most difficult, especially at night, to find the wounded among the masses of dead. If the army has conquered they may give as much time as is needed, but if it is fleeing in retreat, they must hasten and often leave many of the wounded on the field because they are not discovered at once.

The man with a broken leg, who has dragged himself into the bushes, is not seen and may die of thirst and hunger, just because he is overlooked. It is reported that in the war in Manchuria 41.7 per thousand of the officers were missing and 71 per thousand of the privates, Russians. The Japanese had a record of 5.021

ed when wounded

The dog also seems practical, and indispensable as an adjunct to the sanitary corps. Has he not proved his value on the battlefield? In the trenches, he has saved the lives of hundreds of men. During the war in Manchuria the German dogs of the sanitary corps rendered great service in the trenches.

The idea of using dogs in this way is not altogether new. It had its origin in Germany. It has advanced so far there that they have made a special school for training dogs in this service. The French society of the gaubed for this purpose has already gaubed some two hundred or more. But it requires further development.

There are kinds of dogs, because of their keen sense of smell, that are best to use. The dog of the best intelligence, keen scent and faithful habits. He is at least equal to the German sheep dog. The German sheep dog, or police terrier, are quite reliable, and almost any dog can be trained.

The men will be brought to the aid of the wounded by the speediest means possible. The wounded will be taken to the hospital by the ambulance company, or by the dog carriages, but it may be useful under special conditions.

In ancient days they used trained dogs to search for the wounded. The hussies of Heracleon and some historians speak of them. Veterinarians used dogs against the Roman troops led by Caesar. But the dog carriages were not used. The dog companies to fight with them.

The real office of the dog in the war is to search for the wounded, and the Red Cross should serve as their protection. He will once more prove himself the friend of man, called to the aid of the wounded on the side of the suffering, digging into the heaps of blood to find those whom the nurses cannot reach. He will find the hands of men, buried in the sands of hell, raised 300, 2000 for the greates and uses, prepared

The Harems Make Our Fashions for the Winter

Says
Lady
Duff
Gordon

A Group of New Dresses Designed by Bakst, Reflecting the Harem Fashions.

The Craze for the Oriental Increases, and Dresses Are Growing More "Feminine"

LADY DUFF-GORDON, the famous "Lucile" of London, and foremost creator of fashions in the world, writes each week the fashion article for this newspaper, presenting all that is newest and best in styles for well-dressed women.

Lady Duff-Gordon's Paris establishment brings her into close touch with that centre of fashion.

Lady Duff-Gordon's American establishment is at Nos. 37 and 39 West Fifty-seventh street, New York.

ly draped sleeves, is of the chiffon, decorated with pearls.

The cap head-dress is essentially feminine, I think. It is, however, only suited for a youthful and, preferably, a piquant face.

The afternoon gown of dull blue tulle shows the harem influence in the scant, up-to-front skirt. The bouffant overskirt, with its three frills, is very chic and most modern. There is a hint of the zouave in the plaid belt and the voluminous bodice. The three-tiered sleeves are very new, and are, I think, very fetching.

There is a chicness about this walking costume which will appeal to many American women. It is the favorite black-and-white combination, too. The skirt is severely simple, but has excellent lines. The coat is of white broadcloth, and is of a remarkable simplicity. The black velvet hat, with its white plume, carries out the black-and-white idea very delightfully.

An odd touch is given by the pearl band under the chin fastened of the black velvet ribbon which many of the young women are wearing.

No, we have not taken our painted furs from the Orient. They are distinctly Parisian. I have seen some remarkable results recently in the development of these furs, and I am glad to be able to tell you more about them, and am also glad to be able to tell you that they have not caught on with really smart women.

That is an admitted fact, for which we should be truly thankful, for a mass of bright geranium red, or emerald green, or sapphire blue, laid about the shoulders and coming close up against the face, would be unbecoming to almost any one, and positively fatally so to some.

But some of the softly shaded furs which have now appeared have been instantly welcomed, and will be much worn during the next few weeks, some of these being just the more ordinary stoles and muffs formed of complete skins, while others are fancifully arranged with foundations and frillings of velvet or satin.

The variety of these new and decorative fur sets is, indeed, simply wonderful, and the result of it all will be that the fashionable woman will assuredly be involved this season in a very heavy extra outlay for her husband probably calling it "wickedly ex-

travagant!") For she will want at least three fur coats in the different shapes and lengths and skins, most—and equally—approved by Fashion, and certainly the same number of stole and muff sets; one, perhaps, chiefly protective and suited to general wear, another in one of the striking contrast schemes of black and white, which are to have a great vogue, and a third, frankly sensational and daring to a degree which would have been impossible a year or two ago, but which nowadays is quite necessary if anything of a mark, is to be made in the season of sensational fashions, fabrics and furs.

Oh! if only a man could be made to understand for just a moment what a woman feels when she is confronted by, say, three entirely desirable and delightful things, and then sadly remembers—or is sternly told—that she can have only one! It is nothing more nor less than a tragedy, for a woman's time for wearing, or, at any rate, looking really well in these smart, "sensation" things, is so horribly short: for once she begins to show the slightest sign of age, or even middle age, she cannot—or, at any rate, should not—be allowed to wear anything startling or extreme, but just be content to have dignified and "suitable" clothes.

Positively, I pity the middle-aged woman this season, for though rich fabrics (which would once have been dedicated to the dowagers) are in general use, there is nothing in the style of their making up but a delightful, provocative, tantalizing daring, only suited to the more youthful and slender wearers.

The muff brings the velvety moleskins into more prominence, for they are used to form the whole of the deeply pointed, loosely

hanging pouch shape, from which again there hangs a swaying alken fringe. Then on either side of the widest upper part a yellow fox skin is carved, the position of each one being exactly reversed, so that both at the back and in the front you get one head and one tail as an additional adornment.

Another set brings the same well contrasted furs together, but in this case the fox is tinted to a pale amber shade, while the mole skin is of the softest moss green, and the stole has for fastening and finish a big and beautiful ornament of silk cord and tassels.

Walking Costume of Black Cygne, with White Bourade Coat Trimmed with Swandown.

Sinking Afternoon Gown of Dull Blue Taffeta, Showing the New Over-Skirt.

By Lady Duff-Gordon
("Lucile")

Paris, Oct. 15.

THE harem influence continues to be strongly evident in the fashions of the Winter. The Arabs have a saying that all good things come from the East. So we in Paris turn Eastward for our fashions. We are taking the best in color and design from each country, even from Persia.

There are no such color combinations in the world as those we get from the Orient. Not only do we get color, but we get designs and fabrics that are gloriously beautiful. Where but in the harem could we get such complete femininity as has been displayed in the fashions of the last five years? The harem dress is the dress of allurements. No Occidental women understand the mystery, the depth of allurements as the Oriental women do. They are the essence of femininity, and to man this essence is the most alluring thing in the world.

In the pictures I am sending this week the Oriental influence is shown in the color and fabric rather than in the design.

These models were shown at an opening in September. The dancing gown is the quaintest thing imaginable. It is developed in delicate rose charmeuse. The minaret tunic is of rose chiffon edged with fur that is caught in places, with tiny gold roses. The bodice, with its interesting
